

Azelis Asia Pacific Food Safety Policy

P-11.0-APAC

The Food Safety Policy of Azelis Asia Pacific, which has been established by its top management, inherits the fundamental values developed by Azelis group to establish itself as a worldwide leader of specialty chemicals distribution.

Indeed, the group is committed to excellence in quality, food safety, food security and continual improvement throughout the food supply chain, extending to all related activities ranging from supply of ingredients, packaging, storage, handling, disposal and distribution. We strive to provide customers with high-quality food products, superior customer services and communication that meets and exceeds their expectations.

Therefore, we are committed to:

- Meet all regulatory requirements including compliance with applicable ISO standards, the Hazard Analysis Critical Control Point (HACCP) system, applicable food safety requirements and mutually agreed customer requirements.
- Fostering a strong food safety mindset and culture across all levels of the organisation.
- Continually review quality and food safety policies, standards, plans and procedures to effectively manage food safety risks associated with changes in products and processes
- Take all reasonable steps to protect our products from contamination to ensure the safety of our products is not compromised by accident, negligence, or deliberate acts of sabotage.
- Communicate effectively our food safety requirements, including personal hygiene and cleanliness, with our employees, customers, visitors, service providers and contractors.
- Provide our employees with food safety information, training, instructions, tools and equipment to carry out their job in a professional manner.
- Evaluate suppliers to ensure they meet our standards to minimise risk of food fraud.
- Develop and test preparedness and response plans to manage identified risks rapidly and effectively;
- Promote continual improvement of our Food Safety Management System through ongoing audits and reviews of the system.
