

Medications

The following is a list of your medications to take after discharge. It contains some or all of the medications you were taking at home, and any new medications that we recommend you take now. Keep an accurate list of your medications with you at all times. This list replaces any other list of medications that you may have. Please contact your Primary Care Physician if you have any questions about this list.

This medication list is based on our current medical records. The most accurate medication list is with your Primary Care Provider (PCP). Please review this list with your PCP to have the most accurate and up to date medication list.

	What	How Much	When	Why	Instructions	Next Dose
New	ofloxacin otic (ofloxacin otic 0.3% solution)	5 Drops right ear	Twice a day	Right otitis externa	Duration: 7 Days Printed Prescription
