ADA SHOWERS – ROLL IN & TRANSFER

Roll In Showers (minimum 60" x 30" inside dimension)

ADA Roll in Showers are wheel chair accessible. They provide lots of room, making it easier to maneuver in a wheelchair.

Some jurisdictions specify an ADA compliant handicapped accessible shower with a minimum 60"x36" inside dimension so that the caregivers can easily assist.

ADA Transfer Showers (minimum 36" x 36" inside dimension)

ADA Transfer Shower are designed so the user can transfer onto a fold down shower bench from a wheelchair parked outside the shower unit.

To comply with ADA requirements ADA Transfer Showers must be properly accessorized.

The following diagram illustrates the 48" clear floor space to transfer from a wheelchair to the shower seat. ADA transfer showers can be ordered with a recessed receiver flange on the seat side to accommodate a parallel wall.
