

DEDICATED TO DELIVERING BETTER PACKAGING

At Swan, we are working hard to deliver a product that is not only innovative, but also arrives to you in pristine condition. Come see the competitive difference in our improved Veritek™ Pro packaging.

Improved Stacking Strength:

Our reinforced cardboard weight gives 40% more compression strength compared to a lower grade of material, allowing more yield per shipment.

Improved Impact Resistance & Buffering:

There is nothing more frustrating than product arriving damaged. That's why we've improved the impact resistance with our Teletwin-style box for better corner and sidewall protection. This feature helps your product arrive in one piece to complete the job on time!

Improved Stackability:

Our new design enables Veritek™ Pro products to be stacked higher, creating operational efficiencies on truckload orders as well as taking up less floor space for warehouse storage.

Veritek™ Pro

Dedicated to delivering: Better Products, Better Material, and Better Packaging. Complete shower and tub solutions that ship in 17 business days.
