

Gizmode®

INNOVATIONS

Water does the most damage to homes when it goes undetected. Don't let another day go by without the peace-of-mind a house protected by Gizmode® Water Alarms can bring.

Get Your Water Alarm Now!

Gizmode® Water Alarms are small and discreet enough to use in every and any problem spot in your home.

Your home is 85% more likely to be damaged by water than by fire. **Alarmed?**

Water: The silent destroyer

Carpeting.

Wood.

Fiberglass Insulation.

*Drywall. **Plaster.***

Your home is made of these materials. All it takes to destroy any of these elements is a little water. Water corrodes, rots and provides a fertile breeding ground for illness-causing bacteria and mold. Yet your home is surrounded by water. The relentless forces of nature pound on your home's exterior. And hundreds of feet of pipes carry water to almost every room inside your home. Every minute of every day your home is at risk. Detecting water problems before they cause damage is essential to keeping your home protected and healthy.

The Original Water Alarm SKU: WA01

Product Description

The Original Water Alarm is the early warning for leaky pipes, faulty water heaters, dishwashers and washing machines. Designed and introduced in 1995, it was and still is the most effective Water leak Detector available. It's unique look and innovative moisture detection capabilities are unparalleled. Use the Water Alarm to detect even the smallest amounts of moisture before mold, mildew and serious water damage can occur. It can be placed near bath tubs, toilets, beneath sinks, or it can be used as a basement water alarm for early notification of flooding or leaky pipes. Most problems start with a small leak and grow to a disastrous water flow. Use the Original Water Alarm to detect those small leaks before they have a chance to get out of control.

- **Incredibly loud alarm (110+ dB) can be heard in cabinets and basements for up to 72 hours**
- Effective - it can detect the slightest amount of moisture - no standing water required
- Easy to Use - set anywhere problem moisture could occur
- Very Affordable - get enough units to protect your entire home for less than your insurance deductible
- Long Battery Life - new batteries recommended every 2+ years - chirps when batteries are low
- Uses a standard 9-Volt battery
- Remote sump/hot tub and sensor pad add-on adapters available
- Can use both the SA01 and SP01 attachment sensors
- Completely electronic, no moving parts to fail or wear out
- 2.75" H x 3" D
- 1 year manufacturer's warranty

The Water Alarm SKU: WA02

Product Description

The Water Alarm is the early warning for leaky pipes, faulty water heaters, dishwashers and washing machines. Introduced as the lower profile alternative to the Original Water Alarm, it includes two expansion ports to easily connect the SP01 Sensor Pad for multiple water leak detection areas. Like the Original, you can use the Water Alarm to detect even the smallest amounts of moisture before mold, mildew and serious water damage can occur. It can be placed near bath tubs, toilets, beneath sinks, or it can be used as a basement water alarm for early notification of flooding or leaky pipes. Most problems start with a small leak and grow to a disastrous water flow. Use the Water Alarm to detect those small leaks before they have a chance to get out of control.

- **Incredibly loud alarm (110+ dB) can be heard in cabinets and basements for up to 72 hours**
- Effective - it can detect the slightest amount of moisture - no standing water required
- Easy to Use - set anywhere problem moisture could occur
- Very Affordable - get enough units to protect your entire home for less than your insurance deductible
- Long Battery Life - new batteries recommended every 2+ years - chirps when batteries are low
- Uses a standard 9-Volt battery
- Remote sensor pad add-on adapters available
- Can use the SP01 attachment sensors on both expansion ports simultaneously
- Completely electronic, no moving parts to fail or wear out
- 1.75" H x 3.25" W x 3.25" L
- 1 year manufacturer's warranty

The Water Screamer SKU: WA03

Product Description

The Water Screamer is the LOUDEST early warning device at over 130db. Nothing else comes close. Introduced by customer demand, it includes one expansion port to easily connect the SP01 Sensor Pad for multiple water leak sensing areas. Like the Original, you can use the Water Screamer to detect even the smallest amounts of moisture. It can be placed near bath tubs, toilets, beneath sinks, or it can be used as a basement water alarm for early notification of flooding or leaky pipes. It is highly recommended for the mechanical room, attic, and other remote areas where the loudest alarm is critical to detecting a water event. Those individuals that may be hard of hearing should consider the Water Screamer exclusively. There is no place in your home that the Water Screamer cannot be heard. Detect those leaks EARLY and

ensure that your valuables are safe.

- **Extra-loud SIREN (130+ dB) can be heard anywhere in the home or property for up to 72 hours**
- High-end commercial grade design for unprecedented reliability and protection
- Effective - it can detect the slightest amount of moisture - no standing water required
- Easy to Use - set anywhere problem moisture could occur
- Recommended for remote locations and basement floods and those that may be hard of hearing
- Long Battery Life - new batteries recommended every 2+ years - chirps when batteries are low
- Uses up to 3 standard 9-Volt batteries (1 battery = 24 hrs, 2 batteries = 48 hrs, 3 batteries = 72 hrs of continuous 130db alarm)
- Remote sump/hot tub and sensor pad add-on adapters available
- Can use both the SA01 and SP01 attachment sensors
- Completely electronic, no moving parts to fail or wear out
- 2.5" H x 4.5" D
- 1 year manufacturer's warranty

Sensor Pad Attachment SKU: SP01

Product Description

The Sensor Pad Attachment has many uses and extends the reach and access to all Gizmode Innovations Water Alarm products. It acts as an A/C condensation pan overflow alert when used with the adjustable stands. The SP01 is perfect for tight spaces and low profile areas, i.e. under the refrigerator or under the dishwasher panel. The SP01 can be used with or without the included stands. In addition, the attachment unit has a secondary port, which allows multiple SP01's to be "daisy-chained" to cover multiple water detection areas from a single alarm.

- Only for use with Gizmode Water Alarms, WA01, WA02, and WA03
- Perfectly suited for A/C condensation pans with adjustable stands (set to any height above pan)
- Can be used with or without the included stands for ultra-low profile areas
- Daisy-chain multiple sensors to a single Water Alarm for multiple detection areas
- Package includes 9 feet of extension wire, 6 inch pigtail (for connection to the WA01 Water Alarm), Sensor Pad, and 1 adjustable height stand plus 1 spare stand
- Easily attach to the bottom of any Gizmode Water Alarm by using the included connectors
- Completely electronic, no moving parts to fail or wear out
- Pad = 2cm H x 1" W x 2" L
- 1 year manufacturer's warranty

Sump Pump / Bathtub Attachment SKU: SA01

Product Description

This attachment acts as a sump pump overflow warning, bathtub full alert, and hot tub full alert. In addition, it can be used in sinks, wells, aquariums, hot tubs, swimming pools, or any container that could overflow and cause water flooding. You can easily attach it to the bottom of the WA01 and WA03 by gently sliding the open end of each connector to the sensor legs.

- Only for use with Gizmode Water Alarms, WA01 and WA03
- Perfectly suited for any container that may overflow and cause water damage
- Package includes 6 feet of extension wire and fill alert probe
- Easy to Use - set anywhere problem moisture could occur
- Completely electronic, no moving parts to fail or wear out
- 4" H x 1" D
- 1 year manufacturer's warranty
