

IntelliSHOT-M

Auto-Tracking ePTZ Camera Certified for Microsoft Teams

The IntelliSHOT-M auto-tracking camera is Vaddio's first Certified for Microsoft Teams camera. Advanced IntelliFrame™ technology makes the IntelliSHOT-M camera ideal for autotracking presenters in boardrooms or perfectly framing a group of coworkers in a conference room. Pro AV Integrators can adjust the experience based on the room conditions and user's preferences. The IntelliSHOT-M camera provides a consistent, repeatable, and high-quality Microsoft Teams experience from Vaddio.

FEATURES

30x zoom with IntelliZoom™

Capture professors and students from across the room in stunning detail with IntelliZoom, ensuring great video at any zoom.

IntelliFrame™ Auto-Framing

Incredibly accurate motion-based framing keeps participants in view as they move around or join the room. IntelliFrame is highly configurable based on the environment and user preferences.

Professional-Grade HD image sensor

IntelliSHOT-M supports 1080p (Full HD) and excels in uneven and darker lighting conditions commonly found in large auditoriums or meeting rooms with bright sunlight or shadows.

Plug-and-play USB Connectivity

Just plug the USB cable into the laptop or PC and Microsoft Teams instantly recognizes the video and audio sources.

Small Footprint, Large Impact

IntelliSHOT-M's slim form factor allows it to be mounted behind a display for a less cluttered room.

Easy, In-Room Control

Operate the camera with the included RF remote or pair IntelliSHOT-M with the Vaddio Device Controller color touch panel for simple touch control.

Flexible Mounting Options

Mount IntelliSHOT-M wherever works best with the included wall mount, optional ceiling drop-down mount, or choose from a variety of optional display mounts from Chief.

FREE Vaddio Deployment Tool

Use the application for remote management, remote firmware updates, camera and streaming status, rebooting, and more.
