There are now more children enrolled in kindergarden than ever before, and there are more teachers in our schools. There is more personell and an increase in quality in our elederly care. And we have invested massively in parks, sports facilities, indoor swimming pool facilities, and public libraries - in all areas of Oslo.

## **Security in uncertain times**

Today, we are all affected by high interest rates and inflation. That is why Labour will continueto ensure that social activities are free for all children, that access to leisure facilities is affordable, and that high-quality welfare services are available to everyone. We will protect jobs and generate more new employment to ensure that no one is left out.

We aim to shatter every record providing a massive number of part-time jobs and summer jobs for youth. Labour will always be the party to stand up for secure jobs and safe workplaces, on the basis of permanent full-time employment contracts.
