

# FORGED BRASS SAE 45° FLARE FITTINGS (B45SAE)

## Applications:

LP-Gas, Natural Gas, Refrigeration, Power Steering, Gasoline. Used with Copper, aluminum, and Welded Steel Hydraulic Tube that can be flared. Use long nut for vibration, forged for extreme cold.

**Note: Fairview 40 Series Flare Nuts are hot forged and marked C37700 in accordance with CAN/CSA-B149 gas installation code requirements.**

**Selected items are available in Lead-Free Brass (Special Order)**

## Working Pressure:

| Dash Size | Tube O.D. | PSI  | Copper<br>Tube Wall |
|-----------|-----------|------|---------------------|
| -2        | 1/8       | 2800 | .030                |
| -3        | 3/16      | 1900 | .030                |
| -4        | 1/4       | 1400 | .030                |
| -5        | 5/16      | 1200 | .032                |
| -6        | 3/8       | 1000 | .032                |
| -8        | 1/2       | 750  | .032                |
| -10       | 5/8       | 650  | .035                |
| -12       | 3/4       | 550  | .035                |

## Working Temperature:

-65°F (-54°C) to 250°F (120°C)
