Instruction Sheet Preparing and Using Nasal Saline Irrigation

What you will need: 2 tsp pickling or kosher salt 1/2 tsp baking soda 8 oz. distilled water 1 small bulb (baby size) syringe

How to do it:

- 1. Mix salt, water and soda together in a bowl.
- 2. Use the small bulb syringe to draw up the solution.
- 3. Hold your chin down.
- 4. Lean over a sink and squeeze the solution into one side of your nose and then the other.
- 5. Blow your nose gently.
- 6. Repeat irrigation on each side of your nose.

Perform these steps at least three (3) times a day unless instructed otherwise.

Possible side effects:

Mild irritation of the nasal membranes, though most people tolerate this treatment without any discomfort.
