Subject: PoE++ Midspan Power Injector Transition Notification

Due to component end of life and introduction of new offerings, starting in March 2021, Vaddio will begin transitioning its current PoE++ Midspan Power Injector to a new one-piece model simplifying installation.

The new model features similar performance in addition to a reduction in electrical noise. Legacy units may be ordered as supplies last, please call Vaddio to check on availability. Otherwise, the Vaddio customer care team will automatically transition legacy PoE++ Midspan Power Injector orders and registrations to the corresponding new part number as they become available.

A list of cross-referenced part numbers is available below for your reference.

<b>Description</b>	<b>Discontinued P/N*</b>	<b>Replacement P/N*</b>
<b>PS LT POE++ MIDSPAN POWER INJECTOR</b>	<b>451-2150-052</b>	<b>451-2151-052</b>
