# Now is the time to put regular people first!

**For eight years, Norway has had a government that has only increased social inequality. The wealthiest have been first in line. Now must be the time to put regular people first.**

- Work for everyone is the Norwegian Labour Party's number one priority. A socially just society is a society where more people have good, stable and secure jobs. We will create secure workplaces across the country.
- The Norwegian Labour Party will ensure that we live in a community where we all support each other, regardless of your background, where you live or your financial situation. Everyone must have the same opportunities. Everyone must receive help when they are ill and care when they are old. We must have enough teachers in our schools and enough caregivers for our elderly and infirm.
- We will reach Norway's environmental targets! Our socially just environmental policy will cut emissions and create new jobs.

We are stronger when we stand together.

Vote for the Norwegian Labour Party on 13 September!

Every Norwegian citizen who will be above the age of 18 by the end of 2021 can vote in this year's parliamentary election. All you need to vote is to remember to bring along proof of identity.
