# INSTALLATION BASICS - 6' GO WIREWAY

ATTACH END CAPS

Flip the track and tighten the set screws.

Upside-down track

You can use double-sided or friction tape,
or fasten the track to the floor
depending on your application.

PASS CABLING THROUGH GROMMET

Then snap the grommet into the track at the wall.

MOUNT POWER DEVICE

Install the small piece of top cap at the end of the track,
then slide the device under it.

Mount the device with included double-sided tape.
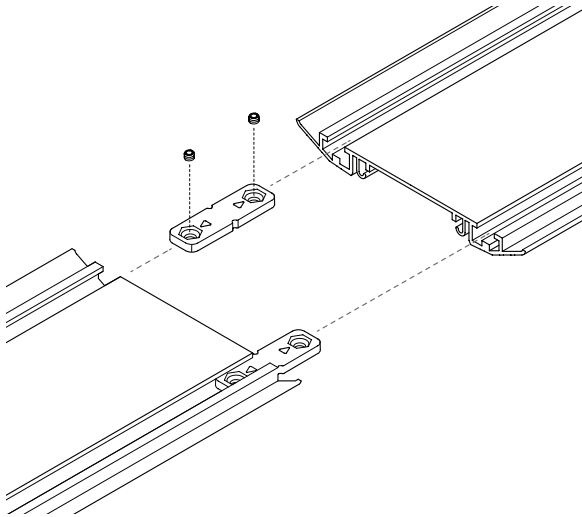

INSTALL TOP CAP

Manage cabling with included metal clips,
then install the longer piece of top cap.
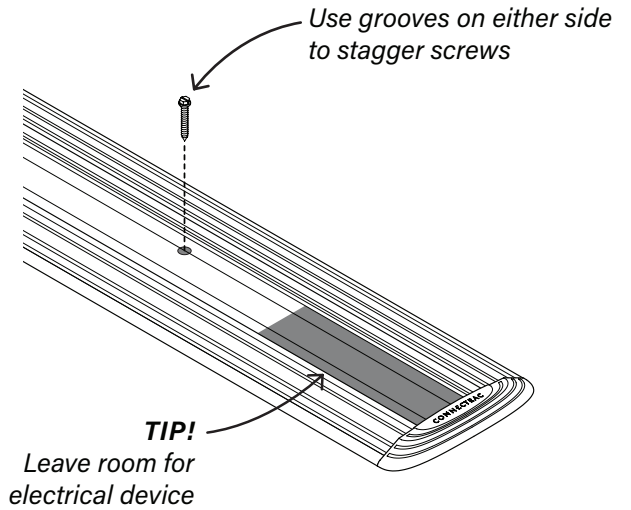

INSTALLATION BASICS - 12' GO WIREWAY

USE INCLUDED COUPLERS

Insert as shown, then tighten set screws.
These help align the bottom tracks.

FASTEN IT DOWN

This is necessary when combining tracks.

Use grooves on either side to stagger screws

TIP!
Leave room for electrical device

STAGGER BOTTOM TRACK AND TOP CAP

Offset the bottom track joint from the top cap joint.
This helps strengthen the assembly.

Stagger joint

CAN BE TRIMMED TO LENGTH

The wireway can be trimmed
if you need a different length.

INSTALL THE COVER

Terminate any data cabling in the included modules, or leave open to pass cabling through.
Snap the trim skirt into the bottom of the device cover - attach the plastic cover to the device,
THEN GO!
