Sliding Shower Door – 8mm

## What is GlassShield?

GlassShield® (GS) is a next-level safety innovation developed by MAAX that offers an added layer of protection to the tempered glass security features of our shower doors.

Similar to laminated glass safety technology used in the automotive industry, this transparent film is bonded directly and permanently onto the glass panel which provides a more effective retention of glass fragments, keeping most of them together in one piece, in the rare case of glass breakage.

GlassShield Film

## Features:

- Enhanced layer of safety for busy jobsite environments
- Security feature that reduces potential for liability, for added peace of mind
- No special installation requirements for shower doors with GS - installs like a normal door
- Extra added-value selling feature in applications requiring extreme protection, like family residential, senior living or hospitality
