Vaddio Deployment Tool Software Application

Simplify and Streamline Vaddio Equipment Installations

The Vaddio Deployment Tool is your newest time-saving stress reliever. It greatly simplifies equipment installation by providing device discovery, simple status monitoring and control, mass firmware updates, remote configuration management, and easy troubleshooting.

This tool is designed to help with many of the painful parts of deployment and management of equipment – right from your desk. This Windows-installable software application allows you to find all the compatible Vaddio devices on a network with the click of a button and conduct multiple actions all at one time.

The Vaddio Deployment Tool is sure to help AV integrators and AV managers save time and money, and provide the best installation experience in the market.

Simplify Deployments and Keep AV Installations **Running Smoothly**

The Vaddio Deployment Tool streamlines your life and saves time. Here's how.

Configuration management lets you copy set-up configurations and apply them to other devices. So if you're installing the same equipment in a dozen rooms, the Deployment Tool makes it much easier.

Device discovery lets you easily find devices and useful information such as current firmware version, IP address, domain name, location, and status such as if mute is enabled.

Mass firmware updates let you update hundreds of devices with minimal effort, all at one time. This saves many hours, especially if you're updating a large installation.

Remote troubleshooting solves many of the most common AV issues - reboot devices, toggle mute state, update firmware, see if a device is offline, or check to make sure the USB or IP stream is active.

EASY TO USE

Vaddio engineered this tool to be easy and intuitive with almost no training needed. Dealer feedback drove the design to provide the features you need to get in, get the job done, and get out quickly. Submitting your feedback via the app tool allows Vaddio to improve future versions to better fit your needs.

SECURE

The Vaddio Deployment Tool requires authentication from each connected device and is an installed application. The application does not collect or transmit audio, video, or shared content, so meeting and business data remains private and secure. You can download firmware and install new equipment on sites without needing internet access. Vaddio does not harvest any data or benefit from giving away this tool other than making your experience better.

FREE

Best of all - it's free! No licenses, invoices or maintenance fees. Start making things easy today with the Vaddio Deployment Tool.
