

STRATEK 3D LAMINATES COLOUR RANGE

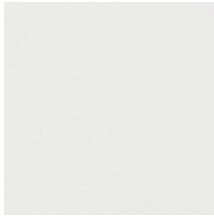

STRATEK™ 3D Laminate is a rigid thermofoil ideal for both horizontal and vertical surface applications. STRATEK can be membrane-pressed or vacuum-formed to contoured surface profiles (think joinery and table tops with rolled edges or logo impressions) as well as being used as a flat sheet for screens or wall coverings. The ability of STRATEK to be formed around edges not only creates lovely seamless edges, it is highly resistant to impact and water damage, and no joins improves cleanability and hygiene. You can opt to purchase the STRATEK 3D Laminate by the metre or Baresque has a wide array of products fabricated using Stratek including perforated and post screens, Zon space zoning modules, and table tops. Call us on 1300 306 399 for assistance or to see samples.

- Enhanced resistance to abrasion, chemical cleaners, scratching and impact, providing a long-lasting, "like-new" appearance
- Great value
- Flexible ability to form three dimensional surfaces, eliminating seams and edge banding for easy cleaning
- Dimensionally flexible to conform to
- 3-dimensional surfaces eliminating seams and edgebanding
- Available in texture wood grains, realistic stones, smooth solids and dazzling metallics
- Bleach cleanable
