September 10, 2021

Improvements

- The gain setting now persists across reboots.

Release History

EasyIP CeilingMIC D 1.03

June 24, 2020

Notes

- Initial release.

Firmware Update Instructions – EasyIP TableMIC D

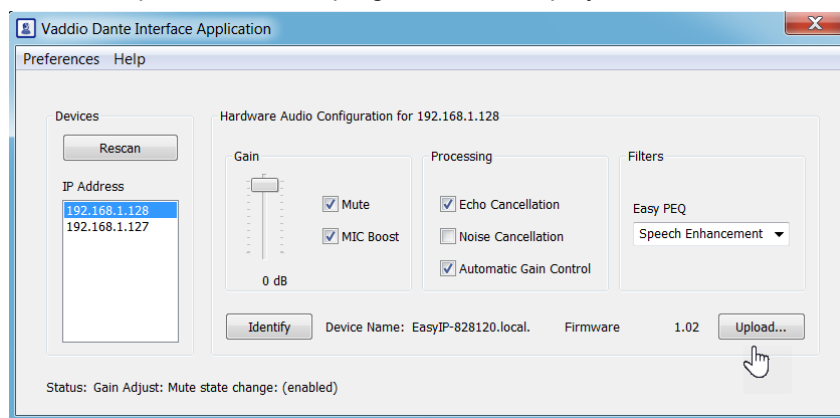

You will need the Vaddio Dante Interface Application to update EasyIP microphone firmware. This free application is available from legrandav.com.

When you open the Vaddio Dante Interface Application, it displays the IP addresses of the EasyIP microphones on the subnet.

To update EasyIP microphone firmware:

1. Download the firmware and release notes.
2. Open the Vaddio Dante Interface Application if you have not done so already.
3. Select the microphone to update.
4. Select Upload and navigate to the firmware file.

Do not disconnect the microphone while the progress bar is displayed.

This update can take up to 5 minutes to complete. While you're waiting, you could try the following:

- Imagine your favorite superheroes after retirement. What do they do with their time? Play golf?
- You get to invent a new season. Where does it fit on the calendar? What's special about it?
- How much of the plot can you remember from the first movie you ever saw?

After the update is complete, the System page will display the new firmware version under System Information. Enjoy that new-firmware smell!
