

(SS)HL & (SS)HT SERIES - HYDRANT FITTINGS

FEATURES:

- Commonly used to connect waterlines to a hydrant underground.
- The pad raises the pipe and clamp off of the ground surface to prevent abrasion and wear.
- Tapped fittings can be used to install several types of attachments including valves, pressure gauges, and temperature sensors.

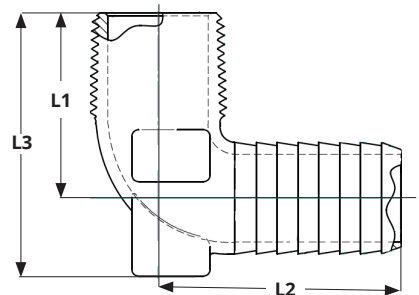

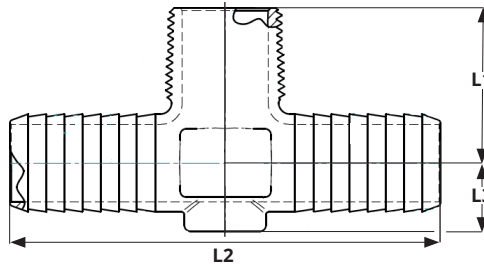

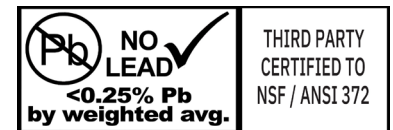

SPECIFICATIONS:

- For use with ASTM D2239 PE plastic pipe (Standard Specification for Polyethylene (PE) Pipe (SIDR-PR) Based on Controlled Inside Diameter).
- Designed for use with 50 PSI utility pipe, 75 and 100 PSI pipe, and any other PE pipe with inside diameters conforming to ASTM D2239.
- System operating pressures and temperatures are limited by the maximum operating pressures and temperatures of the ASTM D2239 PE pipe. Always refer to the PE pipe manufacturer's pressure and temperature ratings.
- Insert fittings are intended for cold water applications, including irrigation, well service, and potable water applications. These products are not to be used with compressed gases.
- Fittings must be protected from freezing temperatures where fluid expansion due to freezing could occur.

SSHL & SSHT SERIES - 304SS HYDRANT FITTINGS

- Made from 304 Stainless Steel
- NSF/ANSI Standard 372 Certified (Drinking Water System Components - Lead Contant) - SS alloys do not contain any Pb, 0.00% Pb.

HL & HT SERIES - NL BRONZE HYDRANT FITTINGS

- Made from C89833 or C89844 no lead bronze
- Tapped fittings have a 1/4" FPT port which conforms to ASME B1.20.1
- NSF/ANSI Standard 372 Certified (Drinking Water System Components - Lead Contant) - No lead test criteria <0.25% Pb by weighted average.

For operating pressures over the stated maximum pressure or for temperatures over 73.4 °F (23 °C), independent testing by the end user is recommended. It is solely the user's responsibility to determine the suitability of the fitting for the intended service.

Pressure and temperature rating charts should be used as a guide only.
