OVERVIEW

The EasyIP 30 ePTZ Camera is a low-profile professional camera that makes video collaboration and streaming classes effortless. Advanced IntelliFrame™ technology makes the EasyIP 30 ePTZ camera ideal for perfectly framing a group of coworkers in a conference room or framing a single presenter as they move around the room. Pro AV integrators can adjust the experience based on the room conditions and user's preferences. The EasyIP 30 ePTZ Camera adds a new auto-tracking camera option to the highly popular EasyIP ecosystem from Vaddio.

Other cameras on the market rely on facial recognition, and can fail with facial coverings or falsely identify objects like posters on the wall as people. IntelliFrame technology uses a combination of exceptionally sensitive motion detection and complex algorithms to deliver smooth, accurate and hands-free participant framing.

AV integrators can now promise personalized video performance with every installation. Because autoframing performance is adjusted via the web interface, it can be fine-tuned remotely by support staff.

The EasyIP 30 ePTZ is a great choice for conference rooms as people expect great video when joining their video calls. The EasyIP 30 ePTZ features 30x zoom making it a great choice for larger conference rooms or venues.

The EasyIP 30 ePTZ is PoE+ powered. The web-based user interface allows you to manage and control the camera from anywhere.

FEATURES

- Advanced IntelliFrame technology keeps your participants in view
- Up to 30x zoom
- Up to 70.2 degree field of view
- Up to 1080p/30 video
- One EasyIP (Network PoE+) connection
- Pairs with an EasyIP Decoder or EasyIP Mixer
- Customizable autoframing experience
- Use with the free Vaddio Deployment Tool for remote management, updates and more
