- The dimensions indicated, which apply to a nominal tyre pressure, may vary in practice under the influence of actual tyre pressure and conditions of use.
- These specifications may be subject to change without notice. No liability accepted for errors or misprints.
- It is recommended not to exceed the maximum tyre pressures shown in the tables.
- For intensive transport activities at more than 30 km/h, the tyre pressure should be increased by 0,4 bar.
- When working on slopes over 20%, the tyre pressure should be increased by 0,4 bar.
- 10L: Activities where low torque is required at maximum 10 km/h.
- 10H: Field activities where high torque is required at maximum 10 km/h.
