DESCRIPTION OF WORK

WO-TNFR612684

TASK	DESCRIPTION	QTY	PRICE	TOTAL
Job Description	Job Description: Will run main drain machine down sewer clean out in basement to attempt to clear blockage. Once drain is opened we will camera line and chemically treat the sewer. Home owner was notified that if sewer is frozen we would need to wait till it's thawed out to clear blocked and also with raw sewage on the ground home owner would need to contact a remediation company. We cleared blockage after running 80 ft of cables and issues were caused by roots, then tested drain for 45 minutes. When we inspected the line we noticed belly's from start of pvc connection to city connection. Root issue is on city side and advised home owner to call 311 and report sewer emergency. Could not locate clean out due to snow. We also treated sewer with root x to help with root issue. Tenant alerted us that he tried fixing it himself and toilet was loose. Job was completed at clean out and didn't touch toilet.	1.00	\$0.00	\$0.00
