Multi-Display Video Wall

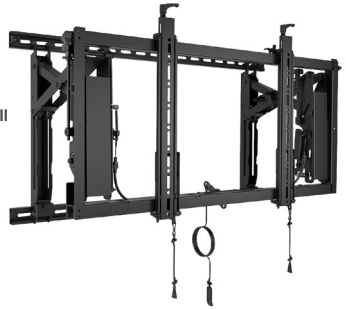

Why We Love It

- Modular system uses strut channel (that can be sourced locally) to quickly align rows of displays
- Tool-free height, tilt, lateral and depth adjustment in one easy-to-access location per mount
- Can be set to a range of home positions to align with recess applications and accommodate walls up to 2" (51 mm) out of alignment
- RapidDraw™ Display Release controlled pull cord pops-out individual displays up to 13.7" (340 mm) from the wall for servicing
- UPS power backup keeps video wall protected, and in-wall storage options add space for additional power, media players, cable, and more

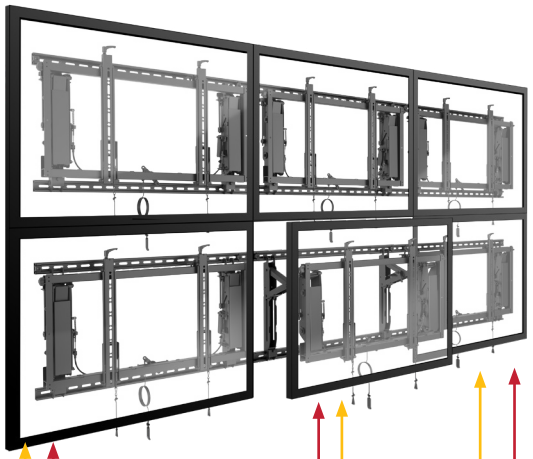

Ideal For: Budget-friendlier video walls, creative configurations, honestly – go wild
