THE TRIM MOLDING KIT

Professional results in a fraction of the time

THE TRIM MOLDING KIT

A new solution to easily finish the transition of drywall to bath fixture.

Save Time & Money

Trim Molding Kits improve job site efficiencies by providing material and labor savings in applications such as:

- Eliminate a third layer of drywall when installing showers against a fire-wall
- Installing showers against cement block walls becomes easy to fit and finish
- Renovation application - Eliminate drywall transition to the shower unit. No more mudding, sanding, painting or caulking.

Easy to Install

Trim Molding Kits are economical, strong, long lasting and renewable. The white, high-gloss, non-porous surface is easy to custom fit in the field and is a great time saving accessory.

- Factory mitered 45-degree angles
- Factory cut and designed to fit all Praxis shower and tub shower models

Get professional results in a fraction of the time.

The new Trim Molding Kit is designed to fit virtually all Praxis showers and tub shower models.
