

## ANY FLOW® SERIES

### FROST PROOF YARD HYDRANT FEATURES/BENEFITS

The Merrill *Any Flow*® Yard Hydrant gives year 'round water service. It drains below the frostline when shut off, and features a powder coated head which enhances resistance to corrosion, UV and abrasion. The *Any Flow*® hydrant has had only a few improvements since 1949. These improvements, the exclusive features and benefits, and the time-proven basic design, is why we believe the *Any Flow*® is the best yard hydrant manufactured by anyone.

- \* (1) **ALL-WEATHER POWDER-COAT FINISH LEVER CONTROL** operates by cam principle and provides variable flow from trickle to full force.  
**BENEFIT:** Variable flow with no lock that rusts in place.
- (2) **DRAW STRAPS** are made of 1040 hot rolled steel which is much harder (Brinell 175/200) and stronger. Greatly reduces wear of straps and eliminates side pull on operating rod.  
**BENEFIT:** Longest operating life.
- \* (3) **STAINLESS STEEL OPERATING STEM** is ground and polished and will not cut out packing and packing nut, like brass rod used by other companies.  
**BENEFIT:** Best material for longest operating life.
- (4) **HEAVY-DUTY SOLID BRASS OR NO-LEAD BRASS HOSE ADAPTER** threaded for standard 3/4" hose coupling.  
**BENEFIT:** Standard hose fitting readily available.
- (5) **ALL-WEATHER POWDER-COAT FINISH EXTRA THICK WALLED HEAD CASTING** greatly reduces breakage and ensures longer life.  
**BENEFIT:** Time-proven heavy-duty design takes years of abuse.
- \* (6) **PIVOT CONNECTOR WITH TWO NUTS** provides simple positive adjustment and eliminates unreliable set screws.  
**BENEFIT:** Adjustable for years, not like rusted in set screws.
- (7) **NO EXPOSED THREADS** on galvanized/stainless steel rod and threads on galvanized/stainless steel pipe are coated with bitumastic to prevent rusting and prolong life of hydrant.  
**BENEFIT:** No exposed steel to rust.
- (8) **EXTRA THICK WALLED VALVE BODY** to ensure longer life and trouble free service.  
**BENEFIT:** Time-proven heavy-duty design.
- \* (9) **SELF ADJUSTING PLUNGER** ensures even flow from trickle to full force. Closes drain at any flow rate and opens drain in off position to prevent freezing.  
**BENEFIT:** Longest operating life available in the industry by over 200%.
- \* (10) **KRATON™ G CUP SEALS** provides a much longer life than leather, close tolerance uniformity, unaffected by chemicals and passed a 1 million cycle test.  
**BENEFIT:** Longest operating seals in the industry.
- (11) **3/8L BEVELED BIBB WASHER** made of SBR compound with 90 Durometer hardness, assures positive shut-off and longer life than soft one piece plunger.  
**BENEFIT:** Longer operating life than all competitors.
- \* (12) **STAINLESS STEEL SPRING** takes up slack of normal wear and eliminates numerous adjustments of hydrant head linkage.  
**BENEFIT:** Automatically adjusts for years of service.
- \* (13) **SWIVEL PARTS** permit withdrawal of moving parts without digging up hydrant. Nothing in head assembly to disconnect or adjust when removing. Simply unscrew entire head assembly from galvanized pipe and pull up valve stem with plunger for inspection.  
**BENEFIT:** If parts don't swivel, they could be unscrewed from rod when taking off head above ground.

#### \*EXCLUSIVE MERRILL QUALITY FEATURES

*Any Flow*® No-Lead Model  
Certified to NSF/ANSI/CAN 372 Standard

Merrill's AF7504 or 4' Bury Hydrant is about 6' - 9-1/2" long.  
4' is buried and 34" is above ground.
