# Preface

This book is one from the series **New Perfect Composite Mathematics** and is based on the syllabus developed by the National Council of Educational Research and Training (NCERT), New Delhi.

The subject matter is produced in such a way that it relates to the environment and focuses on the development and understanding of the students. It also aims to improve their thinking and reasoning skills. All books in this series are activity based and are written in a simple language.

The subject matter has been presented in graded form. The age, the learning ability and the mathematical difficulties faced by the students at all levels have been kept in mind while presenting difficult concepts.

The syllabus includes the four fundamental operations, namely, addition, subtraction, multiplication and division. These operations have been dealt in a step-by-step approach to enable students understand exactly what is to be done. The traditional and stereotype questions have been avoided.

## Salient Features of this book are:

- The book covers the entire prescribed syllabus.
- Number system up to 5 digits has been explained.
- Formation of **mathematical stories** or **word problems** has been taught.
- **Standard algorithm** and **Lattice multiplication algorithm** have been introduced.
- In geometry, the concept of **symmetry** in familiar 2-D and 3-D shapes has been explained in a simple way.
- Drawing of 2-D shapes by using dot papers and geoboard has been explained.
- **Reading of simple maps** is explained in geometry.
- **Making of border strips and tiling patterns** have been explained with examples.
- **Lab Activities** have been given to make the subject interesting for the students.
- Questions in the form of **cross-numbers**, **puzzles** and **quizzes** have been included.
- Four model papers and two papers for each term have been given for practice.
- A few high level questions have been given under the head "Put on Your Thinking Cap".

The books of the series will surely prove to be useful for the students.

I would like to thank Mrs. Sunita Jai Singh and Mrs. Shuchi Goyal for their valuable suggestions which helped me in bringing the series in the present form.

Last but not the least, I am thankful to the publishers who have taken great pains in making the books reader-friendly.

Suggestions for further improvement of the series will be gratefully acknowledged.

AUTHOR

# Syllabus

## Geometry

(16 hrs.)

### SHAPES AND SPATIAL UNDERSTANDING

- Creates shapes through paper folding, paper cutting.
- Identifies 2-D shapes.
- Describes the various 2-D shapes by counting their sides, corners and diagonals.
- Makes shapes on the dot-grid using straight lines and curves.
- Creates shapes using tangram pieces.
- Matches the properties of two 2-D shapes by observing their sides and corners (vertices).
- Tiles a given region using a tile of a given shape.
- Distinguishes between shapes that tile and that do not tile.
- Intuitive idea of a map. Reads simple maps (not necessarily scaled).
- Draws some 3-D objects.

## Numbers

(42 hrs.)

### NUMBER SEQUENCE UP TO 1000

- Reads and writes 3-digit numbers.
- Expands a number w.r.t. place values.
- Counts in different ways - starting from any number.
- Compares numbers.
- Forms greatest and smallest numbers using given digits.

### ADDITION AND SUBTRACTION

- Adds and subtracts numbers by writing them vertically in the following two cases:
  - without regrouping.
  - with regrouping.
- Uses the place value in standard algorithm of addition and subtraction.
- Solves addition and subtraction problems in different situations presented through pictures and stories.
- Frames problems for addition and subtraction facts.
- Estimates the sum of, and difference between two given numbers.

### MULTIPLICATION

- Explains the meaning of multiplication (as repeated addition).
- Identifies the sign of multiplication.
- Constructs the multiplication tables of 2, 3, 4, 5 and 10.
- Uses multiplication facts in situations.
- Multiplies two digit numbers using standard algorithm and Lattice multiplication algorithm.

### DIVISION

- Explains the meaning of division from context of equal grouping and sharing.
- Relates division with multiplication.
- Completes division facts:
  - by grouping
  - by using multiplication tables.

## MENTAL ARITHMETIC

- Adds and subtracts single digit numbers and two digit numbers mentally.
- Doubles two digit numbers mentally (result not exceeding two digits).

## Money

(5 hrs.)

- Converts Rupee to Paise using play money.
- Adds and subtracts amounts using column addition, and subtraction without regrouping.
- Makes rate charts and bills.

## Measurement

(21 hrs.)

### LENGTH

- Appreciates the need for a standard unit.
- Measures length using appropriate standard units of length by choosing between centimetres and metres.
- Estimates the length of given object in standard units and verifies by measuring.
- Uses a ruler
- Relates centimetre and metre.

### WEIGHT

- Weighs objects using non-standard units.
- Appreciates the conservation of weight.

### VOLUME

- Measures and compares the capacity of different containers in terms of non-standard units.
- Appreciates the conservation of volume.

### TIME

- Reads a calendar to find a particular day and date.
- Reads the time correct to the hour.
- Sequences the events chronologically.

## Data Handling

(6 hrs.)

- Records data using tally marks.
- Collects data and represents in terms of pictograph choosing appropriate scale and unit for display through pictographs.
- Draws conclusions from the data by discussing with the teacher.

## Patterns

(6 hrs.)

- Identifies simple symmetrical shapes and patterns.
- Makes patterns and designs from straight lines and other geometrical shapes.
- Identifies patterns in the numerals for odd and even numbers and in adding odd and even numbers.
- Partitions a number in different ways.
- Identifies patterns in his surroundings.
- Identifies patterns in multiplication with, and dividing by 10s.

# Contents

Warm-Up	1
<b>1.</b> Numbers and Number Names	4
<b>2.</b> Addition	24
<b>3.</b> Subtraction	43
<i>Model Paper-1 (Chapters 1–3)</i>	60
<b>4.</b> Multiplication	61
<b>5.</b> Division	81
<b>6.</b> Fractions	100

<b>7.</b> Money	115
<b>8.</b> Measurement—Length	128
<b>9.</b> Measurement—Mass (Weight)	139
<b>10.</b> Measurement—Capacity	148
<i>Model Paper-3 (Chapters 7–10)</i>	155
<b>11.</b> Time	156
<b>12.</b> Geometry	172
<b>13.</b> Patterns	188
<b>14.</b> Data Handling	193
Put on Your Thinking Cap	200
<i>Model Paper-4 (Chapters 11–14)</i>	202
<i>Test Paper—Second-Term (Chapters 7–14)</i>	204
Answers	207

# Warm-Up

1. Skip count by 5 and fill in the missing numbers:

(a) 35            45           

(b) 102      107                 

2. Write the number names in the space provided:

(a) 908 \_\_\_\_\_

(b) 725 \_\_\_\_\_

(c) 310 \_\_\_\_\_

3. Write the place value of the coloured digit in the box:

(a) 375            (b) 107     

(c) 559            (d) 728     

4. Which is greater?

(a) 457 or 547            (b) 819 or 198     

(c) 792 or 927            (d) 601 or 610     

5. Fill in the missing numbers:

(a)  $101 + \text{} = 201$       (b)  $52 + \text{} + 75 = 130$

(c)  $69 + \text{} + 41 = 120$       (d)  $220 + \text{} = 720$

6. A car is moving. Add the distance travelled and show on the metre scale:

7. Write in expanded form:

(a)  $728 = \underline{\quad} + \underline{\quad} + \underline{\quad}$

(b)  $304 = \underline{\quad} + \underline{\quad}$

(c)  $560 = \underline{\quad} + \underline{\quad}$

(d)  $339 = \underline{\quad} + \underline{\quad} + \underline{\quad}$

8. A fruit seller bought 90 kg apples and sold only 52 kg of them. How much apples he could not sell?

9. In the hall, there were 241 children. 48 more children came in and then 75 left. How many children are there now?

10. Multiply and fill in the placeholders:

(a)  $3 \times 2$  

(b)  $4 \times 7$  

(c)  $5 \times 5$  

(d)  $6 \times 8$  

11. Draw beads on the abacus to show the number indicated:

405

870

999

323

12. Read the time in the clock and write in the box:

 o'clock

 o'clock

 o'clock

13. Fix the missing hands according to the given time:

6 o'clock

3 o'clock

5 o'clock

14. Ronit got ₹ 85 from his father and ₹ 39 from his mother. How much money altogether did he get?

15. A man had 385 L milk. He sold out 334 L milk. How much milk he still has to sell?

16. Fill in the blanks:

(a) June has \_\_\_\_ days.

(b) Republic day comes in the month of \_\_\_\_\_ .

(c) December has \_\_\_\_\_ days.

(d) \_\_\_\_\_ months make a year.

(e) \_\_\_\_\_ lies between January and March.

(f) \_\_\_\_\_ comes after October.

(g) Today is Monday. Yesterday was \_\_\_\_\_ .

(h) \_\_\_\_\_ comes after Wednesday.

17. Select the suitable answer from the given options:

(a) During which season do we wear woollen clothes?

(i) Summer                      (ii) Winter                      (iii) Rainy

(b) During which season cold drinks are preferred?

(i) Summer                      (ii) Winter                      (iii) Rainy

(c) What do we use during rainy season?

(i) Room heaters                      (ii) Umbrellas                      (iii) Sun glasses

# Numbers and Number Names

In standard II, we have learnt numbers up to 1000. 1000 can be obtained by adding 1 to 999 in the following way:

$$\begin{aligned} 999 + 1 &= 9 \text{ hundreds} + 9 \text{ tens} + 9 \text{ ones} + 1 \text{ one} \\ &= 9 \text{ hundreds} + 9 \text{ tens} + 10 \text{ ones} \\ &= 9 \text{ hundreds} + 9 \text{ tens} + 1 \text{ ten} \\ &= 9 \text{ hundreds} + 10 \text{ tens} \\ &= 9 \text{ hundreds} + 1 \text{ hundred} \\ &= 10 \text{ hundreds} = 1 \text{ thousand} = 1000 \end{aligned}$$

1000 is the smallest number of four digits.

We read 1000 as "one thousand".

1001 stands for 1 thousand, 0 hundreds, 0 tens and 1 one. It is read as "one thousand one."

1010 stands for 1 thousand, 0 hundreds, 1 ten and 0 ones. It is read as "one thousand ten."

1100 stands for 1 thousand, 1 hundred, 0 tens and 0 ones. It is read as "one thousand one hundred."

2000 stands for 2 thousands, 0 hundreds, 0 tens and 0 ones. It is read as "two thousand."

Similarly,

4000 is read as "four thousand."

5000 is read as "five thousand."

6000 is read as "six thousand."

7000 is read as "seven thousand."

8000 is read as "eight thousand."

9000 is read as "nine thousand."

9999 is read as "nine thousand nine hundred ninety nine."

9999 is the greatest number of 4 digits.

9999 + 1 = 10000 is the smallest number of 5 digits.

## FOUR DIGIT NUMBERS ON ABACUS

We use four spikes to represent a four digit number on abacus. Starting from right, the number of beads in a spike represents number of ones, tens, hundreds and thousands.

For example, the abacus shown here represents the number 2431.

We have 2 thousands, 4 hundreds, 3 tens and 1 one. We read it like, "two thousand four hundred thirty one".

## PLACE VALUE CHART

Let us take the same numeral 2431. It can be written in a place value chart as shown below:

Th	H	T	O
2	4	3	1

**Example 1.** Show the numeral 5033 on abacus and write its name. Write the number on place value chart also.

**Solution.** The numeral on abacus is 5033.  
We read it as "five thousand thirty three".

Place value chart

Th	H	T	O
5	0	3	3

### Exercise 1.1

I. Read the abacus and write the numeral and its number name.

(a)

(b)

(c)

2. Show the given numeral on the abacus and make its place value chart:

(a) 5932

(b) 2069

(c) 3330

(d) 2222

(e) 4835

(f) 1531

3. Fill in the placeholders:

	Th	H	T	O
2851 =	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
3593 =	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
2090 =	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
1535 =	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
6666 =	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>
8581 =	<input type="text"/>	<input type="text"/>	<input type="text"/>	<input type="text"/>

## NUMBERS IN WORDS (NUMBER NAMES)

Consider the following numbers:

(a) 3592 (b) 2067 (c) 5104

We can see that:

- (a) 3592 has 3 thousands, 5 hundreds, 9 tens and 2 ones.  
We name it as “three thousand five hundred ninety two”.
- (b) 2067 has 2 thousands, 0 hundreds, 6 tens and 7 ones.  
We name it as “two thousand sixty seven.”
- (c) 5104 has 5 thousands, 1 hundred, 0 tens and 4 ones.  
We name it as “five thousand one hundred four.”

## NUMBERS IN FIGURES

Consider the following number names:

- (a) Two thousand five hundred sixteen.
- (b) Five thousand sixty two.
- (c) Nine thousand two hundred five.

We can write the above numbers as:

	Thousands	Hundreds	Tens	Ones
(a)	2	5	1	6
(b)	5	0	6	2
(c)	9	2	0	5

Hence the numbers in figures are:

- (a) 2516 (b) 5062 (c) 9205

### Exercise 1.2

I. Write the number names of the following numbers:

- (a) 3792 .....
- (b) 7056 .....
- (c) 9005 .....
- (d) 8760 .....
- (e) 3806 .....

2. Write the following numbers in figures:
- Three thousand four hundred fifty seven
  - Seven thousand three hundred six
  - Nine thousand ninety six
  - One thousand eight hundred thirty
  - Seven thousand seven hundred
  - One thousand nineteen

3. Rewrite the following numbers by interchanging the digits at the thousands and tens places:

*Example: 5621 → 2651*

- (a) 7392  (b) 4087  (c) 3190

4. Rewrite the following numbers by using the digits in the reverse order:

*Example: 2395 → 5932*

- (a) 8751  (b) 3506  (c) 4026

## EXPANDED FORM

Using place value chart, we can write a number in its expanded form.

For example, let us take the number 7541, its place value chart is

Th	H	T	O
7	5	4	1

i.e., 7 thousands, 5 hundreds, 4 tens, and 1 one. Therefore, its expanded form is

$$7000 + 500 + 40 + 1$$

*Example 1.* Write in the expanded form: (a) 8536 (b) 3406

*Solution.* (a) 8536 has 8 thousands, 5 hundreds, 3 tens and 6 ones.

$$\therefore 8536 = 8000 + 500 + 30 + 6 \quad (\therefore \text{stands for therefore})$$

(b) 3406 has 3 thousands, 4 hundreds, 0 tens and 6 ones.

$$\therefore 3406 = 3000 + 400 + 6$$

**Example 2.** Write the following numbers in short form:

(a)  $3000 + 800 + 50 + 6$       (b)  $4000 + 30 + 9$

**Solution.** (a)  $3000 + 800 + 50 + 6$  stands for 3 thousands, 8 hundreds, 5 tens and 6 ones, i.e., 3856.

$\therefore 3000 + 800 + 50 + 6 = 3856$

(b)  $4000 + 30 + 9$  stands for 4 thousands, 0 hundreds, 3 tens and 9 ones, i.e., 4039.

$\therefore 4000 + 30 + 9 = 4039$

### Exercise 1.3

1. Fill in the missing digits. The first one is done for you.

(a)  $3516 = 3$  thousands  $5$  hundreds  $1$  ten  $6$  ones

(b)  $5302 =$       thousands      hundreds      tens      ones

(c)  $4059 =$       thousands      hundreds      tens      ones

(d)  $8080 =$       thousands      hundreds      tens      ones

(e)  $7634 =$       thousands      hundreds      tens      ones

2. Write the following numbers in the expanded form:

(a)  $2937 =$  ..... + ..... + ..... + .....

(b)  $8019 =$  ..... + ..... + .....      (c)  $9270 =$  ..... + ..... + .....

(d)  $9700 =$  ..... + .....      (e)  $4807 =$  ..... + ..... + .....

(f)  $6003 =$  ..... + .....

3. Write the following numbers in the short form:

(a)  $3000 + 200 + 80 + 9$  .....

(b)  $7000 + 0 + 80 + 1$  .....

(c)  $2000 + 500 + 9$  .....

(d)  $5000 + 700 + 50$  .....

(e)  $8000 + 20 + 5$  .....

## PLACE VALUE – FACE VALUE OF A DIGIT

Let us take the number 72.

$$\begin{aligned} 72 &= 7 \text{ tens} + 2 \text{ ones} \\ &= 70 + 2 \end{aligned}$$

In 72, 7 is at the tens place.

The place value of 7 is **70**

The face value of 7 is **7**

The digit 2 is at the ones place.

The place value of 2 is **2**

The face value of 2 is **2**

Now let us take a three digit number 468.

$$\begin{aligned} 468 &= 4 \text{ hundreds} + 6 \text{ tens} + 8 \text{ ones} \\ &= 400 + 60 + 8 \end{aligned}$$

In 468, the digit 4 is at the hundreds place.

The place value of 4 is **400**

The face value of 4 is **4**

The digit 6 is at the tens place.

The place value of 6 is **60**

The face value of 6 is **6**

The digit 8 is at the ones place.

The place value of 8 is **8**

The face value of 8 is **8**

Lastly, take a four digit number 5359.

$$\begin{aligned} 5359 &= 5 \text{ thousands} + 3 \text{ hundreds} + 5 \text{ tens} + 9 \text{ ones} \\ &= 5000 + 300 + 50 + 9 \end{aligned}$$

In 5359, 5 is at the thousands place.

The place value of 5 is **5000**

The face value of 5 is **5**

The digit 3 is at the hundreds place.

The place value of 3 is **300**

The face value of 3 is **3**

The digit 5 is at the tens place.

The place value of 5 is **50**

The face value of 5 is **5**

The digit 9 is at the ones place.

The place value of 9 is **9**

The face value of 9 is **9**

Hey!  
A number can  
have different  
place values.

From the above discussion, we note that:

The place value of a digit changes according to the place it occupies in the number, but the face value remains unchanged and is the value of the digit itself.

**Example 1.** Find the place value of each digit in 3906.

**Solution.**

Number	Place value
3 9 0 6	
6	6 ones
0	0 tens
9	9 hundreds
3	3 thousands

**Note:** Place value of 0 is always zero.

**Example 2.** Find the place values of two fours in 8414.

**Solution.**

8	4	1	4
	↓	↓	↓
	4	0	0
Place value of 4 = 400.			
8	4	1	4
			↓
			4
Place value of 4 = 4			

**Example 3.** Write the face value of 4 in the numbers 346, 4593 and 3214.

**Solution.** In 346, the face value of 4 is 4.

In 4593, the face value of 4 is 4.

In 3214, the face value of 4 is 4.

### Exercise 1.4

1. Arrange the numerals in the place value table:

	Thousands	Hundreds	Tens	Ones
567	.....	.....	.....	.....
6409	.....	.....	.....	.....
7013	.....	.....	.....	.....
9820	.....	.....	.....	.....

2. Write the place value in the box of each red coloured digit in the following numbers:

4	<input type="text"/>	1 8 9	<input type="text"/>	3 0 6	<input type="text"/>
5 2 8	<input type="text"/>	2 3 9	<input type="text"/>	6 2 7 9	<input type="text"/>
5 4 7 1	<input type="text"/>	6 0 9 4	<input type="text"/>	3 7 5 6	<input type="text"/>

3. Write the place value of the digit 6 in the box:

361	<input type="text"/>	206	<input type="text"/>	631	<input type="text"/>
2695	<input type="text"/>	6320	<input type="text"/>	3600	<input type="text"/>

4. Write the place values of 8's in 8483.

5. Find the difference of the place values of two sevens in 6577.

6. Tick Reena's  number. It has 2 hundreds, 3 tens, 5 thousands and 6 ones.

2356  3265  5236  5326 

7. Encircle Rahul's  number. It has 8 tens, 4 thousands and 2 ones.

842 482 4028 4082

8. Which of the following statements are correct?

- (a) The place value of 3 in 4316 is 316.  
 (b) The place value of 0 in 6801 is 10.  
 (c) The place value of 4 in 4325 is 4000.

9. Solve the number puzzle by writing numbers:

**Across** →

1. 2 hundreds 7 tens 9 ones  
 3. 4 hundreds 8 tens 6 ones  
 5. 5 thousands 7 hundreds 8 tens  
 7. Three thousand three hundred thirty three  
 8. Nine thousand fifty five  
 9. 6 hundreds 2 tens 6 ones  
 11. 6 hundreds + seventy eight  
 13. 5 thousands 3 hundreds 9 tens  
 15. Eight thousand one hundred twenty six  
 16. 50 more than 140  
 17. 2 thousands 5 hundreds 5 tens

1		2			3		4
		5	6				
		7					
8					9	10	
11		12		13	14		
15					16		
		17					

**Down** ↓

1. Two thousand nine hundred fifty nine  
 2. 9 thousands 5 hundreds 3 tens 5 ones  
 3. 4 thousands 0 hundreds 3 tens 6 ones

4. Six thousand three hundred ninety six
6. 7 thousands 3 hundreds 5 tens 4 ones
10. 2 thousands 5 hundreds 9 tens 9 ones
11. 20 more than 665
12. 100 less than 922
14. Three hundred ten

## SUCCESSOR OF A NUMBER

The number which comes just after a given number is called its **successor**.

For example, 26 is successor of 25.

It means when we add 1 to a number, we get its successor as  $25 + 1 = 26$ .

Similarly, successor of 2569 is 2570.

## PREDECESSOR OF A NUMBER

The number which comes just before a given number is called its **predecessor**.

For example, 49 is the predecessor of 50.

It means when we subtract 1 from a given number, we get its predecessor as

$$50 - 1 = 49$$

## CONSECUTIVE NUMBERS

In a given pattern, any pair of numbers written adjacent to each other are called **consecutive numbers**.

For example, in the pattern 203, 206, 209, 212, 215

Consecutive numbers are (203, 206), (206, 209), (209, 212) and (212, 215).

## SKIP COUNTING

When we write some numbers with a fixed gap between every two consecutive numbers, then this pattern of numbers is called **skip counting**.

For example,

skip counting by 2	—	12, 14, 16, 18, 20, 22
skip counting by 5	—	15, 20, 25, 30, 35
skip counting by 10	—	215, 225, 235, 245, 255
skip counting by 1000	—	5203, 6203, 7203, 8203

## Exercise 1.5

1. Write all numbers lying between:

(a) 1000 and 1004

(b) 2231 and 2235

(c) 6659 and 6663

2. Write the successor of each of the following numbers:

(a) 4530

(b) 8346

(c) 8152

3. Write the predecessor of each of the following numbers:

(a) 5637

(b) 8910

(c) 9810

4. For each of the following write the next three numbers:

(a) 7786

(b) 6999

5. Counting by twos, write numbers starting from:

(a) 7786

(b) 4003

6. Counting by fives, write numbers starting from:

(a) 3505

(b) 7913

7. Counting by tens, write numbers starting from:

(a) 5210

(b) 9318

8. Counting by hundreds, write numbers starting from:

(a) 4358

(b) 7019

9. Counting by thousands, write numbers starting from:

(a) 4307

(b) 3718

10. Look at the pattern and write next three numbers:

(a) 2513, 2516, 2519

(b) 8307, 7307, 6307

11. Write the greatest number of of:

(a) 2 digits

(b) 3 digits

(c) 4 digits

12. Write the smallest number of of:

(a) 2 digits

(b) 3 digits

(c) 4 digits

## COMPARISON OF NUMBERS

We have already learnt to find the greater of the two 3-digit numbers. Here we shall learn to find the greater of the two 4-digit numbers.

We have learnt that "8 is greater than 4" and it is written as  $8 > 4$ .

We also know that "3 is less than 9" and we write it as  $3 < 9$ .

Also, 8 is greater than 4 is the same as 4 is less than 8.

$\therefore$  In symbols,  $8 > 4$  is the same as  $4 < 8$ .

In our previous class, we have learnt that:

(a) A number having more digits is greater than the number having less digits.

For example,  $16 > 9$ ;  $325 > 87$ ;  $201 > 99$ .

- (b) If the two given numbers have the same number of digits, then
- we compare the digits on the extreme left and decide;
  - if the digits on the extreme left are equal, we keep on comparing the next digits on the right.

For example,  $83 > 79$ ;  $423 > 180$ ;  $689 > 629$ ;  $725 > 721$ .

Now, by using these rules, we solve a few examples.

**Example 1.** Which is smaller: (a) 389 or 1201 (b) 4876 or 8751?

**Solution.** (a) 389 has three digits.

1201 has four digits.

Three digit number is smaller than four digit number.

$\therefore 389 < 1201$ .

(b) Each number has 4 digits. We compare the digits at the thousand's places.

The digit on the extreme left of 4876 is 4.

The digit on the extreme left of 8751 is 8.

We know that  $4 < 8$ .

$\therefore 4876 < 8751$ .

Think and answer

Th	H	T	O
4	8	7	6
8	7	5	1

**Example 2.** Which is greater: 5384 or 5297?

**Solution.** 5384 has 5 thousands.

5297 has 5 thousands.

Since the number of thousands in both the numbers is same, so we compare the digits at the hundred's places.

5384 has 3 hundreds.

5297 has 2 hundreds.

Since 3 hundreds are more than 2 hundreds,

$\therefore 5384$  is greater than  $5297$

or  $5384 > 5297$ .

Th	H	T	O
5	3	8	4
5	2	9	7

I am thinking...

**Example 3.** Which is smaller: 9836 or 9840?

**Solution.** 9836 has 9 thousands and 8 hundreds.

9840 also has 9 thousands and 8 hundreds.

Since both the numbers have same number of thousands and hundreds, so we compare the digits at the ten's places.

9836 has 3 tens and 9840 has 4 tens.

Since 3 tens are less than 4 tens,

$\therefore$  9836 is less than 9840

or  $9836 < 9840$ .

Th	H	T	O
9	8	3	6
9	8	4	0

### Exercise 1.6

Put  $>$  or  $<$  or  $=$  in the space provided to make the given sentences true:

- 4890  521
- 768  789
- 423  441
- 8821  6557
- 7201  9209
- 2539  2327
- 8034  8289
- 5669  5686
- 1889  1886
- $999 + 1$   1000
- 2009  Two thousand and ninety.
- 3018   $3000 + 10 + 8$ .
- 3206  Three thousand twenty six.
- 8029  Eight thousand twenty nine.
- The population of two villages A and B is 8506 and 8985 respectively. Which village has more population?
- A village has 3591 males and 3089 females. Who are less in number, males or females?

## ASCENDING OR DESCENDING ORDER

Ascending order means “from smaller to greater.”

Descending order means “from greater to smaller.”

**Example 1.** Write the following numbers in ascending (increasing) order:

7540, 989, 4354, 67.

**Solution.** Here the smallest number is 67. The next number greater than 67 is 989. The other numbers greater than 67 in order are 4354 and 7540.

∴ The given numbers, when written in ascending order are:

67, 989, 4354, 7540.

You can check by making place value chart.

**Example 2.** Write the following numbers in descending (decreasing) order:

737, 8301, 786, 1256, 8309.

**Solution.** Here the greatest number is 8309. The next number smaller than 8309 is 8301. The other numbers smaller than 8309 in order are 1256, 786 and 737.

∴ The given numbers when written in descending order are:

8309, 8301, 1256, 786, 737

## FORMATION OF SMALLEST AND GREATEST NUMBERS

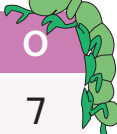

Suppose we are given three digits 3, 7 and 4. We want to form smallest number of 3 digits, using all the given digits without repetition. First we select the smallest digit and write it in the hundred's place. Then we write the next greater digit in the ten's place and lastly, the greatest digit in the one's place.

∴ The smallest number is 347.

If we want to form the greatest number of 3 digits, using all the given digits without repetition, first we select the greatest digit and write it in the hundred's place. Then we write the next smaller digit in the ten's place and lastly, the smallest digit in the one's place.

∴ The greatest number is 743.

H	T	O
3	4	7

H	T	O
7	4	3

Let us now take four digits 3, 0, 5, 7 and form smallest and the greatest numbers of 4 digits using all the given digits only once.

Applying the same rule, Neelima and Manjit formed smallest 4-digit numbers as given under:

I am Neelima.

Th	H	T	O
3	0	5	7

I am Manjit.

Th	H	T	O
0	3	5	7

Caution!  
Smallest 4-digit number is 1000 and not 0001.

But 0 on the extreme left place has no meaning, so the correct 4-digit smallest number was formed by Neelima.

Thus the smallest number of given 4 digits is 3057.

Applying the rule explained in the previous example for the greatest number of 3 digits, the greatest number of 4 digits in this case is 7530.

**Notes:** 1. 0 is not written on the extreme left place of a number.  
2. 0357 is a 3-digit number 357.

**Example 3.** Write the greatest and smallest 2-digit numbers using 3, 5 only once.

**Solution.** For greater number, write the greater of 3 and 5 under tens column and the other digit under ones column.

T	O
5	3

∴ Greater number = 53  
Similarly, smaller number = 35

T	O
3	5

**Example 4.** Write the smallest and the greatest numbers using 8, 0, 5 (without repeating a digit).

(a) 2 digits                      (b) 3 digits

**Solution.** (a) 2-digit smallest number = 50  
                  2-digit greatest number = 85  
  
(b) 3-digit smallest number = 508  
                  3-digit greatest number = 850

**Example 5.** Write the smallest and the greatest 4-digit numbers by changing positions of the digits, if need arises, in the following numbers:

- (a) 3856                      (b) 5029

**Solution.** (a) Smallest number = 3568                      Greatest number = 8653  
 (b) Smallest number = 2059                      Greatest number = 9520

 **Exercise 1.7**

1. In each of the following, encircle the greatest number:

- (a) 586,                      209,                      834  
 (b) 603,                      599,                      573,                      537  
 (c) 525,                      5205,                      5025,                      5250

2. In each of the following, encircle the smallest number:

- (a) 356,                      906,                      305  
 (b) 923,                      933,                      801,                      810  
 (c) 5550,                      5055,                      4031,                      3140

3. Rewrite the following numbers in ascending (increasing) order:

- (a) 1234, 1046, 2986, 756 .....  
 (b) 9856, 98, 991, 7603 .....  
 (c) 7707, 7007, 777, 7770 .....

4. Rewrite the following numbers in descending (decreasing) order:

- (a) 186, 923, 9230, 8251 .....  
 (b) 4321, 2341, 4121, 3241 .....  
 (c) 766, 5431, 2466, 7789 .....

5. Write whether the following numbers are arranged in descending or ascending order:

- (a) 56, 566, 5660, 7637, 7673, 7773 .....  
 (b) 9836, 9810, 5638, 3731, 1065, 785 .....  
 (c) 9856, 9800, 8637, 8037, 7865, 7856 .....

6. Write the smallest and the greatest numbers of 2-digits using 7 and 1 only once.

7. Write the smallest and the greatest numbers of 3-digits (using each digit only once):

(a) 3, 1, 2

(b) 6, 0, 8

8. Write any four 4-digit numbers using all the digits 3, 4, 1, 2 and then arrange them in descending order.

9. Write the smallest and the greatest 2-digit numbers (without repeating a digit) from the following digits:

**Smallest**

**Greatest**

(a) 3, 6, 5

.....

.....

(b) 2, 0, 7

.....

.....

10. Write the smallest and the greatest 3-digit numbers by changing the positions of the digits, if need arises, in the following numbers:

**Smallest**

**Greatest**

(a) 439

.....

.....

(b) 805

.....

.....

11. Write the smallest and the greatest 4-digit numbers by changing the positions of the digits, if need arises, in the following numbers:

**Smallest**

**Greatest**

(a) 7615

.....

.....

(b) 3508

.....

.....

# Chapter Test

Time: 30 minutes

M.M. 10

Note: Each question is of 2 marks.

1. Find the mystery number which has  
 5 in hundreds place,        4 in thousands place  
 7 in ones place,         2 in tens place

The mystery number is .....

2. Write the number:

- (a) Five thousand three hundred four .....
- (b) Nine thousand fifty six .....

3. You are given here number coins.

Rearrange them to make the largest and smallest numbers.

Largest number ..... Smallest number .....

4. Write the number names for the following:

- (a) 789 .....
- (b) 5172 .....
- (c) 9044 .....
- (d) 6105 .....

5. Encircle the correct answer from the given options:

(a) The smallest number of 4 digits is

- (i) 0001    (ii) 0100  
 (iii) 0010                                        (iv) 1000

(b) The expanded form of 2037 is

- (i)  $20000 + 30 + 7$                           (ii)  $2000 + 30 + 7$   
 (iii)  $200 + 30 + 7$                             (iv)  $2000 + 300 + 7$

Space for rough work

# Addition

In standard two, we have learnt the addition of 2-digit numbers without and with regrouping. We have also learnt the addition of 3-digit numbers without regrouping. In this class we shall first recapitulate and then learn the addition of 3-digit numbers with regrouping and addition of 4-digit numbers without regrouping.

The result obtained after addition is called the **Sum**.

## ADDITION WITHOUT REGROUPING

### (a) Column addition of 3-digit numbers (without regrouping)

*Example 1.* Add: 324 and 452. Write the number sentence.

*Solution.* Putting numbers in the column form:

H	T	O
3	2	4
+ 4	5	2
6		

Adding **ones**:  
 $4 + 2 = 6$

H	T	O
3	2	4
+ 4	5	2
7		6

Adding **tens**:  
 $2 + 5 = 7$

H	T	O
3	2	4
+ 4	5	2
7	7	6

Adding **hundreds**:  
 $3 + 4 = 7$

Number sentence:  $324 + 452 = 776$

### (b) Column addition of 4-digit numbers (without regrouping)

We have recapitulated the addition of 3-digit numbers. Now, we apply the same rule to add 4-digit numbers.

*Example 2.* Add together: 1063, 6705 and 120. Write the sum in words.

Solution.

Th	H	T	O
1	0	6	3
+ 6	7	0	5
+	1	2	0
7	8	8	8

Add ones to ones,  
tens to tens,  
hundreds to hundreds  
and thousands to  
thousands.

Sum: Seven thousand eight hundred eighty eight

## Exercise 2.1

Add together:

$$\begin{array}{r} \text{H} \quad \text{T} \quad \text{O} \\ 1. \quad 1 \quad 2 \quad 3 \\ + 4 \quad 5 \quad 4 \\ \hline \end{array}$$

$$\begin{array}{r} \text{H} \quad \text{T} \quad \text{O} \\ 2. \quad 2 \quad 0 \quad 5 \\ + 6 \quad 8 \quad 4 \\ \hline \end{array}$$

$$\begin{array}{r} \text{H} \quad \text{T} \quad \text{O} \\ 3. \quad 4 \quad 6 \quad 0 \\ + 2 \quad 3 \quad 7 \\ \hline \end{array}$$

$$\begin{array}{r} \text{Th} \quad \text{H} \quad \text{T} \quad \text{O} \\ 4. \quad 3 \quad 4 \quad 2 \quad 6 \\ + 2 \quad 3 \quad 7 \quad 2 \\ \hline \end{array}$$

$$\begin{array}{r} \text{Th} \quad \text{H} \quad \text{T} \quad \text{O} \\ 5. \quad 3 \quad 5 \quad 4 \quad 8 \\ + 6 \quad 1 \quad 4 \quad 0 \\ \hline \end{array}$$

$$\begin{array}{r} \text{Th} \quad \text{H} \quad \text{T} \quad \text{O} \\ 6. \quad 5 \quad 0 \quad 3 \quad 6 \\ + 4 \quad 7 \quad 2 \quad 1 \\ \hline \end{array}$$

$$\begin{array}{r} 7. \quad 3 \quad 4 \quad 0 \quad 6 \\ + 5 \quad 4 \quad 9 \quad 2 \\ \hline \end{array}$$

$$\begin{array}{r} 8. \quad 2 \quad 0 \quad 3 \quad 5 \\ + 1 \quad 6 \quad 0 \quad 2 \\ \hline \end{array}$$

$$\begin{array}{r} 9. \quad 3 \quad 4 \quad 1 \quad 5 \\ + 2 \quad 3 \quad 0 \quad 1 \\ \hline \end{array}$$

$$\begin{array}{r} 10. \quad 6 \quad 0 \quad 4 \quad 6 \\ + 3 \quad 4 \quad 5 \quad 0 \\ \hline \end{array}$$

$$\begin{array}{r} 11. \quad 6 \quad 8 \quad 5 \quad 3 \\ + 2 \quad 0 \quad 4 \quad 5 \\ \hline \end{array}$$

$$\begin{array}{r} 12. \quad 4 \quad 3 \quad 2 \quad 0 \\ + 2 \quad 2 \quad 6 \quad 7 \\ \hline \end{array}$$

$$\begin{array}{r} 13. \quad 7 \quad 4 \quad 3 \quad 2 \\ + 1 \quad 3 \quad 5 \quad 0 \\ \hline \end{array}$$

$$\begin{array}{r} 14. \quad 5 \quad 6 \quad 2 \quad 3 \\ + 4 \quad 1 \quad 6 \quad 5 \\ \hline \end{array}$$

$$\begin{array}{r} 15. \quad 1 \quad 5 \quad 6 \quad 1 \\ + 8 \quad 3 \quad 2 \quad 6 \\ \hline \end{array}$$

Th	H	T	O	
16.	4	2	7	4
	+		2	5
	+ 2	6	0	0

Th	H	T	O	
17.	5	6	1	4
	+	1	7	3
	+ 3	2	0	2

Th	H	T	O	
18.	2	3	0	5
	+ 4	0	8	2
	+ 4	0	0	1

19. Write in columns and add. Write the sum in words.

(a)  $2612 + 3104 + 2061$

(b)  $8302 + 261 + 316$

(c)  $4033 + 1506 + 240$

(d)  $7114 + 2021 + 463$

### ADDITION WITH REGROUPING (CARRY OVER)

When sum of the digits at ones, tens or at hundreds place is more than 9, we carry ones to tens, tens to hundreds and hundreds to thousands place.

Let us understand this with an example.

*Example 1.* Add 437 and 296. Write the number sentence also.

*Solution.*

H	T	O	
4	3	7	
+	2	9	6
3			

Add **ones**

$$7 + 6 = 13$$

$$13 \text{ ones} =$$

$$1 \text{ ten} + 3 \text{ ones}$$

H	T	O	
4	3	7	
+	2	9	6
3		3	

Add **tens**

$$1 + 3 + 9 = 13$$

$$13 \text{ tens} =$$

$$1 \text{ hundred} + 3 \text{ tens}$$

H	T	O	
4	3	7	
+	2	9	6
7	3	3	

Add **hundreds**

$$1 + 4 + 2 = 7$$

Number sentence:  $437 + 296 = 733$

In short, we put it as under:

	H	T	O
	4	3	7
+	2	9	6
	7	3	3

Regroup and add.

Number sentence:  $437 + 296 = 733$

## Lab Activity

We can verify that  $437 + 296 = 733$  in mathematics lab as follows:

Take some green, red and blue beads. Let 1 green, 1 red and 1 blue bead represent 1 one, 1 ten and 1 hundred respectively. We know that

10 ones = 1 ten and 10 tens = 1 hundred

∴ 10 green beads = 1 red bead and  
10 red beads = 1 blue bead

Take an abacus. To show the number 437 on it, fix 7 green beads in ones stick, 3 red beads in tens stick and 4 blue beads in hundreds stick.

To add 296 to 437, fix 6 more green beads to ones stick, 9 more red beads to tens stick and 2 more blue beads to hundreds stick.

Now count the number of green beads in ones stick. It has  $7 + 6$  or 13 green beads.

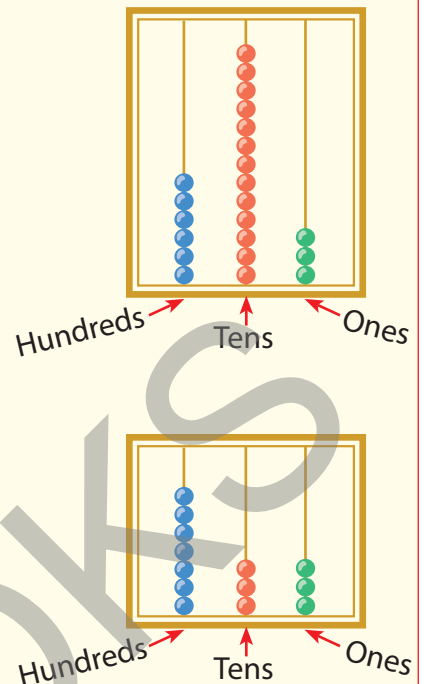

Remove 10 green beads and instead add 1 red bead to tens stick as 10 green beads represent 1 red bead.

Again, count the number of red beads in tens stick. It has 1 + 9 + 3 or 13 red beads.

Remove 10 red beads from tens stick and instead add 1 blue bead to hundreds stick as 10 red beads represent 1 blue bead.

Lastly count the number of blue beads in hundreds stick. We have 1 + 2 + 4 or 7 blue beads. The number represented by the last abacus is 733.

$$\therefore 437 + 296 = 733$$

**Example 2.** Add 4272 and 1859. Write the sum in words.

**Solution.**

**Step 1.**

	Th	H	T	O
	4	2	7	2
+	1	8	5	9

$$2 + 9 = 11$$

11 ones = 1 ten + 1 one

Add ones and regroup.

**Step 2.**

	Th	H	T	O
	4	2	7	2
+	1	8	5	9
			3	1

$$1 + 7 + 5 = 13$$

13 tens = 1 hundred + 3 tens

Add tens and regroup.

Step 3.

	Th	H	T	O
	4	2	7	2
+		8	5	9
			3	

Add hundreds and regroup.

$$1 + 2 + 8 = 11$$

11 hundreds = 1 thousand + 1 hundred

Step 4.

	Th	H	T	O
	4	2	7	2
+		8	5	9
	6		3	

Add thousands

$$1 + 4 + 1 = 6 \text{ thousands}$$

Sum = Six thousand one hundred thirty one

## Exercise 2.2

Add:

1.

7 8 3
+ 1 9 8

2.

1 6 8
+ 2 7 4

3.

4 9 6
+ 3 8 5

4.

5 7 8
+ 2 8 7

5.

7 8 6
+ 2 5 8

6.

5 8 3
+ 1 2 8

7.

+ 4 3 1 9

22.

7 0 8 4
+ 5 9 4 6

23.

6 9 5 5
+ 7 1 0 5

24.

3 9 7 2
+ 8 4 7 0

**Add and write the sum in words:**

25.  $312 + 489$

26.  $8075 + 2946$

27.  $4878 + 7464$

## Addition of three numbers (3-digit)

**Example 1.** Add: 182, 273 and 48.

**Solution.** Putting numbers in columns and adding:

	H	T	O
	2	1	←carried
	1	8	2
+	2	7	3
+		4	8
	5	0	3

### Exercise 2.3

**Find the sum:**

1. 

2 3 8
+ 3 4 7
+ 1 6 4

2. 

4 2 6
+ 2 6 8
+ 1 3 7

3. 

3 8 6
+ 2 4 8
+ 2 4 2

4. 

2 8 5
+ 3 0 9
+ 1 7 6

**Find the sum:**

5.  $479 + 212 + 163$

6.  $228 + 362 + 109$

7.  $324 + 209 + 93$

## PROPERTIES OF ADDITION

### Order property

Add:

$$\begin{array}{r} 14 \\ + 39 \\ \hline \end{array}$$

$$\begin{array}{r} 39 \\ + 14 \\ \hline \end{array}$$

Is the sum in both the cases same? .....

$$\begin{array}{r} 48 \\ + 32 \\ \hline \end{array}$$

$$\begin{array}{r} 32 \\ + 48 \\ \hline \end{array}$$

Is the sum in both the cases same? .....

$$\begin{array}{r} 25 \\ + 38 \\ \hline \end{array}$$

$$\begin{array}{r} 38 \\ + 25 \\ \hline \end{array}$$

Is the sum in both the cases same? .....

$$\begin{array}{r} 57 \\ + 89 \\ \hline \end{array}$$

$$\begin{array}{r} 89 \\ + 57 \\ \hline \end{array}$$

Is the sum in both the cases the same? .....

$$\begin{array}{r} 378 \\ + 439 \\ \hline \end{array}$$

$$\begin{array}{r} 439 \\ + 378 \\ \hline \end{array}$$

Is the sum in both the cases same? .....

$$\begin{array}{r} 715 \\ + 199 \\ \hline \end{array}$$

$$\begin{array}{r} 199 \\ + 715 \\ \hline \end{array}$$

Is the sum in both the cases same? .....

We notice that:

**The sum of two numbers is the same when we change the order of the numbers.**

### Grouping Property:

Add 26, 95 and 37.

$$(26 + 95) + 37$$

$$= 121 + 37$$

$$= 158$$

$$26 + (95 + 37)$$

$$= 26 + 132$$

$$= 158$$

Is the sum in both the cases same? .....

Add and fill in the blanks:

$$\begin{aligned} \text{(a) } (535 + 712) + 123 \\ = \dots\dots\dots + 123 \\ = \dots\dots\dots \end{aligned}$$

$$\begin{aligned} 535 + (712 + 123) \\ = 535 + \dots\dots\dots \\ = \dots\dots\dots \end{aligned}$$

Is the sum in both the cases same? .....

$$\begin{aligned} \text{(b) } 843 + (935 + 412) \\ = 843 + \dots\dots\dots \\ = \dots\dots\dots \end{aligned}$$

$$\begin{aligned} (843 + 935) + 412 \\ = \dots\dots\dots + 412 \\ = \dots\dots\dots \end{aligned}$$

Is the sum in both the cases same? .....

What do we notice? We notice that:

**The sum of three numbers is the same when we change the groupings of the numbers.**

### Addition Property of Zero

Add:	$\begin{array}{r} 485 \\ + 0 \\ \hline 485 \end{array}$	$\begin{array}{r} 0 \\ + 321 \\ \hline 321 \end{array}$	$\begin{array}{r} 980 \\ + 0 \\ \hline 980 \end{array}$	$\begin{array}{r} 604 \\ + 0 \\ \hline 604 \end{array}$
------	---	---	---	---

Add and fill in the blanks:

$439 + 0 = \dots\dots\dots$

$0 + 89 = \dots\dots\dots$

What do we notice? We notice that:

**When zero is added to a number or a number is added to zero, the sum is the number itself.**

### Exercise 2.4

**Without adding, fill in the blanks:**

1.  $251 + 408 = 408 + \dots\dots\dots$

2.  $831 + 364 = \dots\dots\dots + 831$

3.  $481 + 396 + 267 = 396 + \dots + 267$
4.  $607 + 812 + \dots = 812 + 607 + 321$
5.  $519 + 217 + 413 = 413 + \dots + 217$
6.  $819 + 0 = 0 + \dots$
7.  $621 + 0 = \dots$
8.  $819 + 812 + 706 = 812 + \dots + 819$
9.  $514 + 606 + 400 = 400 + \dots + 606$
10.  $702 + 281 + \dots = 281 + 621 + 702$

### ADDITION USING EXPANDED FORM

It is easier to calculate the sum mentally if we break the number into hundreds, tens or ones. Generally we break the smaller number or both.

*Example 1.* Add  $534 + 214$ .

*Solution.*

$$\begin{aligned}
 534 + 214 &= 534 + 200 + 14 \\
 &= 734 + 10 + 4 \\
 &= 744 + 4 \\
 &= 748.
 \end{aligned}$$

*Example 2.* Add 359 and 732.

*Solution.*

$$\begin{aligned}
 359 + 732 &= 300 + 59 + 700 + 32 \\
 &= 300 + 700 + 59 + 32 \\
 &= 1000 + 50 + 9 + 30 + 2 \\
 &= 1000 + 80 + 11 \\
 &= 1080 + 11 \\
 &= 1091
 \end{aligned}$$

# Mental Problems

1. Fill in the placeholders:

(a)  $78 + 13 = 88 + \text{○} = \text{○}$

(b)  $190 + 78 = 200 + \text{○} = \text{○}$

(c)  $225 + 57 = 230 + \text{○} = \text{○}$

2. Identify true and false statements:

- (a) 1 hundred = 10 tens .....  
.....
- (b) 3 hundreds 15 tens 12 ones = 3 hundreds 16 tens 2 ones .....  
.....
- (c)  $(999 + 1)$  is the smallest number of 3 digits. ....  
.....
- (d) The estimated sum of 34 and 48 is 80. ....  
.....
- (e) The sum of smallest 4-digit number and the greatest  
2-digit number is 1099. ....  
.....
- (f)  $139 + 256 = 256 + 139$  .....  
.....

3. Add mentally and find the answer to each letter in the circle:

- a =
- b =
- c =
- d =
- e =
- f =

## ESTIMATING THE SUM

Sometimes instead of considering the actual number we estimate the number. For example, number of students in a school. Even if it is 2681, we say 2700.

Rounding is the best way to find estimation.

**Rounding** means making a number smaller or larger.

When rounding to the nearest **tens**, look at the **ones** place. **24** lies between **20** and **30**, but it is closer to **20** so it is rounded **down** to **20**.

When rounding to the nearest **hundreds**, look at the **tens** place. **780** lies between **700** and **800**, but it is closer to **800** so it is rounded **up** to **800**.

Aha! When the number you are looking at is **less than 5**, always round **down**, when the number is **5 or more than 5**, always round **up**.

**Example 1.** Round off to the nearest tens:

- (a) 12      (b) 28      (c) 85

**Solution.**

- (a) 12 lies between 10 and 20. But ones digit i.e., 2 is less than 5 so 12 is rounded down to 10.
- (b) 28 lies between 20 and 30. But ones digit i.e., 8 is more than 5 so 28 is rounded up to 30.
- (c) 85 lies between 80 and 90. But ones digit is 5 so 85 is rounded up to 90.

**Example 2.** Round off to the nearest hundreds and estimate the sum of 389 and 145.

**Solution.** 389 lies between 300 and 400. But tens digit i.e., 8 is more than 5 so 389 is rounded up to 400.

145 lies between 100 and 200. But tens digit i.e., 4 is less than 5 so 145 is rounded down to 100.

$$\begin{aligned}\therefore \text{Estimated sum of 389 and 145} &= 400 + 100 \\ &= 500\end{aligned}$$

### Exercise 2.5

1. Add using expanded form:

(a) 239 and 853

(b) 297 and 753

(c) 122 and 869

(d) 836 and 457

2. Round off to the nearest tens:

(a) 35

(b) 81

(c) 57

(d) 136

3. Round off to the nearest hundreds:

(a) 439

(b) 187

(c) 358

(d) 4891

4. Find the estimated sum by rounding to the nearest tens:

(a)  $83 + 46$

(b)  $29 + 75$

(c)  $57 + 32$

5. Find the estimated sum by rounding to the nearest hundreds:

(a)  $183 + 235$

(b)  $279 + 621$

(c)  $205 + 385$

### WORD PROBLEMS

The concept of addition is used in many daily life problems. Let us consider the following examples.

**Example 1.** A school has 329 boys and 286 girls. How many students are there in the school? Write the number sentence.

**Solution.** We add the number of boys and girls.

$$\begin{array}{r} \phantom{0}329 \\ + 286 \\ \hline 615 \end{array}$$

Do not forget  
to regroup.

Total students = 615  
Number sentence:  $329 + 286 = 615$

**Example 2.** A fruitseller sold 165 boxes of apples, 326 boxes of oranges and 89 boxes of grapes in a week. How many boxes of fruits did he sell altogether? Write the number sentence.

**Solution.** We add boxes of all types of fruits sold.

$$\begin{array}{r} \phantom{0}165 \\ + 326 \\ + 89 \\ \hline 580 \end{array}$$

It is very  
easy!

Boxes sold = 580  
Number sentence:  $165 + 326 + 89 = 580$

**Example 3.** In a school library, there were 2317 books. The school bought 3170 books more. How many books are there now?

**Solution.** We add old and new books.

$$\begin{array}{r} 2317 \\ + 3170 \\ \hline 5487 \end{array}$$

Total books = 5487

## Exercise 2.6

1. The college canteen sold 136 packed lunches on Monday and 293 packed lunches on Tuesday. How many packed lunches were sold in these two days? Write the number sentence.
2. Tony sold 432 chocolates. His sister Rita sold 179 chocolates more than him. How many chocolates did Rita sell? Write the number sentence.
3. A weaver makes 247 and 318 bundles of cloth in two months. How many bundles of cloth does he make in all?
4. Manav is fond of collecting post office stamps. He has 879 of them. His brother Pranav has 394 stamps. How many stamps do they have altogether?
5. In three one-day cricket matches, Indian team scored 279, 246 and 283 runs. How many total runs were scored by the team in these matches? Write the number sentence.
6. There are 236 white, 382 red and 127 grey coloured cars in a parking lot. How many cars are there in the parking lot?
7. A shopkeeper has 2306 cold drink bottles and 1283 milk bottles. How many bottles does he have?
8. A water tanker supplied 4870 litres of water to one colony and the remaining 3026 litres of water to another colony. How many litres of water was there in the tanker?
9. There are 3527 cows and 4231 buffaloes in a village. How many total cattle are there in the village?
10. A poultry farm sold 2367 eggs on Saturday. If it had sold 1010 more eggs next day, how many eggs did it sell on Sunday?

## FRAMING OF WORD PROBLEMS (STORY WRITING)

So far we have learnt the method of solving word problems based on addition. Now we shall discuss, how to form word problems when a statement, in the form of numbers, is given.

Suppose, we are given the following statement:

$$5 \text{ apples} + 9 \text{ apples} = ? \text{ apples}$$

We can frame the following word problem corresponding to the above statement:

Ankit has 5 apples and Priya has 9 apples.  
How many apples do they have altogether?

Again suppose, we are given:

$$2 + 8 = ?$$

We can frame different word problems corresponding to this statement. For example,

- There are 2 bananas in one plate and 8 bananas in another plate. How many bananas are there in the two plates?
- Chhavi ate 2 toffees and her sister ate 8 toffees. How many toffees did they eat?
- 2 students of section A and 8 students of section B got full marks in mathematics. How many students in all got full marks in mathematics?
- Vipul has 2 comic books and 8 story books. How many books altogether does he have?

and so on.

**Note to the Teacher:** Take one numerical statement and encourage the students to form different word problems for it.

Framing of word problems enhances thinking power!

Now learn the following solved examples.

**Example 1.** Form a simple word problem for:  $48 + 15 = ?$

**Solution.** Abdul has 48 toffees. He bought 15 toffees more. How many toffees does he have now?

**Example 2.** Form a simple word problem for:  $513 + 429 = ?$

**Solution.** Sneha sold 513 apples on Monday and 429 on Tuesday. How many apples did she sell in two days?

### Exercise 2.7

Form a simple verbal word problem for each of the following statements:

1.  $9 + 3 = ?$

2.  $7 + 3 = ?$

3.  $5 + 5 = ?$

4.  $10 + 7 = ?$

5.  $6 + 9 = ?$

6.  $7 + 7 = ?$

# Chapter Test

Time: 30 minutes

M.M. 10

Note: Each question is of 2 marks.

Space for rough work

1. Put  $>$  or  $<$  in the blank to make the sentence correct.

(a)  $220 + 148 \dots\dots\dots 198 + 215$

(b)  $311 + 225 \dots\dots\dots 408 + 96$

2. Write in columns and add:

(a)  $3056 + 2932 \dots\dots\dots$

(b)  $819 + 785 \dots\dots\dots$

3. There were 356 red apples and 238 green apples in a shop. Estimate the number of apples by rounding to the nearest hundreds.  $\dots\dots\dots$

4. Fill in the blanks:

(a)  $878 + 0 = 0 + \dots\dots\dots = \dots\dots\dots$

(b)  $190 + 58 = 200 + \dots\dots\dots$

5. Encircle the correct answer from the given options:

(a) Which sum is incorrect?

$25 + 38$  is

(i)  $20 + 43$

(ii)  $38 + 25$

(iii) 53

(iv) 63

(b) Which number cannot be rounded off to 400 to the nearest hundreds?

(i) 350

(ii) 328

(iii) 367

(iv) 411

# Subtraction

In standard two, we have learnt the subtraction of 2-digit numbers without and with borrowing. We have also learnt the subtraction of 3-digit numbers without borrowing. In this class we shall recapitulate and then learn the subtraction of 3-digit numbers with borrowing and subtraction of 4-digit numbers without borrowing.

The result obtained after subtraction is called the **difference**.

## SUBTRACTION WITHOUT BORROWING

### (a) Subtraction of 3-digit numbers (without borrowing)

*Example 1.* Subtract 235 from 689. Write the number sentence.

*Solution.* Putting the numbers in columns and subtracting:

H	T	O
6	8	9
-	2	3
<hr/>		
		4

Subtract **ones**:

$$9 - 5 = 4 \text{ ones}$$

H	T	O
6	8	9
-	2	3
<hr/>		
	5	4

Subtract **tens**:

$$8 - 3 = 5 \text{ tens}$$

H	T	O
6	8	9
-	2	3
<hr/>		
4	5	4

Subtract **hundreds**:

$$6 - 2 = 4 \text{ hundreds}$$

$$\text{Number sentence: } 689 - 235 = 454$$

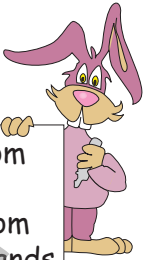

### (b) Subtraction of 4-digit numbers (without borrowing)

We have recapitulated the subtraction of 3-digit numbers without borrowing. The same rule is applied when we subtract 4-digit numbers.

**Example 2.** Subtract 5027 from 7839. Write the number sentence.

**Solution.** Putting numbers in column form:

	Th	H	T	O
	7	8	3	9
-	5	0	2	7
	2	8	1	2

Subtract ones from ones, tens from tens, hundreds from hundreds and thousands from thousands.

Number sentence:  $7839 - 5027 = 2812$

**Example 3.** Fill in the placeholders.

	5			9
-		3	2	1
	2	5	4	

Think at each step.

**Solution.**

**1st step**

	5			9
-		3	2	1
	2	5	4	

**2nd step**

	5			9
-		3	2	1
	2	5	4	

$9 - 1 = ?$

$? - 2 = 4$

**3rd step**

5	8	6	9
-		3	2
2	5	4	8

**4th step**

5	8	6	9
-	3	3	2
2	5	4	8

$? - 3 = 5$

$5 - ? = 2$

**Exercise 3.1**

**Subtract:**

1.

H T O
5 8 3
- 2 7 1

2.

H T O
8 9 6
- 5 2 4

3.

H T O
3 5 8
- 1 2 3

4.

Th H T O
5 8 7 9
- 2 5 6 7

5.

Th H T O
9 6 7 3
- 5 4 5 1

6.

Th H T O
8 6 8 5
- 4 3 2 0

7.

6 8 5 3
- 2 2 4 3

8.

9 8 4 2
- 6 7 0 1

9.

5 4 0 9
- 2 1 0 3

10.

9 8 7 6
- 2 0 4 3

11.

7 6 4 1
- 6 5 1 0

12.

5 3 2 9
- 1 0 1 3

**Write in columns and find the difference:**

13.  $7625 - 4022$

14.  $8603 - 5401$

15.  $9840 - 7610$

16. Find the difference between 3825 and 4946. Write the number sentence.

**Note:** While finding the difference, we write the greater of the two given numbers on the top and then subtract.

**Fill in the placeholders:**

17.

2	*	3	7
-	1	2	*
*	7	2	*

18.

*	6	*	5
-	6	2	4
3	*	4	*

### BORROWING

Let us recall:

1 ten = 10 ones

1 hundred = 10 tens

Similarly,

(a) 4 tens 2 ones = 3 tens 12 ones.

(b) 2 tens 0 ones = 1 ten 10 ones

(c) 7 hundreds 2 tens 9 ones = 6 hundreds 12 tens 9 ones

(d) 4 hundreds 0 tens 4 ones = 3 hundreds 10 tens 4 ones  
= 3 hundreds 9 tens 14 ones.

### Exercise 3.2

**Borrow and fill in the blanks:**

1. 3 tens 2 ones = 2 tens ..... ones.

T	O	→	T	O
3	2		2	12

2. 2 hundreds 5 tens 8 ones = 1 hundred ..... tens 8 ones.

H	T	O
2	5	8

→

H	T	O
1	15	8

3. 1 hundred 3 tens 2 ones = ..... tens 2 ones.

H	T	O
1	3	2

→

H	T	O
0	13	2

4. 7 hundreds 2 tens 9 ones = ..... hundreds 12 tens 9 ones.

5. 7 hundreds 3 ones = 6 hundreds ..... tens 3 ones  
= 6 hundreds ..... tens 13 ones.

## SUBTRACTION (With borrowing)

### Subtraction of 3-digit numbers

*Example 1.* Subtract 365 from 783.

*Solution.*

#### Subtract the ones:

We cannot subtract 5 ones from 3 ones.

So we break tens into ones.

$$8 \text{ tens } 3 \text{ ones} = 7 \text{ tens } 13 \text{ ones}$$

$$13 \text{ ones} - 5 \text{ ones} = 8 \text{ ones}$$

H	T	O
7	8	3
-	3	6
		5
		8

#### Subtract the tens:

$$7 \text{ tens} - 6 \text{ tens} = 1 \text{ ten}$$

H	T	O
7	8	3
-	3	6
		5
	1	8

#### Subtract the hundreds:

$$7 \text{ hundreds} - 3 \text{ hundreds} = 4 \text{ hundreds}$$

$$\therefore 783 - 365 = 418$$

H	T	O
7	8	3
-	3	6
		5
4	1	8

**Example 2.** Subtract 426 from 913.

**Solution. Subtract ones:**

We cannot subtract 6 ones from 3 ones.  
So we break tens into ones.

$$\begin{aligned} 1 \text{ ten } 3 \text{ ones} &= 0 \text{ tens } 13 \text{ ones} \\ 13 \text{ ones} - 6 \text{ ones} &= 7 \text{ ones} \end{aligned}$$

H	T	O
9	<del>1</del>	<del>3</del>
- 4	2	6
<hr/>		
		7

**Subtract tens:**

We cannot subtract 2 tens from 0 tens.  
So we break hundreds into tens.

$$\begin{aligned} 9 \text{ hundreds } 0 \text{ tens} &= 8 \text{ hundreds } 10 \text{ tens} \\ 10 \text{ tens} - 2 \text{ tens} &= 8 \text{ tens} \end{aligned}$$

H	T	O
<del>9</del>	<del>0</del>	<del>3</del>
8	10	13
- 4	2	6
<hr/>		
	8	7

**Subtract hundreds:**

8 hundreds - 4 hundreds = 4 hundreds

$$\therefore 913 - 426 = 487$$

In short we put it as under:

H	T	O
<del>9</del>	<del>1</del>	<del>3</del>
8	10	13
- 4	2	6
<hr/>		
4	8	7

Borrow wherever needed

H	T	O
<del>9</del>	<del>1</del>	<del>3</del>
8	10	13
- 4	2	6
<hr/>		
4	8	7

## CHECKING SUBTRACTION WITH ADDITION

Observe the following:

1	4	2	
-	1	0	1
<hr/>			
	4		1

	1	0	1
+		4	1
<hr/>			
	1	4	2

Aha!  
This sum is same  
as the greater  
number.

Therefore, you can check your answer by adding difference to the smaller number.

Let us take one more example,

$\begin{array}{r} 913 \\ - 426 \\ \hline 487 \end{array}$	Now Check	$\begin{array}{r} 487 \\ + 426 \\ \hline 913 \end{array}$
---	-----------	---

Since we obtained the same answer, our answer is correct.

### CHECKING SUBTRACTION WITH SUBTRACTION

Observe the following:

$\begin{array}{r} 426 \\ - 105 \\ \hline 321 \end{array}$	and	$\begin{array}{r} 426 \\ - 321 \\ \hline 105 \end{array}$
---	-----	---

You can check your answer by subtracting the difference from the greater number.

**Example 3.** Subtract 389 from 600.

**Solution.** We cannot subtract 9 ones from 0 ones, so we borrow 1 ten. Here, there is no ten, so first we borrow 1 hundred or 10 tens, leaving behind 5 hundreds. From 10 tens, we borrow 1 ten or 10 ones, leaving behind 9 tens.

Now  $10 \text{ ones} - 9 \text{ ones} = 1 \text{ one}$   
 and  $9 \text{ tens} - 8 \text{ tens} = 1 \text{ ten}$   
 $5 \text{ hundreds} - 3 \text{ hundreds} = 2 \text{ hundreds}$   
 $\therefore 600 - 389 = 211$

	H	T	O
		9	
	5	<del>10</del>	10
	<del>6</del>	<del>8</del>	<del>9</del>
-	3	8	9
	2	1	1

### Exercise 3.3

**Fill in the blanks:**

1. 2 hundreds 8 tens 3 ones – 4 tens 8 ones  
 = 2 hundreds 7 tens ..... ones – 4 tens 8 ones  
 = 2 hundreds 3 tens ..... ones.

2. 5 hundreds 2 tens 8 ones – 3 hundreds 8 tens 3 ones  
 = 4 hundreds ..... tens 8 ones – 3 hundreds 8 tens 3 ones  
 = 1 hundred ..... tens ..... ones.

**Subtract:**

<b>3.</b>	<table style="border-collapse: collapse;"> <tr><td style="padding: 0 5px;">H</td><td style="padding: 0 5px;">T</td><td style="padding: 0 5px;">O</td></tr> </table>	H	T	O	<table style="border-collapse: collapse; width: 100%;"> <tr><td style="padding: 2px 5px;">5</td><td style="padding: 2px 5px;">3</td><td style="padding: 2px 5px;">2</td></tr> <tr><td style="padding: 2px 5px;">–</td><td style="padding: 2px 5px;">2</td><td style="padding: 2px 5px;">0 4</td></tr> <tr><td colspan="3" style="border: 1px solid #c8e6c9; height: 20px;"></td></tr> </table>	5	3	2	–	2	0 4			
H	T	O												
5	3	2												
–	2	0 4												

<b>4.</b>	<table style="border-collapse: collapse;"> <tr><td style="padding: 0 5px;">H</td><td style="padding: 0 5px;">T</td><td style="padding: 0 5px;">O</td></tr> </table>	H	T	O	<table style="border-collapse: collapse; width: 100%;"> <tr><td style="padding: 2px 5px;">6</td><td style="padding: 2px 5px;">4</td><td style="padding: 2px 5px;">3</td></tr> <tr><td style="padding: 2px 5px;">–</td><td style="padding: 2px 5px;">3</td><td style="padding: 2px 5px;">2 8</td></tr> <tr><td colspan="3" style="border: 1px solid #c8e6c9; height: 20px;"></td></tr> </table>	6	4	3	–	3	2 8			
H	T	O												
6	4	3												
–	3	2 8												

<b>5.</b>	<table style="border-collapse: collapse;"> <tr><td style="padding: 0 5px;">H</td><td style="padding: 0 5px;">T</td><td style="padding: 0 5px;">O</td></tr> </table>	H	T	O	<table style="border-collapse: collapse; width: 100%;"> <tr><td style="padding: 2px 5px;">7</td><td style="padding: 2px 5px;">5</td><td style="padding: 2px 5px;">2</td></tr> <tr><td style="padding: 2px 5px;">–</td><td style="padding: 2px 5px;">4</td><td style="padding: 2px 5px;">3 9</td></tr> <tr><td colspan="3" style="border: 1px solid #c8e6c9; height: 20px;"></td></tr> </table>	7	5	2	–	4	3 9			
H	T	O												
7	5	2												
–	4	3 9												

<b>6.</b>	<table style="border-collapse: collapse;"> <tr><td style="padding: 0 5px;">H</td><td style="padding: 0 5px;">T</td><td style="padding: 0 5px;">O</td></tr> </table>	H	T	O	<table style="border-collapse: collapse; width: 100%;"> <tr><td style="padding: 2px 5px;">8</td><td style="padding: 2px 5px;">7</td><td style="padding: 2px 5px;">6</td></tr> <tr><td style="padding: 2px 5px;">–</td><td style="padding: 2px 5px;">2</td><td style="padding: 2px 5px;">5 7</td></tr> <tr><td colspan="3" style="border: 1px solid #c8e6c9; height: 20px;"></td></tr> </table>	8	7	6	–	2	5 7			
H	T	O												
8	7	6												
–	2	5 7												

<b>7.</b>	<table style="border-collapse: collapse;"> <tr><td style="padding: 0 5px;">H</td><td style="padding: 0 5px;">T</td><td style="padding: 0 5px;">O</td></tr> </table>	H	T	O	<table style="border-collapse: collapse; width: 100%;"> <tr><td style="padding: 2px 5px;">7</td><td style="padding: 2px 5px;">3</td><td style="padding: 2px 5px;">4</td></tr> <tr><td style="padding: 2px 5px;">–</td><td style="padding: 2px 5px;">4</td><td style="padding: 2px 5px;">2 8</td></tr> <tr><td colspan="3" style="border: 1px solid #c8e6c9; height: 20px;"></td></tr> </table>	7	3	4	–	4	2 8			
H	T	O												
7	3	4												
–	4	2 8												

<b>8.</b>	<table style="border-collapse: collapse;"> <tr><td style="padding: 0 5px;">H</td><td style="padding: 0 5px;">T</td><td style="padding: 0 5px;">O</td></tr> </table>	H	T	O	<table style="border-collapse: collapse; width: 100%;"> <tr><td style="padding: 2px 5px;">6</td><td style="padding: 2px 5px;">4</td><td style="padding: 2px 5px;">6</td></tr> <tr><td style="padding: 2px 5px;">–</td><td style="padding: 2px 5px;">3</td><td style="padding: 2px 5px;">0 9</td></tr> <tr><td colspan="3" style="border: 1px solid #c8e6c9; height: 20px;"></td></tr> </table>	6	4	6	–	3	0 9

## ESTIMATING THE DIFFERENCE

We have learnt the method of rounding to tens and hundreds and then estimating the sum. Here we shall apply the same rule to estimate the difference.

**Example 1.** Round off to tens and then estimate the difference:

(a)  $53 - 29$                       (b)  $535 - 412$

**Solution.**

(a) 53 is rounded to 50.

29 is rounded to 30.

$$\begin{aligned}\therefore \text{Estimated difference} &= 50 - 30 \\ &= 20\end{aligned}$$

(b) 535 is rounded to 540.

412 is rounded to 410.

$$\begin{aligned}\therefore \text{Estimated difference} &= 540 - 410 \\ &= 130\end{aligned}$$

Be careful  
in rounding  
up/down.

**Example 2.** Round off to hundreds and find the difference of 344 and 793.

**Solution.**

344 is rounded to 300.

793 is rounded to 800.

$$\begin{aligned}\therefore \text{Estimated difference} &= 800 - 300 \\ &= 500\end{aligned}$$

Subtract smaller  
number from  
larger one.

### Exercise 3.4

1. Round off to tens and then find the estimated difference:

(a)  $89 - 53$                       (b)  $32 - 18$                       (c)  $312 - 96$

2. Round off to hundreds and then find the estimated difference:

(a)  $429 - 282$                       (b)  $561 - 444$

## WORD PROBLEMS

Like addition, the concept of subtraction is used in many day-to-day problems. Let us study the following examples.

**Example 1.** There are 5397 bags of wheat in a godown. If 3075 bags are taken out, how many bags will remain in the godown? Write the number sentence.

**Solution.**

Number of bags in the godown	=	5397
Number of bags taken out	=	- 3075
Remaining bags	=	<u>2322</u>

Number sentence:  $5397 - 3075 = 2322$

Subtract

**Example 2.** At a World Book Fair, a bookseller sold 487 books on the opening day. He sold 189 fewer books the next day. How many books were sold the next day?

**Solution.**

Books sold on the first day	=	<del>4</del> <sup>17</sup> <del>8</del> <sup>17</sup> <del>7</del>
Fewer books sold	=	- 1 8 9
Books sold next day	=	<u>2 9 8</u>

Don't forget to borrow.

### Exercise 3.5

- Shekhar bought 289 bottles of soft drinks. On his birthday 173 bottles were used and remaining bottles were used next day on his sister's birthday. How many bottles were used on his sister's birthday? Write the number sentence.
- My mother baked 537 biscuits for the school fete. 185 were not sold. How many biscuits were sold?
- Jatin has 3596 stamps. He collected 1243 stamps this year. How many stamps did he have till last year?
- Aayush bought 5788 pairs of shoes in January for his shop. On 1st February he had 1475 pairs left. How many pairs did he sell in January?
- Vicky and Ritu collected a total of 451 coins. Ritu alone collected 285 coins. How many coins did Vicky collect?

6. Anu bought 200 bottles of milk in the months of April and May. She bought 98 bottles in April. How many bottles did she buy in May?
7. There are 430 seats in a cinema hall. On one day 85 seats were found vacant in a show. How many people saw the movie in that show? Write the number sentence.
8. There are 236 students in a school. The number of boys is 128. How many girls are there?
9. Tinu read 829 pages of her story book. The book contains 978 pages. How many pages are still to be read?
10. In a cricket match our team scored 435 runs and Australian team scored 146 runs less than our team. How many runs did Australian team score?
11. There were 205 kites in a shop. The shopkeeper sold 167 kites. How many are still to be sold?
12. Out of 425 books in a library, 268 books were issued to the students. How many books are still in the library?
13. By how much is 400 greater than 307?
14. By how much is 298 less than 325?
15. Kanu had ₹ 183 with him. He bought a book for ₹ 59. Estimate the amount left with him.  
[Hint: Round off to tens]

## FRAMING WORD PROBLEMS (STORY WRITING)

Different word problems can be found for a single subtraction fact. For example,  $48 - 12 = ?$  can stand for any one of the following:

- (a) There are 48 students in a class. 12 of them are girls, how many students are boys?
- (b) Sahil bought 48 chocolates. He gave 12 chocolates to his sister. How many chocolates does he have now?
- (c) Rahul invited 48 friends on his birthday. He had 12 ice creams for them. How many more ice creams does he need, if each friend gets one ice cream?

## Exercise 3.6

Form a simple word problem for each of the following:

1.  $30 - 14 = ?$

2.  $58 - 36 = ?$

3.  $96 - 15 = ?$

4.  $78 - 16 = ?$

5.  $50 - 45 = ?$

6.  $113 - 98 = ?$

### WRITING A NUMBER IN DIFFERENT WAYS

Any number can be expressed in different ways by performing addition or subtraction between two numbers.

For example,  $48 = 38 + 10 = 28 + 20 = 18 + 30 = 36 + 12$   
 $= 50 - 2 = 60 - 12 = 80 - 32 = 54 - 6$  etc.

**Note:** A number can also be expressed by performing multiplication between two numbers.

For example,  $48 = 24 \times 2$  etc.

### ADDITION AND SUBTRACTION TOGETHER

**Example 1.** Find  $134 - 79 + 286$ .

**Solution.**

First, subtract 79 from 134

$\begin{array}{r} 134 \\ - 79 \\ \hline 55 \end{array}$	$\begin{array}{r} 55 \\ + 286 \\ \hline 341 \end{array}$
---	--

Add the difference obtained to 286

$\therefore 134 - 79 + 286 = 341$

**Example 2.** Solve:  $289 + 135 - 374$ .

**Solution.**

First, add 289 to 135

$\begin{array}{r} 289 \\ + 135 \\ \hline 424 \end{array}$	$\begin{array}{r} 424 \\ - 374 \\ \hline 50 \end{array}$
---	--

Subtract 374 from the sum obtained

$\therefore 289 + 135 - 374 = 50$

**Example 3.** Simplify:  $375 - 218 + 519 - 176$ .

**Solution.**

$$\therefore 375 - 218 + 519 - 176 = 500$$

**Example 4.** Find:  $284 - 98 + 36 - 173$ .

**Solution.**

## PROPERTIES OF SUBTRACTION

1. Order property

We know that

$$\begin{array}{r} 249 \\ - 200 \\ \hline 49 \end{array}$$

Can you subtract 249 from 200?

No

Therefore, **we cannot change the order of numbers while subtraction.**

You can do so in higher classes.

2. The difference of a number from itself is always 0.

$$9 - 9 = 0, \quad 291 - 291 = 0$$

3. When we subtract 0 from a number, we get the same number as difference.

$$59 - 0 = 59, \quad 1039 - 0 = 1039$$

## Exercise 3.7

1. Fill in the blanks:

(a)  $53 - 53 = \dots\dots\dots$

(b)  $756 - 0 = \dots\dots\dots$

(c)  $13 - \dots\dots = 0$

(d)  $\dots\dots - 0 = 81$

2. Simplify the following:

(a)  $523 - 231 + 175$

(b)  $246 + 479 - 144$

(c)  $163 + 685 - 374$

(d)  $876 - 285 + 317$

### Lab Activity

We can verify  $783 - 365 = 418$  in mathematics lab as follows:

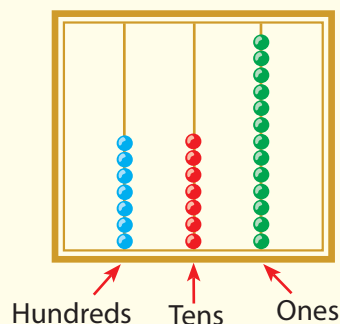

Take some green, red and blue beads.  
Let 1 green, 1 red and 1 blue bead represent  
1 one, 1 ten, and 1 hundred respectively. We  
know that 1 ten = 10 ones and  
1 hundred = 10 tens, so

1 blue bead = 10 red beads

1 red bead = 10 green beads

Take an abacus. To show the number 783  
on it, fix 3 green beads on ones stick, 8 red  
beads on tens stick and 7 blue beads on  
hundreds stick.

To subtract 365 from 783 we need to  
remove 5 green beads from ones stick. But it  
has only 3 green beads. We cannot take out 5  
beads from 3 beads. So take out one red bead  
from tens stick, leaving behind 7 red beads. In  
lieu of this, put 10 more green beads in ones  
stick making a total of 13 green beads.

Now remove 5 green beads from 13 beads.

Again remove 6 beads from red beads and then 3 beads from 7 blue beads. The number shown on the last abacus is 418.

$$\therefore 783 - 365 = 418$$

## Mental Problems

1. Subtract and write the answer in the space provided:

(a)  $45 - 12 = \dots\dots\dots$       (b)  $87 - 15 = \dots\dots\dots$

(c)  $63 - 22 = \dots\dots\dots$       (d)  $59 - 34 = \dots\dots\dots$

(e)  $93 - 18 = \dots\dots\dots$       (f)  $198 - 42 = \dots\dots\dots$

(g)  $175 - 68 = \dots\dots\dots$       (h)  $1000 - 1 = \dots\dots\dots$

(i)  $999 - 444 = \dots\dots\dots$       (j)  $3526 - 3000 = \dots\dots\dots$

(k)  $4290 - 290 = \dots\dots\dots$

I will first subtract tens and then ones.  
 $45 - 12 = 45 - 10 - 2$   
 $= 35 - 2$   
 $= 33$

2. Estimate the difference and fill in the blanks:

(a)  $48 - 31 = \dots\dots\dots$

Round off to tens.

(b)  $73 - 28 = \dots\dots\dots$

(c)  $88 - 62 = \dots\dots\dots$

(d)  $428 - 181 = \dots\dots\dots$

Round off to hundreds.

(e)  $587 - 270 = \dots\dots\dots$

3. Fill in the blanks:

(a)  $400 + 39 - 9 = \dots\dots\dots$

(b)  $529 - 9 + 80 = \dots\dots\dots$

(c)  $437 - 30 - 7 = \dots\dots\dots$

(d)  $371 - 71 + 25 = \dots\dots\dots$

4. Subtraction is related to addition. Make two subtraction sums from a given addition sum. First one is done for you.

130 + 220 = 350		195 + 225 = .....		518 + 272 = .....	
350 - 130 = 220	350 - 220 = 130				

APC BOOKS

# Chapter Test

Time: 30 minutes

M.M. 10

Note: Each question is of 2 marks.

1. Find the difference:

$$\begin{array}{r} 3749 \\ - 1625 \\ \hline \\ \hline \end{array}$$

$$\begin{array}{r} 7320 \\ - 3911 \\ \hline \\ \hline \end{array}$$

Space for rough work

2. Find the difference and check your answer:

$$\begin{array}{r} 9998 \\ - 1229 \\ \hline \\ \hline \end{array}$$

$$\begin{array}{r} 7000 \\ - 3555 \\ \hline \\ \hline \end{array}$$

3. Fill in the placeholders.

$$\begin{array}{r} 4829 \\ - 3\boxed{\phantom{0}}\boxed{\phantom{0}}4 \\ \hline \boxed{\phantom{0}}59\boxed{\phantom{0}} \\ \hline \end{array}$$

$$\begin{array}{r} 6\boxed{\phantom{0}}29 \\ - \boxed{\phantom{0}}43\boxed{\phantom{0}} \\ \hline 63\boxed{\phantom{0}}6 \\ \hline \end{array}$$

4. Fill in the blanks:

(a) If  $490 - 120 = 370$ , then  $370 + \underline{\quad} = 490$ .

(b) 16 less than 36 is  $\underline{\quad}$ .

5. Do the following:

(a) Find two numbers whose sum and difference is 6.

(b) What should be added to 129 to get 140?

# Model Paper-1 (Chapters 1–3)

Time: 1 hour

M.M. 20

**Note:** Questions (1–4) are of 1 mark each, questions (5–7) are of 2 marks each, questions (8–9) are of 3 marks each and question 10 is of 4 marks.

Select the correct answer from the given options (1–4):

- The number "Five thousand three hundred six" is  
(a) 5360                      (b) 5036                      (c) 5306                      (d) 50306
- 983 is the successor of  
(a) 984                      (b) 982                      (c) 981                      (d) 985
- $98 + 53$  is not the same as  
(a)  $76 + 75$                       (b)  $75 + 76$                       (c)  $77 + 84$                       (d)  $90 + 61$
- $530 - 249$  is  
(a) 281                      (b) 381                      (c) 291                      (d) 391

5. Arrange the given numbers in descending order:

....., ....., ....., .....

6. Write the greatest number using all the digits 3, 0, 9 and 8 only once.

.....

7. Write a story for  $3056 + 2312 = ?$

.....

8. Add and write the sum on the space provided.

(a)  $4083 + 5316 = \dots\dots\dots$       (b)  $567 + 394 = \dots\dots\dots$

9. Subtract:

(a)  $3875 - 2603 = \dots\dots\dots$       (b)  $803 - 625 = \dots\dots\dots$

10. Fill in the missing numbers:

	...	3	...
+	8	...	5
	...	5	0
			4

Space for rough work
