

STARSTREAM VARIABLE ANNUITY

Daily Optional Benefit

StarStream® with Daily can capture additional investment gains with daily Step-ups (Daily Step-ups lock in at the end of each benefit quarter) to help increase the amount of income you can receive. This can help lock in greater income in volatile markets because of the greater frequency of Step-up opportunities.

Grow your Protected Benefit Base each year by the greater of these features:

Roll-ups³

6% (simple interest) Roll-ups in the first 10 years when withdrawals are not taken can increase the Protected Benefit Base.

Step-ups³

Grow your Protected Benefit Base with Daily Step-ups to lock in investment gains when markets perform well.

Maximum Protected Annual Withdrawal (MPAW) Rates

The percentage used to calculate the MPAW Amount. The table shows the MPAW Rate you would receive at your (the younger covered life's) age of first lifetime withdrawal.

Age range	Single	Joint
45-59	3.25%	2.75%
60-64	4.45%	3.95%
65-69	5.85%	5.35%
70-74	6.05%	5.55%
75-79	6.25%	5.75%
80+	6.30%	5.80%

The Deferral Credit⁴ advantage

If you defer withdrawals for 5 or more years, Deferral Credits increase your Maximum Protected Annual Withdrawal (MPAW) rates.

Deferral Years	Deferral Credit (Single/Joint)
5-years +	0.40% / 0.20%

Putting it all together

This is how Roll-ups and Deferral Credits can grow your withdrawals over time.⁵

If you defer withdrawals, the Roll-up may increase your Protected Benefit Base in addition to Deferral Credits that will increase your MPAW Rate, giving you a higher withdrawal rate.

Hypothetical Withdrawal Amount(s) show the dollar amount you could take immediately,⁶ and if you defer withdrawals for 5 or 10 years based on your age at the first Protected Lifetime Withdrawal assuming the Protected Benefit Base has grown by the 6% Roll-up for the period listed and the Deferral Credit Rate has been added to the MPAW Rate.

Initial purchase payment: \$100,000

Age range	Hypothetical Withdrawal Amount	Hypothetical Withdrawal Amounts after deferring 5-Years	Hypothetical Withdrawal Amounts after deferring 10-Years
45-59	\$3,250	\$4,745	\$5,840
60-64	\$4,450	\$6,305	\$7,760
65-69	\$5,850	\$8,125	\$10,000
70-74	\$6,050	\$8,385	\$10,320
75-79	\$6,250	\$8,645	\$10,640
80+	\$6,300	\$8,710	\$10,720

These values are provided for illustrative purposes only, using the single life option, based on the assumptions included. Actual values may vary.

Daily Step-ups

Daily Step-Ups vs. Annual Step-Ups

Daily Step-Up opportunities: 252*

Annual Step-Up opportunities: 1

* This is the approximate number of days that the U.S. stock market is open in a typical year.

Increase your Protected Benefit Base by locking in the highest daily Contract Value — up to 252 opportunities per year — or by receiving a guaranteed 6% simple interest Roll-up, whichever provides the greater increase.

This graph is hypothetical as it is not indicative of any particular investment or performance. This is only intended to show the mechanics of this feature.

A universe of possibilities®

¹ If an Optional Benefit is elected, Owner and Annuitant must be the same person and any covered life must fall within the allowable age range of the benefit at election.

Only one Optional Benefit may be elected per contract and may not be changed once elected. Optional Benefits are available for an additional fee.

² After the 5th benefit year (Charge Freeze Period), the Optional Benefit fee may increase up to a maximum of 2.50%, with no more than a Maximum Annual Optional Benefit Fee Adjustment of 0.40% increase per Benefit Year. The Optional Benefit fee is calculated as a percentage of the Protected Benefit Base but is deducted from the contract's account value. You may opt out of future fee increases; however, doing so will forfeit any future increases to your Protected Benefit Base, including Roll-ups, Step-ups, and Deferral Credits. Optional Benefits may be cancelled following the Benefit Cancellation Window after the 7th Benefit Date Yearly Anniversary. Following cancellation the Optional Benefit Fee will no longer be charged.

³ The initial Protected Benefit Base equals the initial purchase payment. Each year, it increases to the greater of the Roll-up Base or Step-up Base, which lock in the highest daily value at the end of each benefit quarter. Excess withdrawals and the Pre-lifetime Withdrawal reduce the Protected Benefit Base proportionately and additional purchase payments increase it by the same amount as the payment.

⁴ Deferral Credits are applied after the deferral credit period to the Maximum Protected Annual Withdrawal Rate set at the first Protected Lifetime Withdrawal. Credits apply only to the Protected Benefit Base tied to purchase payments made before the first benefit anniversary. All withdrawals — except the Pre-Lifetime Withdrawal — will stop Deferral Credits from applying.

⁵ MPAW Rates listed are for the Single version of the benefit. For joint MPAW Rates, please contact your AuguStar Representative. Hypothetical Deferral Income shows potential withdrawal amounts, and assumes Deferral Credits and 6% Roll-up are applied, but assumes no Step-ups, and no additional premiums or withdrawals. Hypothetical deferral withdrawal amounts are not guaranteed, are not MPAW amounts, and are shown for illustrative purposes only.

⁶ This is the Withdrawal amount that is the greater of the MPAW or Required Minimum Distributions (RMD) taken that is not considered an Excess Withdrawal or the Pre-Lifetime Withdrawal.

Variable annuities are sold by prospectuses, which contain more complete information regarding fees, withdrawal charges and other costs that may apply.

FOR USE WITH THE GENERAL PUBLIC

Variable annuities are long-term investments designed for retirement, subject to market risk, and may lose value. Please read the product and fund prospectuses carefully before you invest or send money. Contact your financial professional or visit augustarfinancial.com to obtain current prospectuses. Investors should consider the investment objectives, strategies, risk factors and charges and expenses of the underlying variable portfolios carefully before investing. The fund prospectus contains this and other information about the underlying variable portfolios.

There is no additional tax-deferral benefit for contracts purchased in an IRA or other tax-qualified retirement plans because such retirement plans already have tax-deferred status. An annuity should only be purchased in an IRA or qualified plan if the contract owner values some of the other features of the annuity and is willing to incur any additional costs associated with the annuity.

Investments in variable annuities are subject to market risks, including the potential loss of principal. Unit values will fluctuate with the performance of underlying investments, and returns may vary by asset class, investment style, or prevailing economic conditions. Certain asset classes may exhibit greater volatility, and bond portfolios are exposed to interest rate, credit, inflation, and market risks. Tax considerations, including differences in treatment of capital gains and dividends, as well as applicable fees, may affect investment outcomes.

Early withdrawals may be subject to withdrawal charges. Withdrawals may be subject to ordinary income tax and, if taken prior to age 59½, an additional 10% federal tax may apply. Withdrawals may reduce the death benefit, full Withdrawal Amount and Optional Benefit amounts.

Guarantees are based upon the claims-paying ability of AuguStar Life Insurance Company, a member of the Constellation Insurance, Inc. family of companies. Guarantees do not apply to the investment performance or account value of the underlying variable portfolios. As with any investment, investing in variable portfolios involves risk, including possible loss of principal.

Product availability, including features and benefits, varies by state. Please contact your financial professional for current availability and information. Issuer is not licensed to conduct business in New York.
