## HuddleSHOT

## **Current Release**

## HuddleSHOT 1.0.0

August 15, 2019

Notes

- Initial release.
- Speaker left and right channels are currently labeled from the unit's perspective, not the user's perspective.
- Video artifacts can appear in the USB and IP streaming outputs when the system is in full dewarp at 1x zoom, the IP streaming settings are above 720p and/or 15fps, and the IP stream is being actively consumed.
- Sound Bar Mode currently delivers a mixed left/right signal out of the left channel.
- When connected to a Mac, USB playback audio may become distorted over time.
