

**All About Your MRI**

I will check in at the desk and get a hospital wrist band.

I need to keep my hands by my side and use my inside voice.

I will meet my nurse who will check my temperature, blood pressure and weight.

One of these MRIs will  
take my pictures.

The doctor will put a mask over my nose to give me sleepy medicine.

After my MRI, I will wake up and get juice and crackers.

Then it's time to go home!
