

STRATEK 3D LAMINATES COLOUR RANGE

STRATEK™ 3D Laminates are a rigid and hi-fidelity thermofoil (RTF) that can be used as flat sheet like a traditional wallcovering or HPL as well as membrane-pressed or vacuum-formed to contoured surface profiles. The industry's premier laminate for retail fixture, food service applications, medical furnishings and high traffic areas, Stratek's dimensional flexibility eliminates the need for T-molding, edgebanding, visible seams and special edge treatments.

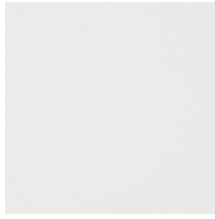

- Enhanced resistance to impact, abrasion, marring and scratching
- Ability to use as a horizontal surface (including textures)
- Available in a broad range of designs including a local stocking program
- Dimensionally flexible to conform to
- 3-dimensional surfaces eliminating seams and edgebanding
- Waterproof
- Chemical resistance including bleach
- Group 1 fire rated
- Cost effective
