CORRAL 2

The **Prospect range** is based on our competition winning designs for the Western Sydney Parklands Trust. The products have now been rolled out to a number of parkland projects under the control of the Western Sydney Parklands Trust, including Pimelea, Shale Hills, Plough and Harrow and Bungaribee. The designs, comprising seats, benches, tables, bollards, bike racks, bin enclosures and drinking fountains feature robust materials and striking asymmetrical forms which reflect the natural landscape as well as contemporary architectural trends.

The **Prospect range** is proudly Australian made.

Our vision

To uplift the human spirit by enhancing the public environment through design excellence, quality production and outstanding service.

Prospect Block range

Prospect Block Seat, Prospect Block Bench, Prospect Block Table

This range is characterised by its solid concrete block base which firmly connects the product to the ground both physically and symbolically – the concrete being an extension of the ground from which it emerges. Coupled to the concrete block is a substantial steel beam which supports the seating or table plane of DuraSlat™. The entire structure is robust, durable and requiring little or no maintenance and well suited to high usage parks and recreational areas.

Product Details

Seat	DuraSlat™ wood/plastic composite (DS)
Frame	Galvanised steel and concrete with acid etched exposed aggregate
Fixing	Concealed fixing by 6 x M16 masonry anchors

Standard Product Code

PBS.16.WB.DS	1600mm, Wide Back, DuraSlat™
PBS.16.DS	1600mm, Half Back, DuraSlat™

Custom options

May be fitted with selected hardwood 140 x 30 x 1600mm

Colours

Slats DuraSlat™	Upper frame
Black Bean	Galvanised Steel
Jarrah	
Silver Gum	Lower frame
Sahara	Pre-cast concrete with exposed aggregate

Made in Australia

Suitable for Outdoor

UV Stable

Recycled Wood Composite Used

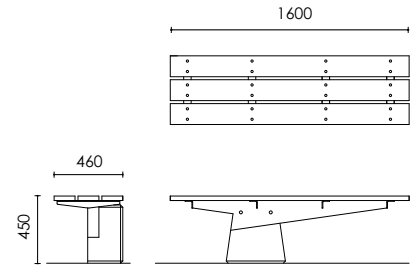

5 Year Warranty

PROSPECT TRUSS RANGE

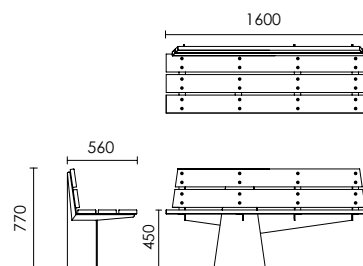

Prospect Truss range

Prospect Truss Seat, Prospect Truss Bench, Prospect Truss Table

This range is visually lighter than the Block range using an interlaced steel structure effectively creating a truss that at once anchors the product to the ground and provides cantilevered support for the seat or table plane. Though lighter in appearance the Truss range, by virtue of the heavy gauge of steel used and the simple construction involving only two materials, is strong and robust and well suited to streets and parks where supervision is minimal.

PDF.316SS.DB.BT

The **Prospect Drinking Fountain** is a unique contemporary design providing comfortable access for persons of all abilities. The marine grade stainless steel frame, electro polished then further hand polished to a mirror finish offers the highest level of corrosion resistance making it suitable for the most extreme environments. Its features include quality off the shelf fixtures in the bubbler and bottle fill tap, which are readily serviceable, a self-filling dog bowl and a grate over the drainage outlet. The unit may be configured with any one, or all of these features and is available in the standard optimum height or a height conforming to the Australian disabled access standard.

Product Details

Body	316 grade stainless steel with bright polish and cast aluminium grate
Height	1030 or 775mm AS1428.2 compliant (WC)
Fittings	Chrome plated brass bubbler and bottle tap (BT), cast aluminium dog bowl (DB)
Fixing	Subsurface fixed

Standard Product Code

PDF.316SS.DB.BT	1030mm drinking fountain with dog bowl and bottle tap
PDF.316SS.DB.BT.WC	775mm drinking fountain with dog bowl and bottle tap, AS1428.2 compliant

Prospect Range Design Features

Form – The range is characterised by its asymmetrical cantilever construction and appearance which reflects both the predominant structural device in nature (the way plant material springs from the earth to the broad reaching boughs of our forest eucalypts) and contemporary architectural expression.

Materials - Precast concrete with washed aggregate finish reflects the natural weathered sandstone of the region. DuraSlat™, (recycled wood and plastic composite) in weathered grey, together with galvanised steel, reflect not only the silver colour of the gums in the area but also the remnants of our pastoral heritage – weathered hardwood fencing and rural structures of corrugated iron and weathered hardwood.

Construction - Whilst these materials provide strong references to the natural and built environments they have also been selected for their high durability and low maintenance characteristics:

Material Properties

Concrete provides the anchor for the Block range, is highly resistant to vandalism and general wear. It creates a visual sense of strength and durability.

DuraSlat™ is a maintenance free wood composite with a 10 year warranty against degradation. It has been successfully used in b+g furniture products since 2006 and has been adopted as a standard by a number of municipal councils and Western Sydney Parklands Trust.

Galvanised steel - structural grade steel gives great strength to the products and requires no maintenance. Hot dip galvanising offers high corrosion resistance in most environments. Corrosion protection will be limited to 10 years in high exposure marine environments.

Generally all products in the range are designed to minimise risk of theft of components through use of concealed or specialised fixings. Tamperproof fixings available on request.
