PUBLIC SPACE FURNITURE

about us

Botton + Gardiner is synonymous with quality commercial furniture. For over 27 years we've been designing and manufacturing sustainable collections that bring public spaces to life, in Australia and around the world.

+ good looks + superior function

We believe design and durability should be accessible to everyone. Our Australian in-house designers and engineers, together with our team of American fabricators, create innovative solutions that stand the test of time, even in the world's harshest conditions

+ activating public spaces

We focus on bringing communities together. Our collections of outdoor and indoor furniture are specifically designed to make spaces more inviting, engaging, and interactive.

+ planet-conscious

We only have one planet. It's why we do everything we can to promote sustainable processes and prioritize materials that minimize our impact on the environment.

+ we love what we do

sustainability

We do everything we can to look after our planet by promoting sustainable processes and materials.

+ certified hardwood

Sustainable forestry management drives our hardwood selection process. Our Australian Eucalyptus hardwood is certified by the Program for the Endorsement of Forest Certification (PEFC), the world's largest forestry certification system.

+ material alternatives

We offer sustainable alternatives to hardwood, such as Duraslat™; a mineral-based composite material that contains no Volatile Organic Compounds (VOCs) and is engineered using up to 46% natural filler that is based on a renewable mineral.

+ recycled materials

We locally source our steel, and our aluminum. It means we know it uses recycled content and is 100% recyclable.

+ low pollutants

Our powder-coating process doesn't emit VOCs and has Environmental Product Declarations (EPDS) that enable projects to qualify for LEED credits.

+ mindful manufacturing

Our local manufacturing minimizes, sorts and responsibly disposes of physical and airborne waste material, while reducing carbon-intensive transportation.

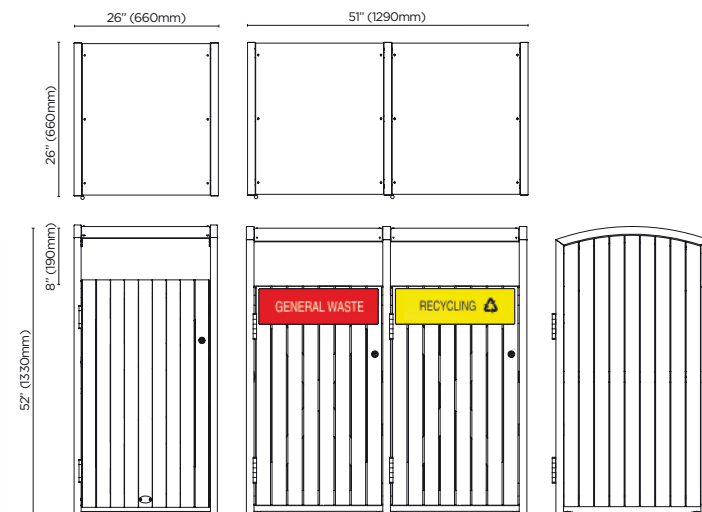

+ brighton collection

Brighton's detailed design mirrors its functional nature. The exposed steel frame, external hinges and compression lock offer effortless access, while matching panels maximise the 360° visual impact that make it ideal for streetscapes, parks, or campuses.
