

Subject: Urgent: Pedestrian Signal Failures on Student Walking Route to Green Street Academy

I'm reporting two malfunctioning pedestrian signals located directly on the student walking route to **Green Street Academy**:

- **Edmonson Ave & Mt. Holly Street** (near Mike's Corner Store) – The pedestrian signal at the corner does not activate when the button is pressed.
- **Edmonson Ave & Wildwood Parkway** – The pedestrian signal to cross Edmonson Avenue is completely non-functional.

These intersections are used daily by students and families walking to school. The lack of working pedestrian signals presents a serious safety risk, especially during morning school hours.

Please prioritize inspection and repair as soon as possible.

Thank you.
