

XWR-3150

Release Firmware Version 7.0.0 - Recommended Update (Must update to FW 6.8.2 or newer before applying this update)

Note: *It is NOT recommended to update the firmware wirelessly as damage to the router may occur.*

Note: *As part of Luxul's ongoing improvements to product security, all new firmware updates will support cryptographic signatures. Implementing firmware signatures will enable Luxul to guarantee authenticity of the firmware update image.*

Firmware versions on the XWR-3150 older than 6.8.2 must be updated to 6.8.2 before updating to the current release version.

New Features:

- WAN Acceleration delivers WAN-to-LAN speeds up to 1 Gbps (See 'Known Limitations').

Improvements:

- Replaces VPN options with WireGuard VPN (*Current VPN solution will be removed and you will need to be on-site or use RMM to setup new VPN - [Watch Video HERE](#)*).
- Router Limits was changed to Bark.
- Minor UI fixes and improvements.

Known Limitations:

- WAN Acceleration is disabled if QoS, Multi-WAN, Bark, Domotz or WAN Redirect is enabled.
- When using Safari on macOS, in some cases when changing the admin password you are not redirected to a new login screen.
Solution: Close the current tab/browser, open a new tab/browser session and browse to the new IP address of the device. This fixes the issue and will allow you to move forward.

Release Firmware Version 6.8.2

Enhancements:

- Provides ProWatch support for the new SW-510/610 series switches
- DHCP page improvements
- Minor UI improvements and fixes
- Support for requiring signed firmware on future firmware updates

Known Limitations:

- See above
