

# Swanstone

**Transform your home  
with the beauty and  
durability of Swanstone**

Swanstone is a high-performance solid surface that looks great and lasts a lifetime — a unique combination in the industry. From shower walls, floors and accessories, to kitchen sinks, countertops, vanity tops and bowls, wainscoting, molding and trim, Swan offers a complete suite of beautiful and durable Swanstone kitchen and bath solutions.

### Renewable Surface

Swanstone is the ultimate renewable surface. Stains and scratches can always be buffed or sanded out - no gel-coat or laminate surface to wear away. Compression-molded, not cast, Swanstone will not crack like other materials — and it's easy to maintain, since it won't mold or mildew.

### Impervious to Chemicals

Swanstone withstands prolonged exposure to common corrosive solvents like gasoline, acids like nail polish remover and bases like drain cleaner. Any stain can easily be removed with common household cleaners.

### Withstands Heat

Swanstone withstands prolonged heat up to 450°. Hot pots, boiling water and curling irons cannot burn or harm Swanstone sinks, counters or vanity tops - cultured marble and other solid surfaces can't say that!

### Impact Resistant

Swanstone has the best impact resistance in the cast polymer industry - up to ten times stronger! As a result, pound for pound - and pounding after pounding - Swanstone solid surface stands up to heavy duty abuse far beyond daily use.
