PROBLEMS	DIFFERENTIALS
Hit by car	

NOTES

October 31, 2026 at 07:01 AM

Progress Note

Diagnostics:

POCUS - no free fluid noted in abdomen or chest, b-lines bilaterally in chest (concern for pulmonary contusions)

Treatment Plan/Medications in Hospital:

None

RX TGH:

None

Client Communication:

Recommended doing x-rays and bloodwork to look for signs of internal trauma from HBC and signs of fracture in front limbs. Let owner know if we need to focus on supportive care for now we can also do that and follow up with a primary care vet for less expensive diagnostics. Owner asked how much it was to do everything, gave her a quote for full diagnostics and supportive care, with the understanding that the treatments may need to change depending on diagnostic results. Owner began combative and started raising her voice about the cost. Let owner know we want to help Kiki, discussed that we have payment options and again we can focus on supportive care only if needed for now and I will do the POCUS at no cost. We also can help Kiki get pain medication at a bare minimum even if she does not qualify for payment plan. Owner stormed out of hospital and did not return.
