## BRASS TANK TEE / MANIFOLD ACCESSORIES - UNION CONNECTIONS

- Union connectors for easy installation of inlet line (pump) and discharge (house)
- Available in barbed (poly pipe) and solder configurations
- Insert, pex and solder connections available. The solder connection is designed for 1" copper pipe (external) 3/4" copper pipe (internal)
- American Standard BUNA N O-ring used to ensure watertite connection
- Replacement O-rings available

HL-075-100

HLXL-075-100

\* These hydrant elbows do not have the raised boss as shown in the picture.  
\*\* These hydrant elbows have been manufactured with 8 serrations to allow for double clamping of the poly pipe, and have been redesigned to have a smooth 90 degree sweep elbow water channel which minimizes friction loss and allows your yard hydrant to perform to its full potential flow rate.
