

INFANT AND CHILD FEEDING SCREENER

Early detection of feeding problems can help prevent or reduce a more severe feeding issue as your child grows and develops. If you answer “yes” to any of these questions, your child may be at risk for a feeding problem.

- | | | |
|-------------------------------------------------------------------|-----------------------------|------------------------------|
| Do you have concerns about feeding your child? | <input type="checkbox"/> No | <input type="checkbox"/> Yes |
| Are you worried that your child does not eat enough? | <input type="checkbox"/> No | <input type="checkbox"/> Yes |
| Do you feel like your child “does not like to eat”? | <input type="checkbox"/> No | <input type="checkbox"/> Yes |
| Do you often have to do something special to help your child eat? | <input type="checkbox"/> No | <input type="checkbox"/> Yes |

About Our Wolfson Children's Rehabilitation Feeding Program

We provide comprehensive evaluations of a child's feeding skills, focusing on maintaining safety when eating, improving food intake for growth and nutrition, and supporting the family to make mealtimes more pleasurable.

- Visit our website for more information: www.wolfsonchildrens.com/feedingprogram
- To schedule an evaluation with us:
 - A physician's order is required.
 - Ask your child's doctor to make a referral for a Feeding Evaluation
 - Contact Wolfson Rehabilitation central scheduling at 904.202.1884 to make an appointment.

The Child Feeding Questionnaire

A great online resource from [Feeding Matters](#) is available to help you monitor your child's feeding skills as their diet progresses. The [Infant and Child Feeding Questionnaire](#) helps parents identify areas of strengths, as well as areas of concerns.

It reviews your child's feeding behaviors, and at the end of the questionnaire, you will receive a report that can help guide discussions with your child's physician and help you express any concerns.
