

FY13-15 Community Benefit

Mammography

According to the American Cancer Society, breast cancer is the second leading cause of cancer death and the second most common type of cancer among women in the U.S. The greatest risk factor in developing breast cancer is age.

Breast cancer incidence rates have increased drastically in Putnam and St. Johns Counties. Only Nassau County has a rate below the state level of 21 per 100,000. 34% of women delayed obtaining a mammogram.

The Healthy People 2020 national health targets focus on reducing the female death rate from breast cancer to 20.7 deaths per 100,000 females, and increase to 81.1% the proportion of women who receive breast cancer screening based on recent guidelines.

Programs:

Health education
Community outreach and prevention awareness events
Strategic Investments

Strategies:

1. Provide community education classes on early detection of breast cancer and breast health for the high risk women. Provide follow up phone calls for women 50 – 70 to increase breast cancer screening.
2. Provide breast health information literature at community health fairs and other community health events.

Program Results:**FY13**

- As part of the Nassau Council on Aging Senior Expo, six people attended an educational session on breast cancer.

FY14

- 30 persons participated in breast health education sessions

FY15

- Distributed breast health information at the Nassau Council on Aging Senior Expo
- 90 women were provided free diagnostic mammograms

Strategic Investments:**FY13**

- Barnabas Health Center transitioned from urgent care to primary care services
- Nassau County Council on Aging provided transportation for low-income and indigent individuals who needed to reach medical appointments

FY14

- Barnabas Health Center completed 114 screening mammograms; 57 women received follow up treatment
- Nassau County Council on Aging provided transportation for low-income and indigent individuals who needed to reach medical appointments

FY15

- Nassau County Council on Aging provided transportation for 503 low-income and indigent individuals who needed to reach medical appointments
- Barnabas Health Center provided medical services to 520 patients for a total of 1,766 visits; 225 women were provided well-woman exam and free screening mammograms; serves as on-site support for women with cancer
