1. 300 block of Edgevale Road 21210 is a busy residential street with room for one-sided parking only.

2. **For over 50 years**, street convention is parking on **East** side of street (odd house #'s).

3. Since mid September 2026, resident at 309 Edgevale (black Mazda) began parking exclusively on West side of street (even # houses) and requested via email that all block neighbors also start parking on West side of street. Multiple neighbors responded they do NOT want to change. No other neighbors agreed with resident at 309 Edgevale.

4. Despite the neighbors' objections, for the past two months, 309 resident consistently parks on West side of street while rest of the block continues to park on East side

5. 309 parking on West side of street reduces the number of parking spots on East side since other parkers have to leave plenty of room across from, in front of, and behind, 309's car to allow room for street traffic to get through.

6. Street traffic on this street includes multiple large delivery trucks, construction trucks, landscaping trucks, city sanitation trucks, large emergency vehicles, and in the winter months snow plows and salting trucks.

7. Since 309 started parking differently than the rest of the block in mid September 2026, there are instances of neighbors not being able to park close to their home, and countless issues where large vehicles can just barely squeak by without hitting a parked vehicle. In some cases, horns starting honking and neighbors had to come out to move their parked car to allow traffic on the street to flow again. This is inconvenient, but more importantly, it is not safe as there is possibility of emergency vehicles not being able to pass.

8. 309 Resident has recently submitted 311 request 26-00875004 which is a request for parking on 300 block of Edgevale Road to be exclusively on the West side. Again, all of the other neighbors on the block prefer to keep the parking the way it is currently, which is on the **East** side of the block (odd # houses). I trust that Baltimore City will NOT consider the aforementioned service request based on the request of this single resident, especially without considering the opinion of the rest of the street.

9. In fact, if there is to be any kind of official designation/signage of one side of 300 block of Edgevale Road to be no-parking, the block prefers that the West side (even # homes) should be the official No-Parking side, and the East side (odd # homes) remains the "normal" parking side as the cars on the block have been doing for >50 years already.

Thank you.
