

# When Professional Quality delivers Professional Collaboration

vaddio

vaddio zoom

Whether you need to connect with students from your classroom or bring in remote colleagues to the boardroom, Vaddio has you covered for your video and audio needs when using Zoom and Zoom Rooms.

## HuddleSHOT All-in-One Conferencing Camera

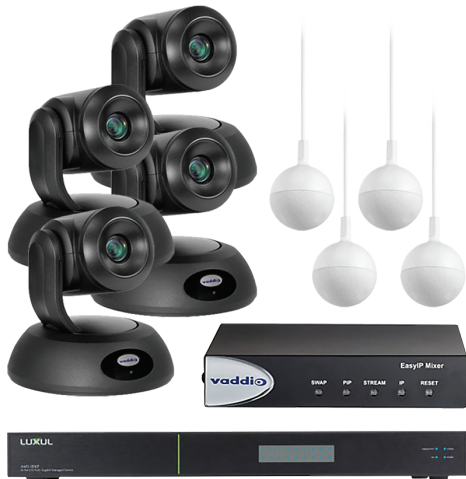

For small spaces, we recommend pairing Vaddio's HuddleSHOT all-in-one camera, microphone and speaker solution. With built-in microphones and an extra-wide field of view, everyone can join the session.

Simply add a coordinating TableMIC to add touch control and additional microphone performance.

# ConferenceSHOT AV

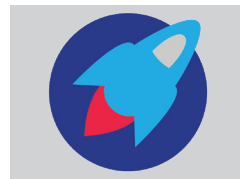

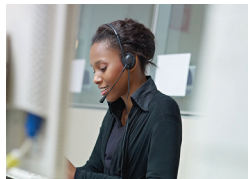

When you are up and moving about, capture all the areas of your room with our popular ConferenceSHOT AV product line. With 10x zoom, an optional speaker to hear remote participants clearly across the room, and multiple ceiling or table microphone options with 360 degree pickup, turn any space into an area that is ready for collaboration and sharing.

Available in multiple bundles to find the right solution for your space!

## EasyIP System for Zoom

And as larger venues are used for collaboration, design the perfect setup with peripherals from our EasyIP family. Pair up to four EasyIP cameras with four EasyIP CeilingMIC D microphones with our EasyIP Mixer to get every person, whiteboard, and presentation captured in Zoom sessions. Add graphic overlays like company logos, use picture in picture features to show PC content without fiddling with screensharing in the software, and send the highest quality video to Zoom to create “in-person” experiences.

World-Class Service	Industry Leaders	Made in the USA	Easy to Deploy	Plug and Play
Vaddio peripherals have been a staple in Zoom deployments since 2013. Our technical support teams, engineers and sales managers are fluent in Zoom and continue to support ongoing collaboration.	Since 2003, Vaddio has led the way in bringing professional quality video and audio products to USB videoconferencing platforms.	Vaddio products are made in Minnesota, USA, and supported globally. We stand behind our products with an excellent warranty and top-notch service.	Vaddio products are remotely managed via their web interfaces. The FREE Vaddio Deployment Tool makes installing and managing Vaddio systems a breeze.	Vaddio devices are plug and play—using standard UVC drivers which means there is no special setup required. Just plug the USB cable into the laptop or PC and Zoom instantly recognizes the video and audio sources.

*When the quality of the video counts and the clarity of the audio is essential, Vaddio delivers the best experience to Zoom users and professional AV integrators.*
