Firmware Version 1.1.2 - Recommended Update

Note: *As part of Luxul's ongoing improvements to product security, all new firmware updates will support cryptographic signatures. Implementing firmware signatures will enable Luxul to guarantee authenticity of the firmware update image.*

Enhancements:

- Fixed issue where router node would show offline after changing the LAN IP address. Router node will now show properly as 'online' after making the change.
- SSID can now be changed when WAN mode is PPPoE.
- A reboot is no longer required when a hostname has been changed.
- Various UI improvements.

Known Limitations:

- If connecting a wired remote node, the backhaul Ethernet connection has to be connected to LAN 1 on the remote node.

Firmware Version 1.1.1

Enhancements:

- Adds ProWatch+ remote monitoring and management of connected network devices including remote reboot, power cycling, and more.
- Resolves random connection drops between nodes.
- Improved application of configuration changes between nodes.
- Various UI improvements.

Known Limitations:

- If the router IP address is changed, it will show offline in the UI until the router node has been power cycled.
- When connecting a wired remote node, the backhaul ethernet connection must be connected to "LAN 1" on the remote node
