

Greater Flexibility in Desktop Power

The dash Desktop Power Center is designed to provide convenient access to power and data to desktops and workstations while its modern design complements the design of interior spaces. The units are available in either white or graphite finishes and feature a braided fabric cord and aluminum housing for a higher-end aesthetic. The versatile mounting options allow for access to power at the edge of the desktop or just below the worksurface.

Custom configurations can be designed to meet the individual needs of a workspace. Available from 2 to 6 cubes, units can be configured to include tamper-resistant 15A outlets, combo USB A/C ports, or a blank keystone module for data connectivity. A standard offering of configurations is also stocked and ready to ship.

dash™ Desktop Power Center

Slim, Modern Design:

Designed to blend into the workspace, complementing existing décor with a minimalist design that's right on target with high end environments.

Highly Configurable:

With so many potential options, the dash offering can be designed from sizes as small as 2 cubes to as large as 6 cubes, providing the right mix of power, charging and data access.

Braided Fabric Cord:

Easily reach nearby wall and floors with a 6' cord on all standard units or a 10' cord on custom units.

Versatile Mounting:

Minimal hardware required for installation with included mounting kit. Includes edge mount and under-table mount.

USB Charging:

Available with a combo 15W USB-A and USB-C cube that allows for convenient access to charge small electronic devices without the need for a separate wall adapter.
