

## INSTALLATION INSTRUCTIONS:

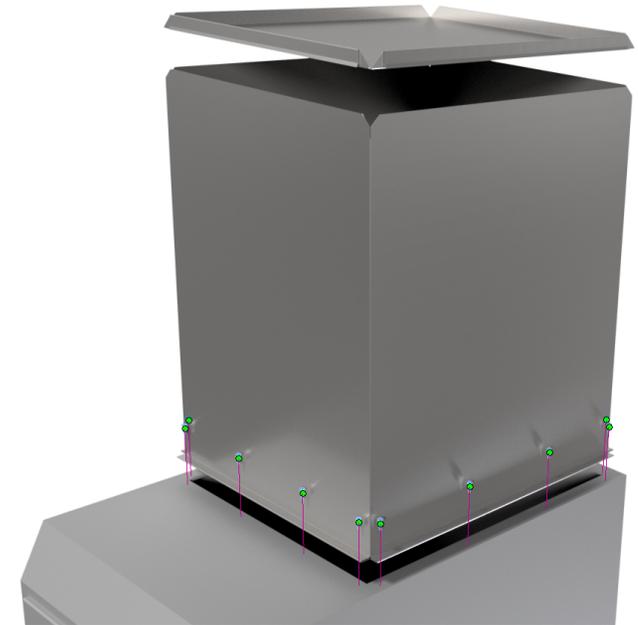

- 1- Attach end cap to plenum first, see end cap installation instructions.
- 2- Line up plenum with cutout on top of furnace.
- 3- Use four 1/2" sheet metal screws on each flange to secure it to the top of the furnace.

### **NOTE:**

Used for residential applications. Industrial tape, foil, or sealer can be used.

### **WARNING!!**

*Improper installation may result in damage to product or inefficiencies in the system. Use proper PPE and equipment during cutting, bending, and installation processes. If local codes differ from these instructions follow local building codes.*
