PUBLIC SPACE FURNITURE

ABOUT US

COMPANY PROFILE

est. 1995

HUMBLE BEGININGS

Botton + Gardiner was founded by architect and furniture designer, Mike Botton, and sales and marketing specialist, Carol Gardiner, to fulfil their passion for creating Australian products of uncompromised quality for the urban sector. Focused on local manufacture, an extensive network of specialist subcontractors was developed.

reputation

PROFESSIONALISM

Botton + Gardiner built a reputation in the marketplace for taking the time to understand our customers specific needs and then tailoring services to achieve the optimal solution. This culminated in being awarded preferred supplier status for Westfield in 2002, which continues through to today.

Combined with the delivery of several landmark public space urban projects and winning Western Sydney Parklands suite of furniture competition in 2009, Botton + Gardiner established a strong position in public space furniture.

global collaboration

GROWTH

Aquired by Baresque in 2013, our key markets of urban and shopping centres expanded to include student housing, hotels, education, aged care, hospitality and interiors. With a renewed vision for supplying diverse project solutions we partnered with leading global brands Landscape Forms (USA) and Metalco (Italy) to import cutting edge international products, as well as collaborating with Asian manufacturers on our own inhouse Australian designs. Through Baresque Manufacturing's factory facilities a multitude of manufacturing processes were brought in-house.

today

WHERE ARE WE NOW?

Today all aspects of Botton + Gardiner's history and experience have culminated in our ability to tackle large scale, custom and complex public space projects with finesse and professionalism.

PUBLIC SPACE FURNITURE

AUSTRALIAN MADE

LOCAL MANUFACTURING

The Botton + Gardiner Urban Range is made entirely in Australia from locally sourced materials.

From humble beginnings in 1995, today Botton + Gardiner's extensive in-house design and manufacture capabilities paired with specialist subcontractor relationships, delivers high quality, quintessential furniture to improve the public space and stand the test of time. Our belief in sourcing local, durable, sustainable materials brought together with Australian manufacturing forms the core of our company culture and DNA.

Our in-house design team gives us full control over the development and execution of product and ensures we are dynamic and adaptable. The design team work hand in hand with our manufacturers to deliver well considered and trustworthy furniture. Pairing expert in-house manufacturing facilities and collaborations with specialist craftsmen ensures we have flexibility in selecting the best fit required to deliver public space furniture to your specific requirements.

These controlled design and manufacturing capabilities allow Botton + Gardiner to ensure high quality is paramount from manufacture through to delivery, all on short local lead times. From using select grade hardwoods to polishing aluminium frames by hand, Botton + Gardiner oversees all elements that go into making furniture the community will enjoy for many years to come.

Throughout this catalogue we are so proud to show off real imagery of the manufacturing processes undertaken locally in Sydney to create our Urban Range furniture in celebration and appreciation of the physical hard work, high level of detail and craftsmanship that goes into our products. Scan the QR codes for info on what is happening in each image.

BENCHES

Sizes Urban Benches

Standard lengths in each finish

*** Frame spacing is structural and determined by Botton + Gardiner on the spanning ability of the slat finish.
The same bench type may vary in frame quantity between finishes and lengths.
Check your quantity for the number of frames per item.

FINISH KEY

Classic

Urban Bench

With curvaceous frames and profiled slats, the Classic Urban bench is timelessly elegant and versatile. Suitable for a wide range of interior and exterior applications from mall seating and outdoor food galleries to council streetscape or university seating.

FINISHES

Slats - Hardwood, DuraSlat™, Aluminium or Alugrain battens.

Frame - Cast aluminium, polished or powdercoated.

See pages 105 - 113 for standard colour options.

FEATURES

Designed specifically for the harsh demands of public spaces in the Australian landscape, including sea side.

Pair with any items in the Urban Range to create coordinated landscapes.

Public spaces can be vulnerable to high levels of wear and tear or vandalism, replacement slats and parts available as required.

Multiple fixing methods to suit a wide array of installation variables (including inclines).

This bench can be ordered in settings to meet the guidelines of Australian Standards 1428.2 so will aid in achieving project DDA compliance, see page 91 for more info.

ADD ONS page 79

Opt to add skate stoppers to discourage skateboard damage to your furniture.

OPTIONS

See page 18 for standard sizes.

Transverse battens, where the slat direction is across the bench depth, is available on request to match the Urban Curved Bench in Hardwood and DuraSlat finishes.

Local manufacture allows us to tailor the bench length, mitre the ends (see page 22), or use a hardwood species to your custom requirements, give us a call.

WARRANTY

5 years

INDICATIVE LEADTIME

3-5 weeks, dependent on quantity and finishes selected.

FIXING

Fixed by others or loose with glides for internal use, see pg 94 - 97 for options.

HARDWOOD

DURASLAT

ALUMINUM

ALUGRAIN

Classic

Mitred Urban Bench + GRC Planter

CONFIGURATION IDEAS

Turn your forgotten corners and empty piazzas into social hubs by pairing the Classic Urban Bench with a GRC planter. Utilising mitred corners, this combination makes a great pause point that is a bit more unique than your average bench. Popular for both indoor and outdoor use, plants add atmosphere and screening. Consider adding the Pop table to utilise alfresco seating as outdoor dining spaces. We've put together some standard sizes to get you started.

HARDWOOD

ALUMINIUM | ALUGRAIN

Curved

Urban Bench

Whether sinuous, snaking curves, full rings or shallow bends, curved seating is always a popular choice for breaking up linear spaces. Ideal for seating around trees, along curved garden beds and walls, the Curved Urban Bench is made locally to your specifications to ensure a perfect project fit every time.

FINISHES

Slats - Hardwood and DuraSlat™ (with radial orientation) or Aluminium battens.

Frame - Cast aluminium, polished or powdercoated.

See pages 105 - 113 for standard colour options.

FEATURES

Making each bench to order allows us to tailor the arc length and radius to suit your project, see pages 30 -31 for how to specify. Drawings will be issued for sign off prior to production.

Designed specifically for the harsh demands of public spaces in the Australian landscape, including seaside.

Pair with any items in the Urban Range to create coordinated landscapes.

Public spaces can be vulnerable to high levels of wear and tear or vandalism, replacement slats and parts available as required.

ADD ONS

 page 79

Opt to pair your curved bench with tables, seats and planter pots to create clusters of spaces, see page 76 for ideas.

Opt to add skate stoppers to discourage skateboard damage to your furniture.

OPTIONS

See page 18 for standard arc lengths.

Multiple fixing methods to suit a wide array of installation variables including inclines.

WARRANTY

5 years

INDICATIVE LEADTIME

4-6 weeks from drawing sign off, dependent on quantity and finishes selected.

FIXING

Fixed by others, see pages 94 - 96 for options.

HARDWOOD

DURASLAT

ALUMINUM

Curved

Urban Bench + GRC Planter

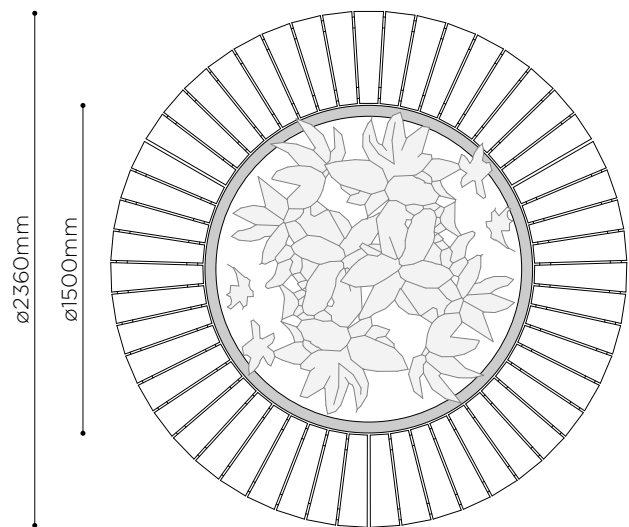

CONFIGURATION IDEAS

Curved benches around planters are popular for both indoor and outdoor use. They make great pause points which are a bit more unique than your average bench, plus plants add atmosphere. We've put together some standard sizes to get you started. See page 30 if you already have a pot and you need to specify the curved benches to go around it.

HARDWOOD

DURASLAT

ALUMINIUM

SPECIFICATION GUIDE

CURVED + CURVED CANTILEVERED URBAN BENCHES

DEFINITIONS

Radius - The measurement determining the amount of curvature in the bench. Can be taken from the inner (smaller) or outer (larger) radius. The minimum outer radius possible is 1000mm.

Arc length - We use the length along the curved outer radius edge of the bench to determine the amount of material needed and hence the price of the bench.

Chord length - The straight line distance from each maximum end point of the bench.

Depth - The set measurement from the front edge to the back of the bench.

EXAMPLES

Arc length - 1800mm
Outer radius - 1000mm

Arc length - 1800mm
Outer radius - 2000mm

Arc length - 2000mm
Outer radius - 2000mm

NEXT STEPS

To give a quotation only the arc length is required. See page 18 for the standard arc lengths available.

If you have site measurements with the radius and chord length, or scaled drawings, Botton + Gardiner can assist you to determine the arc length for quoting. We can also assist with working out the module sizes required in complex or continuous configurations.

To proceed with your quotation and place an order, the radius (inner or outer) must be confirmed for each bench. Botton + Gardiner will issue you a drawing for sign off prior to manufacturing.

Curved Cantilevered

Urban Bench

Curved seating is always a popular choice and the cantilever design removes the visual clutter of the legs. Ideal for ring seating around walled gardens, trees or buildings, the Curved Cantilevered Urban Bench is made locally to your specification to ensure a perfect project fit every time.

FINISHES

Slats - Hardwood and DuraSlat™ (with radial orientation) or Aluminium battens.

Frame - Cast aluminium, polished or powdercoated.

See pages 105 - 113 for standard colour options.

FEATURES

Making each bench to order allows us to tailor the arc length and radius to suit your project, see page 30 for how to specify. Drawings will be issued for sign off prior to production.

Designed specifically for the harsh demands of public spaces in the Australian landscape, including sea side.

Public spaces can be vulnerable to high levels of wear and tear or vandalism, replacement slats and parts available as required.

ADD ONS page 79

Opt to pair your curved bench with tables, seats or benches to create clusters of flexible use seating.

Opt to add skate stoppers to discourage skateboard damage to your furniture.

OPTIONS

See page 18 for standard arc lengths.

WARRANTY

5 years

INDICATIVE LEADTIME

4-6 weeks from drawing sign off, dependent on quantity and finishes selected.

FIXING

Cantilever fixed to existing wall by others, see page 98.

HARDWOOD

DURASLAT

ALUMINUM

Cantilevered

Urban Bench

Discreet and tidy, the Cantilevered Urban Bench neatly fits off to existing walls to create seating alcoves with minimum fuss. An understated design, wide array of finishes and easy cleaning makes this versatile bench ideal for a wide array of exterior and interior applications.

FINISHES

Slats - Hardwood, DuraSlat™, Aluminium or Alugrain battens.

Frame - Cast aluminium, polished or powdercoated.

See pages 105 - 113 for standard colour options.

FEATURES

Mounting this bench to existing walls creates a landscaping feature while cantilever frames allows easy cleaning beneath the seating.

Designed specifically for the harsh demands of public spaces in the Australian landscape, including sea side.

Try adding the Pop Table for flexible use settings or pair with any items in the Urban Range to create coordinated landscapes.

Public spaces can be vulnerable to high levels of wear and tear or vandalism, replacement slats and parts available as required.

WHAT IS DDA?

DDA is the abbreviation for the Disability Discrimination Act, legislation which makes it illegal for public places to be inaccessible to people with a disability.

Public sites and buildings are required to follow the DDA and Building Code of Australia (BCA) which sets out accessibility requirements through the Australian Standards (AS).

DDA compliance of a site or building is certified by specialist third party accessibility consultants. Adherence is not limited to a single piece of furniture but rather the site's accessibility as a whole.

Furniture which follows the technical and dimensional requirements laid out in AS1428.2 will aid in the overall site achieving DDA compliance.

ACCESSIBILITY

Botton + Gardiner believes public spaces are living spaces linked to the wellbeing and vitality of the local communities we live in. People with a disability have the right to access places and amenities used by the public. Botton + Gardiner strives to encourage demographic diversity through good universal design, not just for wheelchair access but also considering the physical limitations or special needs of our elderly, expecting parents with strollers, vision impaired members of the community and more.

ACCESSIBILITY DESIGN

WHAT IS AS1428.2?

*Australian Standard 1428.2: Design for access and mobility
Enhanced and additional requirements – buildings and facilities 1992 (R2015)*

Adherence to this code is not compulsory for public space furniture, but furniture which follows the requirements laid out in AS1428.2 will improve accessibility and aid the overall site in achieving DDA compliance by a third party.

ACCESSIBILITY DESIGN

STAND-ALONE SEATS

URBAN CLASSIC AS1428.2 SEAT HARDWOOD

	Key accessibility dimensions + features	AS1428.2	Classic Urban Seat + Accessible Armrests
1	Overall height with backrest Prevents a 'slouch' to improve exit for users	750 - 790mm	770mm
2	Angle of backrest Comfort and improved sight lines	Maximum 105°	100°
3	Seat depth Assists ease to entry/exit for users	400 - 450mm	425mm
4	Armrest provision + height above seat Assists entry/exit for users	260mm (+ or - 40mm)	230mm
5	Radius to the front edge of the seat Soft contact for Popliteal (back of the knee) during entry	R30mm	R30mm
6	Seat height Assists entry/exit for users	400 - 450mm	425mm

DURASLAT | ALUMINIUM | ALUGRAIN

Though all other key AS1428.2 dimensional guidelines are still met, hardwood is the only finish we can achieve the 30mm radius to a 30mm thick front edge batten. This may not rule out DDA compliance for your site of other finishes, chat to your accessibility consultant for project specific advice.

ACCESSIBILITY DESIGN

STAND-ALONE SEATS

PLINTH | POST | CANTILEVERED SEATS

DO THESE MEET AS1428.2?

All the Urban Seats in hardwood, with Urban Accessible Armrests, meet the dimensional guidelines set out in AS1428.2 on page 87, however, these items require additional attention during installation to ensure a fixed seat height of 400 - 450mm from ground level is achieved.

ADDITIONAL TIPS

DESIGN CONSIDERATIONS TO MAXIMISE ACCESSIBILITY

1. Using contrasting colours against ground material and backdrop will aid in sighting the seat.
2. Install items a minimum of 500mm out of the path of travel to avoid obstruction.
3. Vertical frames (legs) at the seat ends aid early contact for those using a cane.

URBAN BENCHES

DO THESE MEET AS1428.2?

As the backrest is an important feature of AS1428.2 guidelines, stand-alone benches do not comply. However, diversity of seating types to suit a wide range of demographics and abilities is an important aspect of universal design and overall project accessibility. Chat to your accessibility consultant about having a variety of benches alongside accessible seats to introduce diversity into your project.

The Broad | Post | Plinth Urban Benches, with Urban Accessible Armrests, co-ordinate with Urban Seat designs whilst still providing good universal design principles for increased ease of entry and exit.

ACCESSIBILITY DESIGN

AS1428.2 URBAN POST + TRI TABLES

It is important to note there is no single table height that will suit every user with a disability and where possible providing a variety of table heights is ideal. We have worked with the dimensions outlined in AS1428.2 single height situation which outlines features targeted at wheelchair accessibility. While our tables meet the key AS1428.2 dimensions inside of our control, correct installation, slab sizing and suitable access to the settings is crucial to meeting the full AS1428.2 requirements outlined below. Please consult your accessibility expert for project specific advice.

	Key accessibility dimensions	AS1428.2	Urban Post Table	Urban Tri Table
1	Overall table height Floor to table top	850mm (+ or - 20mm)	868mm With correct installation	868mm With correct installation
2	Clearance to table underside - height Floor to underside of table	820mm (+ or - 20mm)	805mm	805mm
3	Wheelchair zone - overall width Space which is unobstructed for wheelchair access	Min. 800mm	Min. 834mm with seating correctly installed a min. 50mm from table edge	Min. 800mm with seating correctly installed a min. 100mm from table edge
4	Wheelchair zone - overall depth Space which is unobstructed for wheelchair access	Min. 1300mm	Dependant on slab sizing and installer	Dependant on slab sizing and installer
5	Wheelchair knee and foot clearance Clearance below the table which is unobstructed	Min. 620mm	630mm	620mm

TYPE B: SIDE ACCESS

AS1428.2 URBAN TRI TABLE HARDWOOD

PICNIC SETTINGS

Botton + Gardiner has put together some accessible settings using our AS1428.2 Urban Table designs. While the table meets the key AS1428.2 dimensional guidelines targeted at wheelchair users, there are no guidelines for picnic settings in the Australian Standards. We have had the above settings reviewed and approved by a third party accessibility consultant, looking at both the provision of a functional wheelchair zone, and the setting holistically as having good universal design principles for the diverse users of public space settings. Settings can be paired with benches, seats or a mix of both as long as seating is installed with the correct distances from the table. See page 90 for additional information and consult your accessibility expert for project specific advice. Contact us for sizing and other finishes.

FINISHES

SUSTAINABLE HARDWOODS

Our hardwoods are sourced from sustainably managed regrowth forests. We select timber species that have a grain structure and density ideally suited to longevity in harsh public environments. In exterior applications, the natural beauty of the timber is further enhanced and protected with three coats of exterior grade oil, pigmented for high UV resistance.

LACQUERED VIC ASH
[INTERNAL USE ONLY]

OILED BLACKBUTT

OILED SPOTTED GUM

OILED MIXED RED

EBONY OILED MIXED RED

CLEAR OILED MIXED RED

CARE + MAINTENANCE QUICK GUIDE

CLEANING - Remove any loose surface deposits with a soft bristled brush. Wipe down with fresh water and a non-abrasive cloth.

OILING - Oiling of timber will postpone natural greying, repel moisture, improves mould resistance, helps maintain a smooth surface texture and enhances the grain and colour. To maintain, lightly sand rough areas of timber and brush on one coat of Sikkens Cetol HLSE every 6 months (or as required).

TANNINS + LEACHING - Botton + Gardiner recommends placing furniture on a suitable surface after delivery and wetting down (or standing in the rain) prior to final installation, to allow the tannin to release. Scan the QR code for more info.

NATURAL VARIATIONS - Hardwood is unique from tree to tree. Part of the natural characteristics and individual beauty of hardwood include colour and grain variation, bore holes from insects and crevices and these do not affect its structural performance.

FULL INFO

DURASLAT™

DuraSlat™ is a composite material made from reclaimed hardwood fibres and recycled plastic to look and feel like timber but requiring no finishing ensuring low maintenance. The unique properties of DuraSlat means it is soft to the touch and won't leech tannins as hardwoods can. Resistance to warping, rotting, splintering and termites makes DuraSlat™ ideal for the outdoor public space environment.

BRUSHED

BATTEN PROFILE

Has a textured "timber like" finish which does not easily show scuffs and scratches. The back of the batten is closer in appearance to the front side which makes it ideal for seats where backrests are visible. Brushed is ideal for locations exposed to rain and UV which helps it to 'self clean'.

SILVERGUM

SAHARA

JARRAH

BLACKBEAN

CARE + MAINTENANCE QUICK GUIDE

CLEANING - Occasional cleaning with high pressure water jet (max 1500psi) will enhance results. A fan tip nozzle should be used along with the proper cleaning product. Spray in the direction of the brush/grain pattern. Cleaners with the following active ingredients are ideal to enhance results - phosphoric acid | oxalic acid | hydrochloric acid | sodium hypochlorite. Ensure you follow manufacturer's instructions.

MAINTENANCE - Scratches and marks can be sanded out or removed with a wire brush (or will wear out over time), the brushed area will age and weather back to natural appearance within a few weeks. Always brush in the direction of the grain. Trials have shown it is possible to remove graffiti paint with paint stripper.

DURASLAT™

DuraSlat™ is a composite material made from reclaimed hardwood fibres and recycled plastic to look and feel like timber but requiring no finishing ensuring low maintenance. The unique properties of DuraSlat means it is soft to the touch and won't leech tannins as hardwoods can. Resistance to warping, rotting, splintering and termites makes DuraSlat™ ideal for the outdoor public space environment.

GRAIN

BATTEN PROFILE

Is the next generation DuraSlat with a high performance protective shell that wraps around the composite board front and edges providing excellent resistance to fading, staining, scratching, graffiti and mould with increased ease of cleaning. Grain has a greater variation on the back of the slat than Brushed and increased resistance to food oils, making it ideal for bench and table settings in covered locations. Duraslat colours coordinate across both types and are often combined in the same projects.

GRAVEL PATH

TIKI TORCH

LAVA ROCK

CARE + MAINTENANCE QUICK GUIDE

CLEANING – Occasional cleaning with warm soapy water and high pressure water jet (max 1500psi) will enhance results. A fan tip nozzle should be used. Spray the soapy and use a soft bristled brush to gently scrub the boards, and rinse soapy water off thoroughly to avoid leaving a film. Spray in the direction of the brush/grain pattern.

MAINTENANCE – Never sand DuraSlat Grain, doing so will damage the protective qualities of the shell and void your warranty.

Never use acetone or other solvents on Grain DuraSlat™.

FULL INFO

ALUMINIUM

Aluminium is a light, strong, flexible, non-corrosive and infinitely recyclable material making it an ideal choice of material for use in the Australian outdoor environment. Our aluminium is both mined and extruded in Australia, with our slats having up to 30% recycled content. Aluminium can also be recycled at the end of its lifespan with no reduction in quality of secondary products.

CARE + MAINTENANCE QUICK GUIDE

Our aluminium profiles are hard wearing and require no ongoing maintenance (other than washing) making them a great product that remains looking good.

CLEANING - Clean regularly with non-abrasive cleaning agents such as warm soapy water. Hand rubbing is often used for small work, for larger projects utensils such as soft fibre brushes may be useful. Rinse the surface with fresh water after cleaning. NEVER use abrasive materials such as scouring pads, steel wool, or metallic scrapers. NEVER use cleaners containing high bleach content or harsh abrasives.

ALUGRAIN

The Alugrain finish is a unique 'wood look' powdercoating process applied to our aluminium batten. Alugrain is a versatile blend of the performance, strength, corrosion resistance and low maintenance of Aluminium with the warm aesthetic and appearance of hardwood.

DRIFTWOOD

SPOTTED GUM

END CAP

END CAP

CARE + MAINTENANCE QUICK GUIDE

To keep Alugrain in good condition wash regularly to reduce build up of salts and pollutants which can reduce its lifespan. Areas of higher pollution and airborne salts generally require more frequent cleaning.

CLEANING - Carefully remove any loose surface deposits with a wet sponge or soft bristled brush. Use a soft (non-abrasive) cloth or brush and a diluted solution of mild detergent and warm water. Ensure surfaces are thoroughly rinsed with clean fresh water after cleaning to remove all residues.

NEVER use thinners, abrasive cleaning agents, alcohol based, acid or alkali cleaning agents.

FULL INFO

POWDERCOATS

Powdercoating gives a uniform, durable, high quality and attractive finish that is low in VOCs. Powdercoated surfaces have good flexibility and wear resistance giving them long term performance in high traffic areas. This cost-effective finish has great UV resistance and durability in the elements.
