

# **My Trip to the Hospital**

I am going to the hospital.

When I get to the hospital, my mom  
and I will check in at the desk

- I keep my hands to myself.
- I use my quiet voice.

I will go to my room and  
meet my nurse.

I can lay in my bed and watch TV  
or play with toys.

# My nurse will check my height and weight.

- My job is to stand still. I will feel something touch my head.
- Then I will step on the scale and hold onto the bars.

# My nurse will check my body next.

The nurse will listen to my heart.

The nurse will put a Band-aid with a red light on my finger. It will be sticky.

# My nurse will put a soft cushion on my arm.

- I will feel a tight squeeze or a hug around my arm.
  - My job is to keep my arm still.

# I might stay overnight

My brothers or sisters  
can visit me.

I will sleep in my bed.

My mom or dad can stay  
overnight too!

When the doctors say I'm ready,  
I can go home!
