

Ease of Doing Business!

NEW & IMPROVED MAAX Electronic Product File (EPF)

Our goal is to continuously improve the ease of doing business with MAAX by providing you the tools needed to grow your business. Which is why we are excited to share with you our NEW and IMPROVED MAAX Electronic Product File (EPF).

What's New:

- **More detailed product information** – no need to seek out product details, everything you need is in just one file.
- **Table of Contents** – with quick links to easily navigate the EPF
- **Glossary** – explanations of each new field on the EPF sheet
- **Custom EPF** – create custom EPF and Web Content extracts with only the information you need, in the order you want it
- **Website Content Updates** – access product media and search engine friendly content to update your website

IMPORTANT: Filter products by Channel

Please note the new EPF contains the entire MAAX product portfolio, for all channels – Wholesale and Retail.

Wholesale: ■ Professional & ■ Collection Price Lists

Retail: ■ Retail Price List

ALL: Walls, Bases & Shower Doors (available for both Retail and Wholesale channels)

Step 1: Select the Channel products you want in your EPF.

1) Click on the **Channel** filter tool

2) Uncheck the boxes of the channels that you **DO NOT** want in your EPF.

3) Click **OK**

1) Click on the **Series – Price List** filter tool

Step 2: Select the Price List(s) (series) you want in your EPF.

2) Uncheck the boxes of the Price List(s) (series) that you **DO NOT** want in your EPF.

3) Click **OK**

EPF Overview & How-to-Guide

How-To-Guide

This guide will provide an overview of all the new features and functionalities in this EPF, and provide step-by-step instructions on how to extract data for your inventory system and/or website content updates.

Table Of Contents	DESCRIPTION
GLOSSARY	Explanation of data found in EPF - over 100 new pieces of information added
CUSTOM-EPF	Quick & Easy Pivot Table tool allows you to create your own custom data extracts
CUSTOM-EPF-HOW-TO	Guide on How to create your custom EPF
WEBSITE-CONTENT-HOW-TO	Instructions on how to use the new EPF to update MAAx product content on your website
EPF-MAAX-US-EN	NEW Electronic Product File EPF
DISCONTINUED PRODUCTS	Discontinued products since the beginning of the year
CODE-CHANGES	List of products with code changes

4

2. Custom EPF (Step 1 of 3)

Step 1: Select the data you want in your custom EPF, in order to update your inventory system or your website.

1) Select the data you want by clicking the checkbox next to each topic.

PivotTable Fields

Choose fields to add to report:

Search

- Brand
- Series
- Product Category
- Product Number
- Price List Code
- Sales Code

To build a report, choose fields from the PivotTable Field List

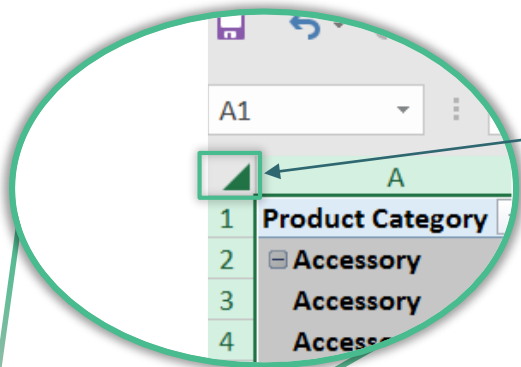

2

2) The topic will then appear on the sheet.

Note: the data will appear in the EPF sheet in the same order you selected them. For example, the first item selected will appear in the first column, the second item selected will appear in the second column and so on, regardless of the order in which they appear in the list.

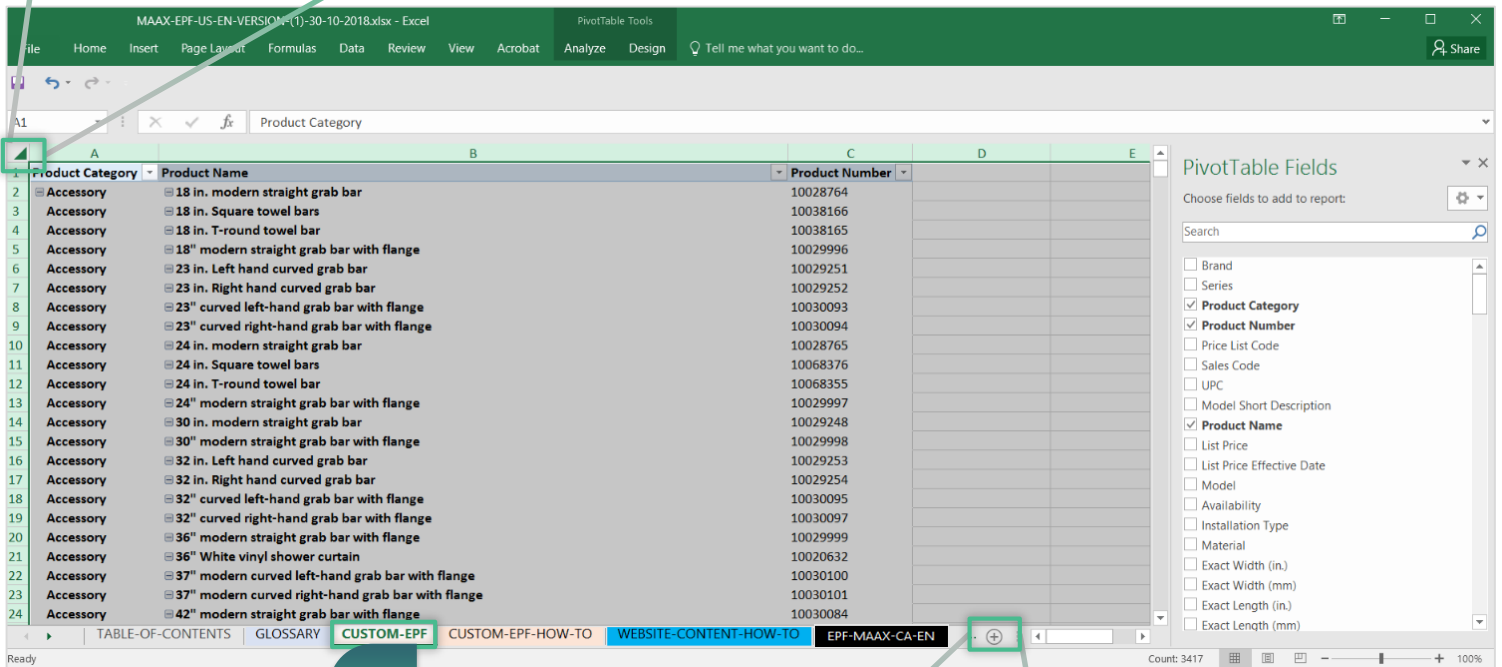

2. Custom EPF (Step 2 of 3)

Step 2: Convert the data to an uploadable data format.

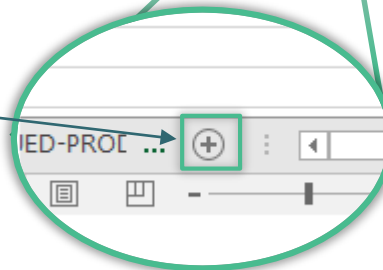

1) Click on the triangle in left top corner of the table to select all.

2) Press keys **Ctrl+C** to copy the data selected.

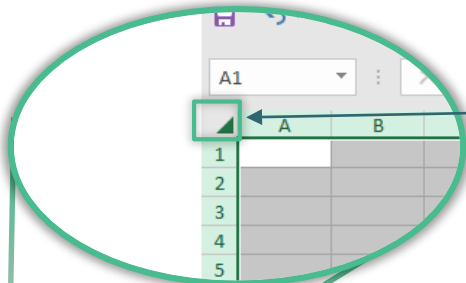

2

3) Create a new blank sheet by pressing the **+** button

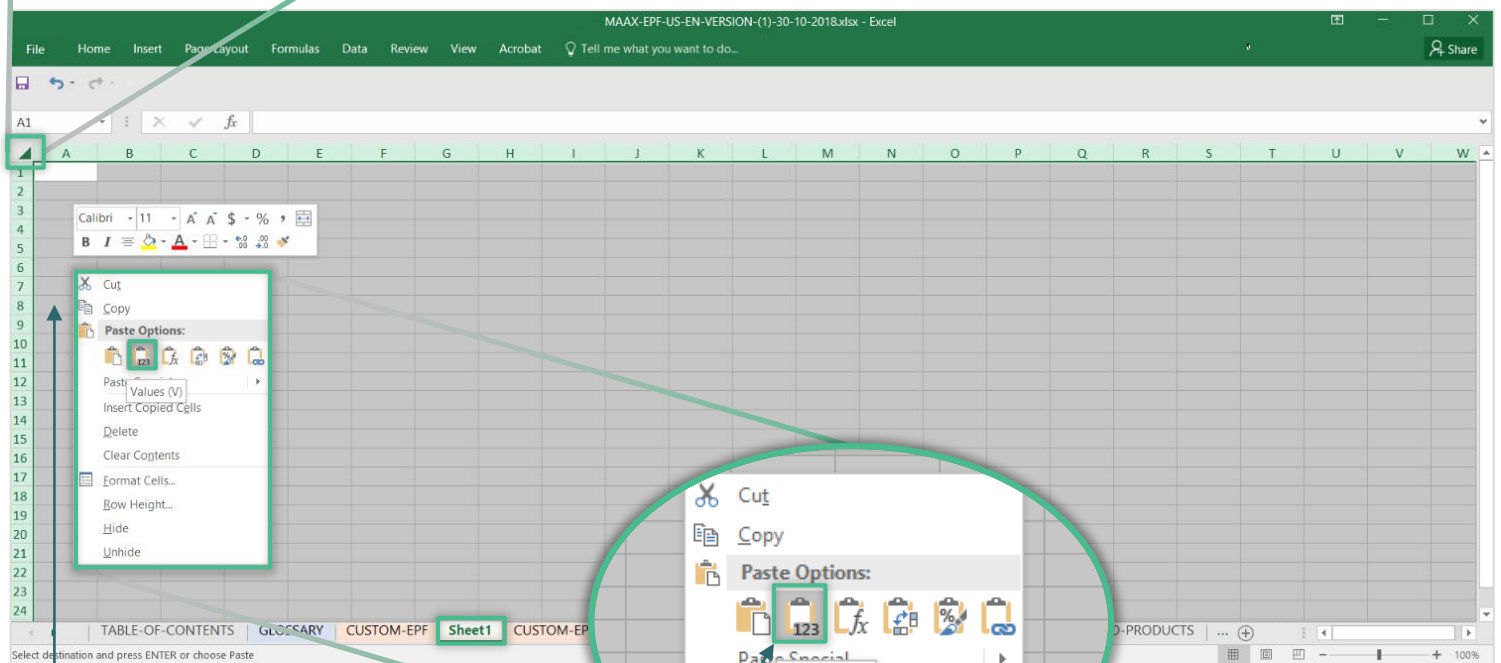

2. Custom EPF (Step 3 of 3)

Step 3: Convert data to an uploadable data format. Cnt'd

4) On the new sheet, click on the small triangle in the top left corner, then press **Ctrl+V** to paste the data into this new sheet.

5) Right click on the highlighted area, and in the **Paste Options** pop up - Select **Values**. This will change the data format from PIVOT TABLE to an uploadable data format.

6) The data will then appear on the sheet, and can be saved and used to load into your system.

3. Website Content Updates

Update your MAAX Website Content Quickly & Easily!

We want you to stay competitive in the digital era, which is why we added new data to facilitate MAAX product updates to your website.

The Custom EPF sheet contains all MAAX product data, and new data like; product specs, descriptions, links to product images, installation guides and tech drawings and other content to help you update MAAX product information on your website. Simply use the links in the Custom EPF to download the files you need, then refer to columns "EK-EY" file names to quickly upload data into you product information management system.

→ See below for addition improvements that will enhance MAAX website content updates.

Product names are search engine optimized (SEO)

Image file and document file names in the Custom EPF sheet exactly match actual file names to facilitate data connections in your PIM systems.

4

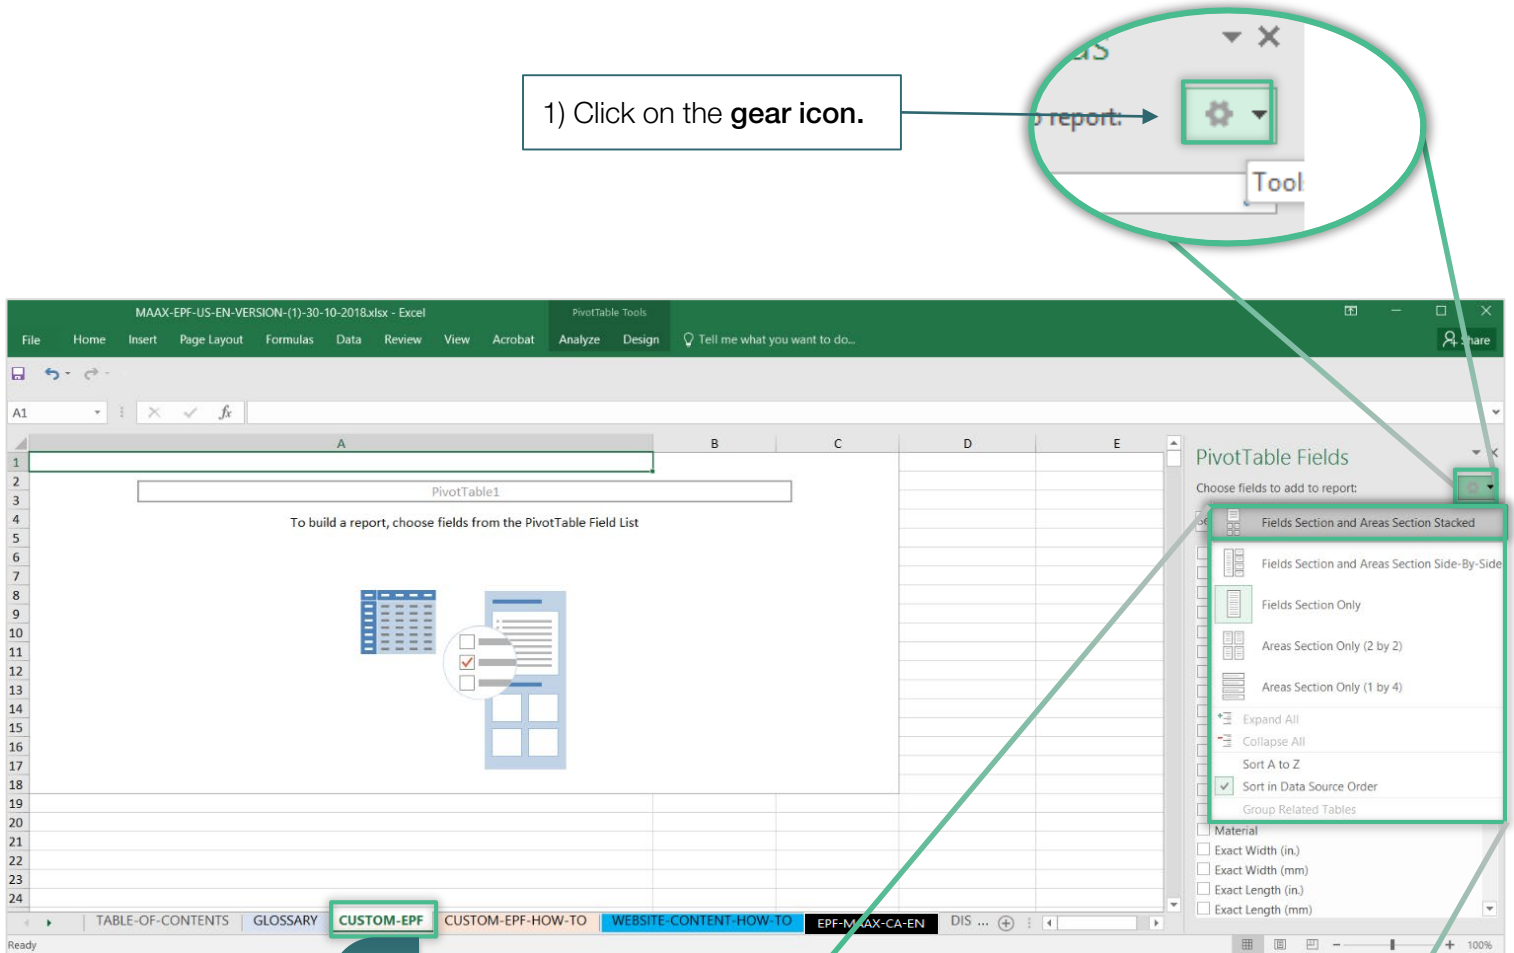

Media documents exact file names allow for faster, multiple updates at once.

3. Website Content Updates (Step 1 of 3)

How to create a data extract for a specific product category

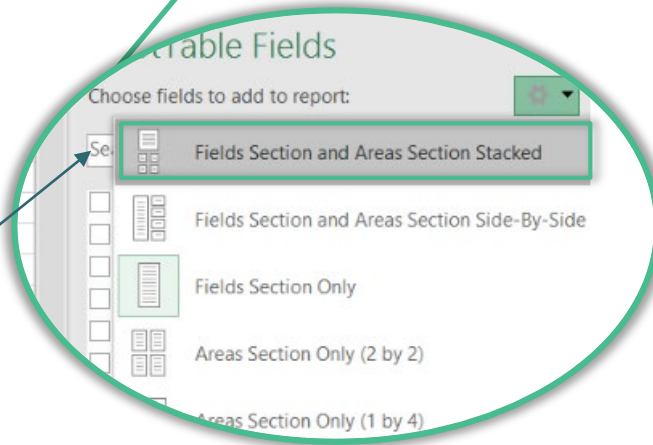

Step 1: Change the Pivot Table Fields panel layout.

1) Click on the **gear icon**.

2

2) Select the **Fields Section with Areas Section Stacked** option from the pop up.

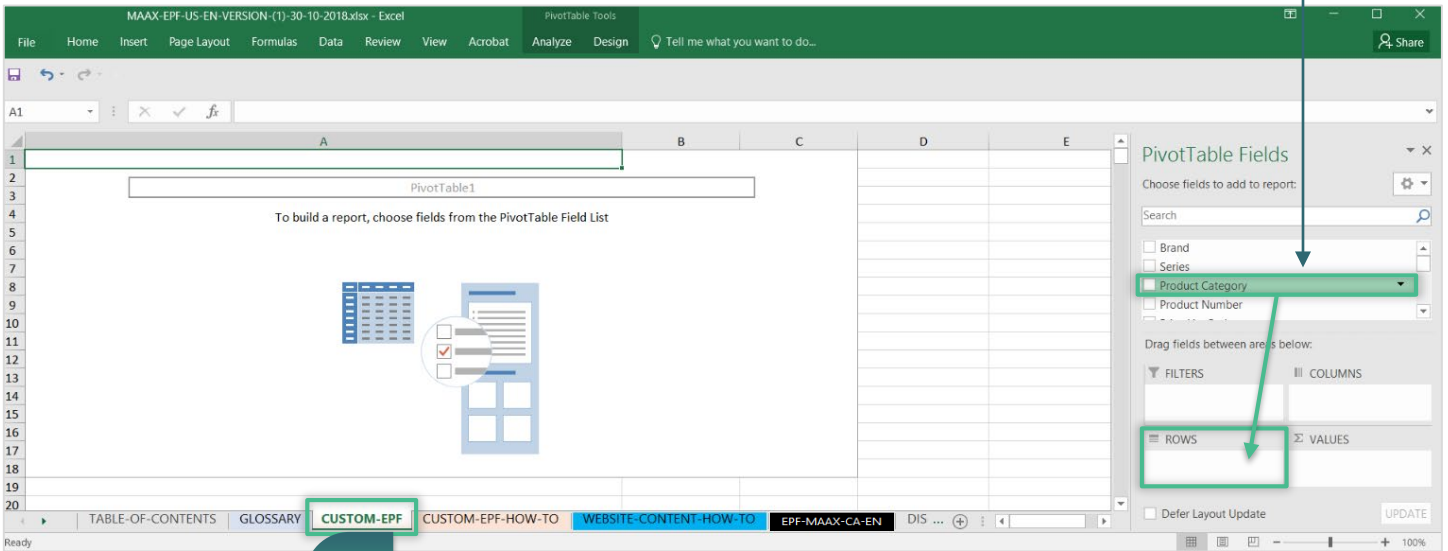

3. Website Content Updates (Step 2 of 3)

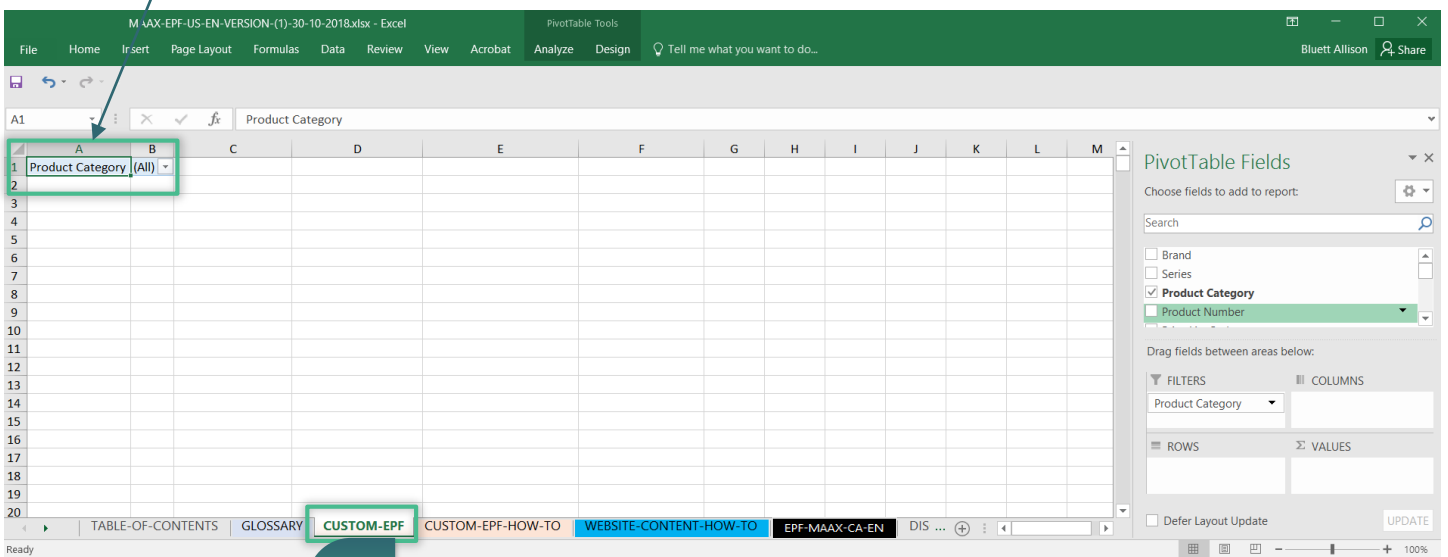

How to create a data extract for a specific product category

Step 2: Add the desired Product Category item to the Filter section to create a specific product view.

1) Click on **Product Category** and drag into the **FILTERS** window.

2) The view filter functionality will appear on the sheet, and the **Product Category**.

3. Website Content Updates (Step 3 of 3)

How to create a data extract for a specific product category

Step 3: Use the Filter functionality to setup data for a specific product category ex. *Bathtub*. Then follow **Custom EPF (Steps 1 to 3)** to convert the data into an uploadable data format.

1) Click on **(ALL)**.

2) Click on the **Select Multiple Items** checkbox.

3) Click on the **(ALL)** checkbox.

4) Then select the product category data you want to update your website with.

2

4. Discontinued Products

Refer to the Discontinued Products sheet for the latest list of discontinued products and their recommended replacements.
