

ME 95 - Mobile ECG device

Mobile 1-channel ECG device for recording the heart rhythm

Change lead detection: The device detects when a different measurement position would be more appropriate – for the best ECG results possible

Keep an eye on your heart health with the “beurer HealthManager Pro” app

Self-monitoring of heart function at home or on the move
Advanced arrhythmia detection: Detects atrial fibrillation to help prevent strokes
Records your heart rhythm
Arrhythmia detection
Bradycardia (low heart rate)
Tachycardia (elevated heart rate)
Detects motion and interference artefacts to reduce measurement errors in the ECG signal
Immediate information on heart rhythm as soon as the recording has finished
Have ECG measurements analysed and receive a personalised evaluation in seconds with the “beurer MyCardio Pro” service
Recording in 30 or 60 seconds
Lead via both hands and lead via hand and chest
Memory space for up to 60 measurements
rechargeable battery
USB charging cable incl. charging cradle
The algorithm demonstrated a sensitivity of 98.19% in the detection of atrial fibrillation (AFib) in an internal validation study using annotated ECG databases (MIT-BIH, etc.). The results are based on a technical validation under laboratory conditions.
Medical device according to the new Medical Device Regulation (EU) 2017/745 (MDR)

Article number: 45414
EAN: 4211125454142
Master carton packaging unit: 4 pcs
Shipping carton packaging unit: 24 pcs
Guarantee: 5 years
Product dimensions (L x W x H): 12.10 cm x 5.80 cm x 1.70 cm
Weight (without packaging): 0.1903 kg
