ABOUT US

Clark's Supply & Service has been a trusted supplier of equipment and services in Saskatchewan since 1969. Starting with water well supplies in Moose Jaw, Saskatchewan, we later expanded to Warman and Emerald Park, and has grown to serve the entire province. In 2024 we joined the Aquifer Group of Companies, another locally owned and operated company that opens up even more opportunities for our customers across the province.

Over the past 50 years, the Clark's product offerings have grown from water well supplies to now offer a wide range of products and services, including commercial pressure washers, water pumps, zero-turn lawn mowers, turf equipment, articulated loaders and equipment rentals. Most recently, we introduced Icon Golf Carts and Low Speed Vehicles. These electric golf carts come in a variety of configurations and styles with a top of the line battery.

With locations in Warman, Emerald Park, and Moose Jaw, Clark's Supply & Service is known for its expertise, diverse product offerings, and commitment to customer satisfaction.

BRANDS WE TRUST

We're proud to carry top-quality brands known for their performance and reliability. From industry-leading equipment and tools to trusted water systems and accessories, we partner with brands that deliver real value to our customers.

Hot Water Pressure Washers & Accessories

Water Well Screens

Northern Stock Livestock Watering Bowls

Articulated Loaders & Attachments

Specialty Turf Products: Aerators, Sod Cutters, Brush Cutters, Blowers and More

Brass, Stainless, PVC, Nylon Fittings and Well Accessories

Easybox Constant Pressure Systems

Submersible Pumps, Motors, VFD Drives

Zero-Turn Lawn Mowers

Electric Golf Carts and Low Speed Vehicles. Utility Carts, 2 - 6 Seater Options.

Jet Pumps, Sewage Pumps, & Effluent Pumps

Pitless Adapters

Manholes

Glue & Primer

Poly Pipe

Rotary Finishing Mowers

Golf & Sport Turf Equipment

Sprayers for Golf, Turf, Sports Grounds, Agricultural & Landscape Industries

Turf Renovation Equipment Including Sod Cutters & Aerators

Pump Switches, & Tank Alarms

Golf Course, Turf & Field Rollers, Sweepers, Sprayers and More

Pressure Washer Parts

Hose Reels

Trash Pumps, & Transfer Pumps

Blowers, Sod Cutters, & Edgers

Pressure Tanks

AALADIN ADVANTAGE

360° Swivel Wheels: allow for easy maneuverability and added safety.

High Efficiency Technology: reduces fuel usage by 38% on average to reduce your costs and carbon footprint.

Build Quality: AaLadin produces longer lasting, better quality machines.

Clutch Drive System: keeps the washer's pump out of bypass, greatly decreasing wear on your pump to save money and time.

Unique Coil Design: heats water more efficiently and is easier to remove, saving both fuel and money on coil replacements.

Flat Free Tires: never go flat, saving money on repairs, time, and frustration.

13 & 14 SERIES

The 13 & 14 Series Horizontal Model by AaLadin is designed for easy maneuverability. It is equipped with industrial high-efficiency electric motors, a stainless steel heat shield and burner cover, and more!

SS Model:

- Well Balanced for Easy Maneuverability
- Powder Coated Automotive Quality Finish
- Rear Wheel Locking Brake System
- Built-In Hose Reel Socket
- Heavy Duty Electrical Cord & Hose Storage
- Built-In Gun Cup
- Stainless Steel Belt Guard
- Heavy Duty Electro Plated Fittings
- Exclusive High Strength Plastic Manifold
- Quick Couple Plumbing Connections
- Heavy Duty Rotary Power Switch
- ASTM A53 Schedule 80 Steel Heating Coil
- Quick Coil Access
- Fuel Oil Solenoid
- Water Separating Fuel Filter
- In-Line Fuel Shutoff
- Trigger Gun Control w/ 36" Insulated Wand
- 0°, 15°, 25°, & 40° Quick Coupled Nozzles
- 3/8" x 50' High-Pressure Hose w/Safety Hose Guards
- Flexible Vinyl Poly Coated Tri-Lingual Decals
- ETL and CETL Listed to UL Std.1776 & CSA Std. B140.11

SC - Includes All the Features of SS Plus:

- Clutch Drive System

41 SERIES

The 41 series does not require external electricity to be operated and is built with heavy-duty components to withstand rough transportation conditions. This self-contained unit can be mounted on trailers, set inside vehicles, placed in the back of trucks, used on the decks of ships, and cabins of airplanes.

All Models:

- Fuel Efficient Combustion Chamber
- Quick Couple Stainless Steel Nozzles
- ASTM A53 Schedule 80 Steel Heating Coil
- Trigger Gun Control
- Variable Pressure Wand
- Vertical Fired Coil
- Wire Braid Discharge Hose
- Low Oil Engine Protection
- 18 Amp Charging System
- 12V Ignition System
- Water Separating Fuel Filter
- Flow Actuated Shutoff Switch
- Thermal Pump Protection
- Downstream Chemical Injection
- Four Wheel Design

42 SERIES

These horizontal pressure washers include a corrosion-proof polyethylene fuel tank and an innovative insulation system designed for greater efficiency and easier serviceability. The plumbing assembly utilizes quick couple connections, allowing for easier and quicker service of the pump module, and the hose reel socket is incorporated directly to frame assembly for maximum support. Ground fault circuit interruption is standard on the full line of AaLadin portable pressure washers.

All Models:

- Quick Couple Stainless Steel Nozzles
- ASTM A53 Schedule 80 Steel Heating Coil
- Trigger Gun Control
- Variable Pressure Wand(42-430/42-530)
- Wire Braid Discharge Hose
- Auxiliary Gasoline Tank(42-440/42-530/42-830)
- Low Oil Engine Protection
- Water Separating Fuel Filter
- Low Water Shutoff Protection
- Automatic Electric Burner Ignition
- Extended Engine Oil Drain(Vanguard)
- Shock Mount Plastic Battery Box
- Stainless Steel Control Panel

12V H Models:

- High Amp Charging System
- 12V Ignition System
- Downstream Chemical Injection

110V GH Models:

- Calibrated Detergent Mixing Valve
- High Pressure Soap
- Circuit Breaker Protected
- Stainless Steel Float Tank

71 SERIES - HIGH EFFICIENCY NATURAL GAS

The 71-series utilizes one heat chamber one water pump, and a single set of controls with up to 6 GPM flow. These are ideal for single gun operation. With a long list of exclusive features, this pressure washer is sure to exceed your particular needs and expectations.

All Models:

- Operates at 98% efficiency
- Reduces maintenance costs
- Average of 38% fuel savings
- Lowers ventilation costs (CPVC)
- Reduces negative environmental impact
- JIC Fittings for Leak Free Connections
- Trigger Gun Control
- Wire Braid Discharge Hose
- Quick Couple Stainless Steel Nozzles
- ETL Listed
- Watertight Electrical Panel
- Laminate High Visibility Control Panel Overlay
- Hour Meter w/Break-In & Oil Change Alerts
- Automatic Shutdown Timer
- ASTM A53 Schedule 80 Steel Heating Coil
- Electronic Ignition
- Low Pressure Manifold Plumbing

400 SERIES - COLD WASHER

With 1000 to 3000 PSI and 3 to 5 GPM, these units are designed for a variety of cold water cleaning jobs. They are durable and belt-driven and use ceramic plunger pumps to produce a variety of water volumes and pressures.

All Models:

- Trigger Gun Control
- GFCI Cord Protection
- Panel Mounted Controls
- Optional Hour Meter
- Calibrated Soap Control
- Stainless Steel Tips
- Ceramic Triplex Plunger Pump
- Optional Clutch Drive
- Heavy Duty Electric Motor
- Stainless Steel Float Tank

2000 SERIES - PARTS WASHERS

Designed and built for long life, these quality parts washers, made of 10 or 12-gauge steel, with dual-zone quick service filters, are top of their class in performance. There are five models to choose from in this series of parts washers, with gallon capacities ranging in size from 40 gallons to 260 gallons. The 2000 Series has motor horsepower starting at 3, reaching up to 15, depending on the model.

For years, solvent tanks and washers have been the way to clean parts, but these solvent systems are now known to be health hazards. Additionally, environmental issues have made solvent washers increasingly expensive to rent or own. But now there is a solution. Clean parts in minutes with hot water and biodegradable detergents, not solvents. Load it, set, and forget it. Simply place your parts in the washer, close the door, set the timer, work on something else and come back to clean parts.

All Models:

- Quick Service Fine Screen Filter (2055/2055E/2040/2040E)
- ETL & C-ETL Listed
- Small Parts Soaking System (2085E/2175E/2260E)
- Dual Zone Quick Service Filters w/ Slide Out
- Fine Debris Screen & Small Debris Catch Basket (2085E/2175E/2260E)

V POD - HOT WATER MOBILE WASH

There are three trailer models and two slide-in frame designs to choose from in this series of mobile wash systems. Each trailer is constructed of heavy wall steel tube frame utilizing sealed beam lights with the wiring inside the tube frame to reduce exposure to the elements that cause premature light failures.

The POD system provides a convenient system that like the Entrepreneur IV allows for use with or without your water supply & POD slide in frame assembly.

All Models:

- 225 Gallon Poly Leg Style Water Tank
- Heavy Duty Steel
- Tube Frame Assembly
- Powder Coated Paint
- Heavy Duty Tie-Down Loops
- Models Available for 6' or 8' Beds

Available Options:

- Spare Tire & Wheel Assembly
- Chrome Wheels (2)
- Aluminum Tread Plate Steps
- Stainless Steel Hose Reels

AVANTS ADVANTAGE

Avant's advantages in power, efficiency, versatility and value are driven by our robust features. Our compact articulated design uses less horsepower to do most jobs-that means less surface impact and lower operating costs...

- Excellent weight to lift ratio
- Avant increases productivity, saving time and manpower
- Minimal surface impact (doesn't tear up the ground like a skid steer)
- 5X less tire wear than a skid steer
- Articulated, compact design
- Low operating cost
- Fuel efficient (6X more efficient than a skid steer)
- Offset telescopic boom
- Easy to operate
- 360° operator visibility
- 235 different attachments
- In house financing, great lease rates

200 SERIES

The Avant 200 series is the perfect entry-level compact loader for users who need power, agility, and versatility in a small footprint. Weighing only 700 kg, it's light enough to tow on a trailer behind most vehicles, yet powerful enough to handle a wide range of jobs, with over 100 compatible attachments. Designed with an articulated frame and tight turning radius, the 200 series excels in navigating tight spaces like narrow pathways, small barns, or residential yards. It's also exceptionally easy to use, making it ideal for first-time loader owners, landscapers, property managers, and hobby farmers who need reliable performance without a steep learning curve.

400 SERIES

The Avant 400 series strikes the ideal balance between compact size and lifting power, making it a step up for users who need more capacity without sacrificing maneuverability. The 400 is perfect for landscapers, small farms, and property managers tackling heavier loads or more demanding attachments. Its articulated chassis, tight turning radius, and quick-attach system keep it nimble and efficient even in tight spaces.

500 SERIES

The Avant 500 series is a true multi-purpose workhorse, combining excellent lifting capacity and reach with outstanding agility. It's a go-to choice for landscapers, arborists, and property maintenance crews who need a machine that can handle heavy lifting and precise work in tight job sites. The telescopic boom and 4WD hydrostatic drive offer excellent control and stability on uneven terrain, while the rigid articulation joint keeps the machine balanced and safe. This series opens up even more attachment capabilities, making it a great all-rounder for daily operations in demanding environments.

700 SERIES

The Avant 700 series delivers a powerhouse combination of strength, speed, and comfort for professionals working in construction, tree care, and property maintenance. With a lifting capacity of 1400 kg and top speeds up to 26 km/h, this series is built for serious tasks on large job sites. The telescopic boom, high-flow hydraulics, and smooth drive system allow efficient use of heavy-duty attachments like pallet forks, stump grinders, or breakers. Comfort is key in the 700 series, with premium GT cab option, intuitive controls, and excellent visibility.

800 SERIES

The Avant 800 series is the most powerful and largest loader in the lineup, designed for demanding industrial, construction, and agricultural tasks. With a massive lift capacity up to 4190 lb and a 137.8 in lift height, it's ideal for handling large pallets, heavy materials, and high-reach jobs that would typically require a telehandler. Yet, it retains the compact agility and off-center boom design that define the Avant concept. Operators benefit from top-tier features like the GT cab, boom self-leveling, and advanced hydraulic systems. The 800 series is a true all-terrain performer that maintains a light footprint and excellent transportability.

OVER 200 ATTACHEMENTS

With more than 200 purpose-built attachments, Avant transforms one loader into a true multi-functional machine. Whether lifting, digging, sweeping, mowing, feeding, or cleaning, each attachment integrates seamlessly with the loader, allowing operators to switch tasks quickly and easily. This unmatched versatility helps businesses do more with fewer machines — saving time, space, and cost.

“We needed a unit that’s more capable than our compact tractor, with versatility to tackle hundreds of different jobs all without having to buy a different piece of equipment. Protecting customers’ sensitive turf in tight areas is also a make-or-break issue for us, which immediately takes our skid loader out of the picture. The Avant 528 with 150 Mini Digger far exceeded our expectations!”

– Chris, Budget Lawn Care & Snow Removal, Saskatoon, Canada

GRASSHOPPER

BUILT TO LAST

When we say a Grasshopper mower could be the last mower you'll ever need, we mean it. Because every mower is built to last, with commercial-grade features you won't find in most mowing equipment. When considering your next mower, look for features such as:

Features:

- Easy deck height adjustability
- Terrain-hugging comfort
- Standard Bumper
- Dedicated 4x rear discharge
- Premium Comfort seat
- Soft-touch, Hydra-Smooth™ levers
- Vigilant Operator Presence System™ combines roll protection standard (ROPS/OPS) with an adjustable seat belt for peace of mind

MIDMOUNT MOWERS

A 4-wheel power unit with the cutting deck mounted under the operator seat and forward of the engine. You'll appreciate our MidMount™ mowers for their durability, ease of transport, timesaving maneuverability and one-pass perfection, making them everything you want in a mower and everything you expect from a Grasshopper.

Features:

- Easy deck height adjustability
- Terrain-hugging comfort
- Standard Bumper
- Optional Rear Discharge

MAXTORQUE™ CLEAN DIESEL

Grasshopper MaxTorque™ diesel mowers will meet your emissions goals while enjoying convenient, cost-effective power and performance. Handle the toughest jobs with minimal fuel use and maintenance, plus EPA Tier 4 Final emissions compliance. No power-robbing after treatment required. MaxTorque™ takes clean diesel design to the next level, creating a power unit that channels all that torque into a quiet, comfortable ride with nimble handling, fast mowing speed and the superior, groomed cut you expect from a Grasshopper.

Key Benefits:

- **Cost-effective performance:** Diesel fuel's higher energy density delivers more efficiency without sacrificing power and torque. Compared to propane, diesel delivers over 50% more power per gallon equivalent.
- **More power, fewer emissions:** Clean diesel provides maximum power with fewer emissions in commercial and residential applications, creating lower levels of carbon monoxide and certain greenhouse gases than either propane or gasoline engines.
- **Fuel efficient productivity:** Fuel savings and enhanced productivity more than offset the per-gallon cost of diesel fuel versus others. In fact, you can save up to 650 gallons of fuel over 1,000 hours of use, and increase your potential for revenue.

POWERVAC™ COLLECTION SYSTEMS

Building on 60 years of airflow research, PowerVac™ Collection Systems are the most powerful and efficient vacuum collection systems available for turf, delivering professional, finished results that will turn your lawn into the showcase of the neighborhood. As the industry standard in collection technology, PowerVac™ ensures a clean sweep through wet grass, tall vegetation, tough weeds, dense leaves and other turf debris with one pass and no excessive overlap.

Quiet, deck-driven systems move a high volume of air to carry virtually any type of debris through the collection tube without a loud, expensive auxiliary motor. A dynamically balanced, trash-ingesting steel impeller compacts debris without clogging, so you can mow longer without emptying the collector.

SNOW REMOVAL

Take advantage of zero-turn maneuverability to clear sidewalks, driveways and parking lots quickly and easily with no wasted motion, getting in and out of places you thought only a walk-behind could reach. Equipped with one of our powerful snow removal implements, you'll create a complete, high-performance snow removal system that will deliver professional-grade performance season after season. Short-coupled mounting to the power unit positions the weight of the implement onto the drive wheels for superior traction in snow.

Attachment Options Include:

- Cleansweep Rotary Brooms
- Little Bully Dozer Blades
- V-Plow
- Driftbuster Snowthrower

ABOUT ICON EV

The ICON X Series combines premium comfort, advanced technology, and dependable electric performance in a stylish package designed for golf courses, acreage living, resorts, campgrounds, and neighborhood transportation. Powered by a high-torque 5kW electric motor and a maintenance-friendly lithium battery system, the X Series delivers smooth acceleration, extended range, and an exceptional driving experience. With premium standard features included from the factory, ICON X carts offer outstanding value without the need for costly upgrades.

Key Features of the ICON X Series:

- 51V / 105Ah ECO Lithium Battery
- 48V 5kW High-Torque 3-Phase Motor
- 450A Controller for Responsive Performance
- Four-Wheel Hydraulic Disc Brakes
- Electromagnetic Parking Brake System
- Independent Front Double Wishbone Suspension
- Integrated 10.1" Multimedia Touchscreen with Apple CarPlay
- Backup Camera
- Built-In SoundExtreme Soundbar
- Full LED Lighting Package
- Turn Signals, Hazard Lights & Horn
- Foldable DOT Windshield
- USB Charging Ports
- Tilt Steering Wheel
- Locking Glove Compartments
- Premium Seating with Foam-Molded Armrests
- Powder-Coated Steel Frame
- Aluminum Wheels
- Available in Multiple Metallic Color Options

ICON i20X

The ICON i20X is the ideal choice for golfers, lake properties, campgrounds, and homeowners looking for a premium two-passenger cart loaded with standard features. Its compact footprint makes it easy to maneuver while still delivering the comfort, technology, and performance expected from a luxury electric vehicle.

The i20X comes standard with a lithium battery system, independent suspension, touchscreen display, backup camera, premium sound system, and a complete golf package.

Features:

- 19 MPH Top Speed
- 20" Turf-Friendly Tires
- 4.33" Ground Clearance
- Premium Golf Package Included
- Dual Coolers and Sand Bottles
- Rear Golf Bag Rain Cover
- Multimedia Display with Apple CarPlay
- Backup Camera and Bluetooth Audio

ICON i40X

The ICON i40X takes everything customers love about the i20X and expands it into a versatile four-passenger platform. Perfect for families, campgrounds, resorts, acreage owners, and recreational properties, the i40X offers comfortable seating for four while maintaining the premium ride quality and technology found throughout the X Series.

Featuring a powerful lithium-powered drivetrain, independent suspension, multimedia touchscreen, backup camera, premium audio system, and enhanced safety features.

Features:

- 19 MPH Top Speed
- 23" Street Tires
- 6.6" Ground Clearance
- Rear Flip Seat with Storage
- 3-Point Seatbelts for All Passengers
- 10.1" Multimedia Display with Apple CarPlay
- SoundExtreme Premium Soundbar
- Storage Compartments Under Rear Seat
- Premium Foam-Molded Armrests and Seating

HD SERIES

ICON EV's HD models offer a robust and more substantial rear suspension that can carry a heavier payload up to 1500 lbs! The ICON i20U-HD is equipped with a 6' Swiss Cargo Box, 70V/105AH ECO Lithium battery, a 5KW motor & a 450 AMP controller for heavy duty performance!

Key Features of the ICON HD Series:

- 5KW motor
- 450A Controller
- 70V3/105A Lithium
- Onboard Charger
- 10" Wheels
- Heavy Duty Aluminum Body
- Utility Bed
- Hydraulic 4-Wheel Disc Breaks
- Brush Guard
- Tow Hitch
- Beacon Light
- DOT Safety Glass Windshield
- Electronic Windshield Wiper

EPIC FX SERIES

The EPIC FX Golf Cart Series is taking the industry by storm! Named 2025's Best New Golf Cart Model by The Golf Channel at the PGA Show, this street-legal LSV delivers next-level performance, comfort, and style. Enjoy a smooth ride, premium audio, elegant lighting, and advanced features like push-button start, backup camera, and 3-point restraints. Designed with automotive precision, the FX Golf Cart feels more like a luxury car than a traditional golf cart.

EPIC CARTS

Key Features of the ICON HD Series:

- 51.2V / 105Ah ECO Lithium Battery
- 6.3kW High-Performance AC Motor
- 450A Motor Controller
- 10.1" Digital Display Screen
- Integrated Backup Camera
- Built-In ECOXGEAR Marine-Grade Sound System
- Wireless Phone Charging Pad
- USB & USB-C Charging Ports
- Full LED Lighting Package
- Self-Cancelling Turn Signals & Hazard Lights
- DOT Approved Windshield
- Tilt Steering Wheel
- Locking Storage Compartments
- Front Storage Trunk (Frunk)
- Premium Diamond-Stitched Seating
- 3-Point Seat Belts
- Available in Multiple Metallic Color Options

EPIC E20FX

The EPIC E20FX delivers all the luxury, technology, and performance of the FX Series in a nimble two-passenger platform. Perfect for golfers, acreage owners, resorts, and recreational properties, the E20FX offers a smooth ride, outstanding maneuverability, and premium amenities as standard equipment.

Powered by a high-output AC motor and maintenance-free lithium battery system, the E20FX provides reliable performance while offering advanced features such as a touchscreen display, backup camera, wireless charging, and marine-grade audio system. Designed for customers who expect more than a basic golf cart, the E20FX combines practicality with luxury.

EPIC E40FX

The EPIC E40FX expands on the FX platform with comfortable forward-facing seating for four passengers while maintaining the same premium technology, performance, and luxury features that define the EPIC lineup.

Whether you're transporting family around the lake, moving guests through a resort, or simply enjoying a neighborhood cruise, the E40FX delivers exceptional comfort and versatility. Premium seating, abundant storage, advanced safety features, and an integrated sound system make every trip more enjoyable. Powered by a 6.3kW AC motor and lithium battery system, the E40FX offers strong acceleration, quiet operation, and dependable range.

PROGRESSIVE TURF EQUIPMENT

Progressive Turf Equipment provides innovative turf maintenance solutions designed to help golf courses, sports fields, municipalities, and landscaping professionals achieve healthier, more attractive turf. Progressive is known for delivering equipment that improves turf quality while reducing maintenance time and operating costs. With a focus on performance and reliability, Progressive Turf Equipment helps groundskeepers and turf managers maintain exceptional playing and growing surfaces.

Their product lineup includes:

- Aeration
- Seeding
- Top Dressing
- Turf Renovation Equipment

REDEXIM

Redexim is a leading manufacturer of professional turf maintenance equipment designed to help sports fields, golf courses, parks, and landscaping professionals achieve healthier, higher-performing turf. Their extensive product lineup includes aerators, overseeders, topdressers, verticutters, turf renovation equipment, and synthetic turf maintenance solutions. Built for durability and efficiency, Redexim equipment helps improve soil conditions, enhance turf health, and reduce maintenance challenges.

SMITHCO

Since 1967, Smithco has been committed to delivering exceptional service and products. From our impressive line up of sprayers to bunker rakes, infield groomers, turf sweepers, vacuums, greensrollers and fairway rollers, each and every product is designed, engineered, and built with quality, accessibility, and functionality in mind.

Smithco

BUNKER RAKES

Smithco pioneers bunker maintenance with rakes engineered for optimal traction, stability, and technology—all while maintaining an environmentally-conscious approach. Offering a choice between two- or three-wheel drive ensures uninterrupted productivity while navigating bunkers and sand traps. Additionally, the flexibility of electric or diesel engines showcases Smithco's commitment to providing the perfect equipment for every job.

Optional Attachments: Box Grader, Fan Rake Assembly, Fan Rake Attachment, Light Kit, Pro Rake, Qwitch, RBS Brush Set, RBS Mainframe with Qwitch, Sand Cultivator, Spring Tine Scarifier, Tournament Rake, and more.

INFIELD GROOMER

Transform your sports field with Smithco's Infield Groomers. Their range of groomers offer precise control, exceptional maneuverability, and the ability to seamlessly maintain your turf. Smithco's Infield Groomers are designed to create consistently smooth, level fields, enhancing player safety and game performance. Set the stage for excellence with Smithco's Infield Groomers, the trusted choice for top-quality field conditioning.

Optional Attachments: Box Grader, Coco Mat, Construction Leveling Blade, Drag Mat Kit (or with Finishing Brush), Earthway Spreader, Fixed Position Sand Blow, Flex Action Field Finisher (or with Finish Brush), Hydraulic Plow, Infield Finisher, Infield Sacrifier, Light Kit, Manual Angle Plows, Max flex Rake, Motorized Brush, Pro Rake, Qwitch, Rahn Groomer, RBS Brush Set, RBS Mainframe with Qwitch, RBS Brush Set, RBS Mainframe with Qwitch, RBS Roller Set, RBS Spiker Set, ROPS with Seat Belts, Sand Cultivator, Spring Tine Scarifier, Steel Knife Blade Scarifier, Tournament Rake, Typhoon Plumbing System, Weed Cultivator.

TURF VAC

Smithco Turf Sweepers do more than just keep your grounds looking their best—they support the health and playability of any turf area, from golf courses and sports fields to parks and municipal spaces. Removing debris helps prevent turf disease, improves surface consistency, and ensures a clean, welcoming environment for players, visitors, and the community. With Smithco, you get reliable equipment that delivers both visual appeal and long-term turf health across all your green spaces.

Optional Attachments: Rubber Finger Reel, Nylon Brush Head

GREENSROLLER

Unleash the potential of your greens with Smithco's Greensrollers. Renowned for their exceptional traction, safety features, and wide rolling areas—our Greensrollers deliver a perfect surface every time. Trusted by professionals at prestigious tournaments like the Ryder Cup, PGA Championships, and U.S. Opens, Smithco's Greensrollers redefine excellence in golf course maintenance.

Optional Attachments: Light Kit

TURF

TURFCO

TurfcO has been a trusted name in the turf industry for decades, providing innovative equipment designed to improve efficiency and results for golf courses, sports fields, municipalities, and landscape professionals. Known for durability, precision, and ease of operation, TurfcO equipment helps grounds crews save time while maintaining high-quality playing surfaces and landscapes

TORRENT 4 TURBINE BLOWER

The powerful, patent-pending TurfcO Torrent 4 Turbine Blower delivers unprecedented control over air speed, air direction, noise management, and fuel consumption. It's designed with a focus on making your staff as productive as possible, freeing you up for other tasks. With the new one-touch Auto Rotate mode, operators simply press a button, and the nozzle automatically adjusts to tackle the debris at hand—eliminating guesswork to optimize productivity with a turbine blower.

Key Features:

- Fast nozzle rotation speed dramatically increases productivity
- Patented instant Idle Down/Resume button saves on fuel consumption and reduces noise compared to other turbine blowers.
- Wireless controller and optional MagnaPoint™ Technology, to dial in the optimal nozzle angle for unprecedented productivity every time.
- Remote Start/Stop, so operators can quickly start up or shut down the engine with the push of a button on the wireless controller.
- Closed-off deck dramatically reduces debris pickup, decreasing wear on the turbine blower.
- Heavy-duty, 1/4" steel frame, rugged tongue, and adjustable hitch.
- Powerful 747cc KOHLER Command PRO® EFI engine with electric start, electronic throttle body, 20 Amp Charging system, and standard Donaldson air cleaner.
- Powerful air volume & superior velocity, and multiple air speed settings.
- Optional Auxiliary Manual Controls keep you operating if wireless controller gets misplaced.

WIDESPIN 1550 BROADCAST TOPDRESSER

The TurfcO WideSpin™ 1550 was designed to help you achieve your agronomic goals, increase staff productivity and free up your time. With TurfcO's patented hydraulic system and spinner design, along with our Smart Controller, you can be confident you're getting the application you want every time. Reduce up to 720 passes per year and minimize turf traffic to achieve the most playable, beautiful golf course.

Key Features:

- Save up to nine different presets with upgraded smart control and display.
- Preset different applications for greens, tees, and approaches. Customize by season and set different widths while keeping the same rate.
- Drive topdressing down into the turf canopy by adjusting the spinner angle, minimizing the need for brushing and eliminating variations in moisture content (spreads the same wet or dry).
- Large, galvanized steel hopper has increased capacity and is wider, making it easier to fill and less often!

TRI WAVE SEEDER

Damaged turf on your #7 tee? Weak areas on your #2 and #12 greens? Want to improve the overall stand of grass on your high traffic areas? With the TriWave™ Overseeder you can repair, restore and renew the beauty of your course faster and with better results than ever before. Quickly hook-up to your favorite turf vehicle and go. The TriWave's 1½-inch seed spacing, combined with two independent floating heads, greatly increases germination by following the contours of the terrain with minimum disruption to turf.

Key Features:

- TurfcO TriWave™ series of overseeders includes revolutionary patent-pending floating heads that follow the controls of the ground so you won't miss the low spots or damage the high spots or unmarked sprinkler heads.
- Easy to switch out green blades to fairway blades.
- Patented quick-adjust depth control is one of the innovations developed to make overseeding more effective and time productive. With quick-adjust you can easily adjust how deep you want to deliver seeds based on the varying conditions.
- WaveBlade technology, counter-rotating at 900RPM, creates a clean, optimal square slit while minimizing turf disruption.

AMPLE AG SOLUTIONS

Designed specifically for cold climate operations. These units are specifically fabricated for operators who won't tolerate the risk of their stock being deprived of water. This Northern Series of watering bowls is built for dependability in the harshest climates.

AC 50 (50 HEAD)

DIMENSIONS
26.5" L X 22" W X 24" T.
CAPACITY
5 Gallons of Water
ELEMENT
375W

AC 100 (100 HEAD)

DIMENSIONS
28" L X 29" W X 24" T.
CAPACITY
10 Gallons of Water
ELEMENT
375W

AC 150 (150 HEAD)

DIMENSIONS
36" L X 26" W X 24" T.
CAPACITY
13 Gallons of Water
ELEMENT
500W

AC 300 (300 HEAD)

DIMENSIONS
40" L X 40" W X 24" T.
CAPACITY
26 Gallons of Water
ELEMENT
1000W

Key Features:

- Spray foam insulated
- Stainless steel sink (12 gauge), float cover, bolts & fittings
- Black powder-coated steel body (14 gauge)
- 2-piece wide access door, easy for installation and easy thermostat access
- Submerged heating element
- Top of the line float and thermostat,
- Tapered sink and large drain for easy cleanout
- Exhaust door for effortless thawing
- Pre-wired plug & switch
- Customizable element placement (submerged, or under the bowl)
- CSA Certification

BOSHART

Boshart Water Systems offers a complete range of dependable water well and plumbing products, including hydrants, well caps, fittings, and valves. Designed for residential, agricultural, and commercial applications, their products are built to provide reliable performance in demanding conditions. Contractors and property owners trust Boshart for quality solutions that help keep water systems running efficiently.

FRANKLIN ELECTRIC

Franklin Electric is a trusted leader in water pumping solutions, offering high-performance submersible, centrifugal, and booster pumps for residential, agricultural, and commercial applications. Built for durability and efficiency, their pumps are designed to deliver reliable water movement in even the most demanding environments. With a reputation for innovation and quality, Franklin Electric products help keep water systems operating at peak performance.

RENTALS

Clark's Supply offers a wide selection of reliable rental equipment to get the job done whether it's a weekend backyard project or a commercial jobsite.

WE SERVICE WHAT WE SELL

At Clark's Supply & Service, we don't just sell equipment—we stand behind it with expert service and support. Our trained technicians are experienced with the products and equipment we carry, ensuring quality repairs, maintenance, and troubleshooting when you need it most. With access to the right parts and the knowledge to keep your equipment running at its best, we're your trusted partner long after the sale.

TURF EQUIPMENT

- **Comprehensive Equipment Inspections**
- **Blade & Reel Sharpening**
- **Engine & Hydraulic Repairs**
- **End of Season/Preventative Maintenance Checks**

PRESSURE WASHERS

- **Full System Diagnostics**
- **Smoke & Pressure Tests**
- **Heater Coil & Burners**
- **Engine and Motor Servicing**
- **Winterizing/Preventative Maintenance**

VAC TRUCK BURNER KIT

- **Burner System Diagnostics**
- **Pressure and Temperature Calibration**
- **Combustion Chamber Cleaning**
- **Preventative Maintenance**

GROUND WATER PUMP

- **Pump Rebuilds**
- **Seal and Gasket Changes**
- **Performance Testing and Flow Verification**
- **Scheduled Preventative Maintenance**
