Release notes

AV Bridge Nano Audio Video Encoder

Current release

AV Bridge Nano 1.1.0

September 6, 2024

New features

- Added a banner on the web UI that alerts users of possible HDCP content.
- Introduced a new CLISH 'info' command to query product and room label information.
- Added a Low Bandwidth option for USB streaming to improve performance in bandwidth-constrained environments.
- Added support for password-less login over Telnet.

Improvements

- Improved USB streaming to address reports of occasional interruptions.
- Resolved an issue where video mute did not work properly after a reboot.
- Infrastructure updates were applied to enhance system stability and performance.

Release history

AV Bridge Nano 1.0.2

February 7, 2024

New feature

- The new monitor buttons command returns the state of the on-screen display of the device's IP and MAC addresses.

Improvement

- RTMP streaming settings now allow more streaming services to be added.

AV Bridge Nano 1.0.1

July 31, 2023
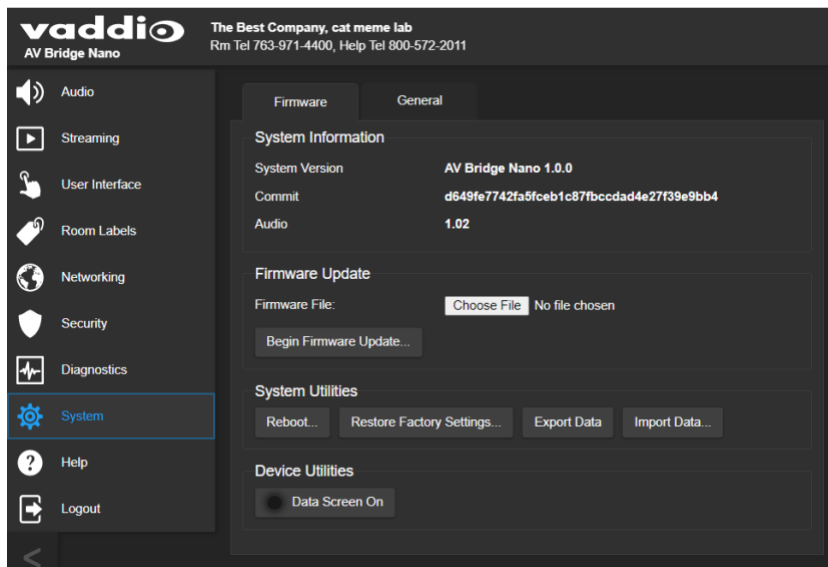

Notes

- Initial release.

Firmware update instructions

The process for updating firmware is the same for virtually all Vaddio products. *Your device's web interface may display different information from the screen shot in this procedure.*

Caution
The camera must remain connected to power and to the network during the update. Interrupting the update could make the camera unusable. If the update does not run, DO NOT DISCONNECT POWER. Call Vaddio Tech Support immediately: +1 763-971-4400 or 800-572-2011.

---

1. Download the firmware file if you have not done so already.
2. Access the device's web interface and log in as `admin`.
3. On the System page, select Choose File and select the file you downloaded. Then select Begin Firmware Update.

4. Read the Confirm dialog box, then select OK. You will be prompted to log in again when the process is complete.

This update can take up to 5 minutes to complete. While you're waiting, you could try the following:

- Pop quiz! How many magnitude prefixes can you remember? What's bigger than giga? What's smaller than nano?
- Think about your favorite color. What things should never be that color?
- Imagine that you can grant three wishes to anyone. What sensible restrictions would you impose before agreeing to do this?

After the update is complete, the System page will display the new firmware version under System Information. Enjoy that new-firmware smell!
