

# KOMATSU

## PC210-10M0 PC210LC-10M0

Photos may show equipments not available in your area

Hydraulic excavator

**Engine power**

123 kW / 165 HP @ 2000 rpm

**Operating weight**

PC210-10M0: 20400 - 21100 kg  
PC210LC-10M0: 21300 - 22300 kg

**Bucket capacity**

0.80 - 1.20 m<sup>3</sup>

# Walk-around

Engine power

**123 kW / 165 HP @ 2000 rpm**

Operating weight

**PC210-10M0: 20400 - 21100 kg**

**PC210LC-10M0: 21300 - 22300 kg**

Bucket capacity

**0.80 - 1.20 m<sup>3</sup>**

# Gives you higher returns and peace of mind

## Higher productivity

- Larger bucket capacity
- Higher stability
- Powerful digging operation and travel performance

## Lower fuel consumption

- Reduction of fuel consumption by 20%  
(Compared to the PC200-8M0)
- Advanced management system of variable engine speed matching control
- Fan clutch system
- Reduction of hydraulic piping loss

## Lower maintenance cost

- Less maintenance time with new features
- Detection system to prevent failure of main components
- More visible maintenance information on the monitor screen

## Higher durability

- Enhanced work equipment
- Heavy-duty main frame and rigidity swing circle

## Safety & comfort

- Large comfortable cab
- ROPS Cab (ISO 12117-2)
- Rear view monitor system (optional)

## ICT\* & Komtrax

- Large multi-lingual high resolution Liquid Crystal Display (LCD) monitor
- Equipment Management Monitoring System
- Komtrax

\* Information and Communication Technology

# Higher productivity

## Increase productivity

### Large capacity buckets

Bucket selection up to 1.20 m<sup>3</sup> are available. It can be matched for various applications.

### Bucket capacity

**1.00 m<sup>3</sup>** & **1.20 m<sup>3</sup>**

(Allowed material density: 1.8 t/m<sup>3</sup>)

(Allowed material density: 1.5 t/m<sup>3</sup>)

### 1.00 m<sup>3</sup> HD bucket & 1.20 m<sup>3</sup> GP bucket

By optimizing the shape of the side edge, it increases the penetration force. And Me bucket shape increases the production and has an effect on fuel consumption and wear reduction.

## Excellent stability

Stability is greatly improved by increasing weight of counterweight and extending the rear end radius compared

with the PC200-8M0. Lifting capacity also increased by 5%. This makes a smooth operation feeling, even being equipped with large capacity bucket or heavy attachment, possible to obtain. PC210-10M0 will increase your productivity more than ever.

### Lifting capacity

Compared to the PC200-8M0

**5% up**

### Powerful digging operation

Digging in P mode became powerful by improving hydraulic control. When more power is needed, the engine output is powered up by the one-touch power max. function (see next article), and you can dig stronger. Increasing engine power achieved high performance.

### One-touch power max. function

Digging force increase for 8.5 seconds of operation when press the left knob switch which is called the one-touch power max. switch and keep pressing. You can normally use E mode to reduce fuel consumption, use this function only when digging power is necessary, temporarily obtain it more than P mode.

One-touch power max. switch

### Powerful traveling performance

Increasing engine power makes the traveling in P mode powerful. When you are traveling on a high-load uphill or uneven terrain, PC210-10M0 gives you stable traveling speed and smooth traveling.

#### Engine power

Compared to the PC200-8M0

**12% up** (123 kW ← 110 kW)

#### Traveling output power

Compared to the PC200-8M0

**15% up**

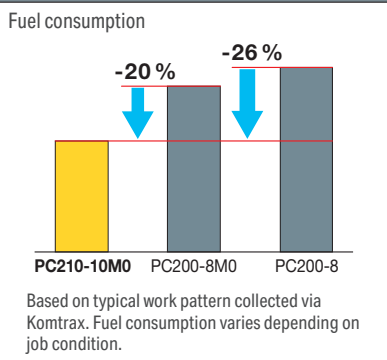

# Lower fuel consumption

Komatsu new engine technologies

## Low fuel consumption technology

Engine management is enhanced. The variable speed matching of the engine, hydraulic pump and a viscous fan clutch guarantee efficiency and precision. Through the in-house development and production of main components, Komatsu has achieved great advancements in technology, providing high levels of performance and efficiency in virtually all applications.

### Fuel consumption

**20% better**  
(Compared to the PC200-8M0)

**26% better**  
(Compared to the PC200-8)

Komatsu SAA6D107E-1 engine EU Stage 3A equivalent (CG image)

### Improvement of engine combustion efficiency

By optimizing the fuel injection control, the engine combustion efficiency is improved. This technology achieved both high power output and low fuel consumption.

### Reduction of hydraulic pressure loss

The internal shape of the control valves, piping diameter and fitting shape have been thoroughly revised. With this improvement, hydraulic loss is reduced more than ever. It contributes to low fuel consumption.

### Reduced fan speed and fan drive loss

A speed controlled viscous fan clutch and large diameter fan improves engine efficiency and reduces engine power requirements when operating in cooler temperatures.

### Enhanced engine-pump matching control

Large displacement hydraulic main pumps provide high flow output at low engine rpm. Furthermore, by building in optimum matching of the engine and pumps, it keeps high operability and workability. This technology achieved a large production and low fuel consumption.

## Assists energy-saving operations

### ECO gauge

Equipped with the ECO gauge that can be recognized at a glance on the right of the multi-function color monitor for environment-friendly energy-saving operations. Allows focus on operation in the green range with reduced CO<sub>2</sub> emissions and efficient fuel consumption.

ECO gauge      Idling caution

### Idling caution

To prevent unnecessary fuel consumption, an idling caution is displayed on the monitor, if the engine idles for 5 minutes or more.

### Fuel saving support functions

#### Just select a working mode that suits your purpose

In P mode, large production is implemented. In E mode, low fuel consumption is implemented. E mode can be adjusted widely from E0 to E4 mode, and it adapts flexibly to customer's demands. Komatsu tuned each work mode precisely, ensuring high operability and workability. Just by selecting the work mode, it provides the best performance in demanding applications.

#### P (Power mode):

Maximum production  
Fast cycle time

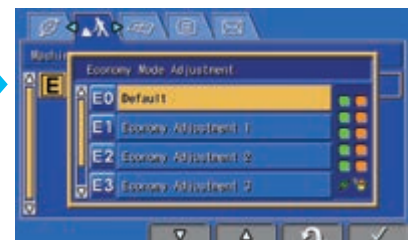

#### E (Economy mode):

Better fuel consumption

#### Easy selectable E mode

Compared with the conventional model, E0 to E4 can be easily selected on the monitor.

In addition to the above modes there are also the following modes. Please select the appropriate mode according to the application.

Working mode	Application	Advantages
L	Lifting mode	<ul style="list-style-type: none"> <li>Suitable attachment speed</li> <li>Lifting capacity is increased 7% by raising hydraulic pressure.</li> </ul>
B	Breaker mode	<ul style="list-style-type: none"> <li>Optimum engine rpm, hydraulic flow</li> </ul>
ATT/P	Attachment Power mode	<ul style="list-style-type: none"> <li>Optimum engine rpm, hydraulic flow, 2-way</li> <li>Power mode</li> </ul>
ATT/E	Attachment Economy mode	<ul style="list-style-type: none"> <li>Optimum engine rpm, hydraulic flow, 2-way</li> <li>Economy mode</li> </ul>

# Lower maintenance cost

**Maintenance is also part of the operating cost. Komatsu pursued reduction of maintenance time and cost.**

## Easy access to filters

Engine oil and fuel system filters are integrated into one side to allow easy maintenance and service.

## Easy cleaning cooling unit

Cleanability of the cooling unit has been improved. It is effective in the field of forestry and agriculture.

- Easier cleaning of the core by making the automatic air conditioner (A/C) capacitor a hinge structure
- Dustproof net does not require tools for desorption
- Making oil cooler a single piece from 2 pieces, no more space accumulating dust

### Easy oil sampling (optional)

Easy oil sampling ports are added. It is important to get sample that is agitated properly. Using this equipment will help accurate analysis.

### Minimization broken of circle grease nipple

The grease nipple of the circle is embedded for protection. It is irrefrangible structure even if wood debris or dusts are coiled around a swing circle.

### Pre-cleaner for dusty condition

Even in dusty places, by installing pre-cleaner coupled with the large air cleaner, the frequency of cleaning the air cleaner will be reduced. Durability has also improved by adopting new high efficiency pre-cleaner.

### Extended replacement interval of hydraulic oil filter

The replacement interval of the hydraulic oil filter element is extended by 2.5 times. It contributes to reduction of maintenance cost.

**2500 h**  
↑  
**1000 h**

### Easy maintenance time management

The monitor informs replacement time of oil and filters on the LCD when the replacement interval is reached.

### Detect abnormality of hydraulic circuit

#### Clogging sensor for hydraulic oil as standard

When the hydraulic oil filter is clogged, the caution message pops up on the monitor to notify replacing the filter. It is possible to suppress repair cost due to breakdown.

Clogging hydraulic oil filter caution

### Battery disconnect switch

A battery disconnect switch allows a technician to disconnect the power supply and lock out before servicing or maintenance the machine. Also, minimize discharge of the battery during long-term non operation. System operating lamp tells the timing of disconnect the switch to prevent controller failures.

### Easy to know maintenance time when using breaker

In addition to the above functions, it monitors the breaker usage time. Since the replacement time will be changed depending on the breaker usage time, monitor can notify the optimum replacement time.

### Clogging sensor for breaker line (optional)

### Fuel filtration

Prepared some filtration systems according to operating environment and region.

### Other features

- Easy cleaning drain port of fuel tank
- Improved drainability of hydraulic oil and fuel
- Easy to check level of hydraulic oil
- Electric priming pump (optional)
- Blow-by pressure detection
- Fuel line contamination prevention

# Higher durability

**High strength work equipment & frames to work with large bucket. It has durability to withstand any application.**

## Enhanced work equipment

Komatsu thoroughly investigated and analyzed the customer's jobsite and built in working machines with sufficient durability in any application of operation. Designed by state-of-the-art strength analysis technology. Komatsu incorporated an original casting technology in the most loaded part. Durability is greatly improved by highly accurate controlled welding technology. It is a structure that endured the harsh test. Ultrasonic inspection ensures its quality.

No need for additional welding when installing attachment piping or quick coupler piping in piping less work equipment.

### Reinforced revolving frame

Main components are installed to revolving frame. Revolving frame is strengthened to withstand the various ways of severe tests. This tempered frame supports stable operation.

### Strengthened swing circle

Swing circle with improved durability supports stable operation in any severe jobsite.

### Reliable Komatsu components

All of the major components, such as engine, hydraulic pumps, hydraulic motors and control valves are exclusively designed and manufactured by Komatsu.

### Highly reliable electronic devices

Exclusively designed electronic devices have passed severe testing.

- Controllers
- Sensors
- Connectors
- Heat resistant wiring

### Sealed connector

### Steady frame structure

The revolving frame, center frame and undercarriage are designed by using the most advanced three-dimensional CAD and Finite Element Method (FEM\*) analysis technology.

\*FEM analysis is a stress simulation method using a computer.

# ICT & Komtrax

**Large high resolution LCD monitor**

**Large multi-lingual high resolution LCD monitor**

A large user-friendly high resolution LCD color monitor enables safe, accurate and smooth work. Simple and easy to operate switches. Function keys facilitate multi-function operations. Displays data in 15 languages to globally support operators around the world.

**Indicators**

1 Auto-decelerator	6 Fuel gauge
2 Working mode	7 ECO gauge
3 Travel speed	8 Fuel consumption gauge
4 Engine water temperature gauge	9 Function switches menu
5 Hydraulic oil temperature gauge	10 Language select

**Basic operation switches**

1 Auto-decelerator	4 Buzzer cancel
2 Working mode selector	5 Wiper
3 Traveling selector	6 Window washer

## Supports efficient operation

The main screen displays advices for promoting energy-saving operations as needed. The operator can use the ECO guidance menu to check the operation records, ECO guidance records, average fuel consumption logs, etc.

ECO guidance

ECO guidance menu

ECO guidance records

Operation records

Average fuel consumption logs

## Simplified selection of languages and new languages added

It supports 15 languages including newly added languages. Language selection has become extremely easy.

## Equipment management monitoring system

### Monitor function

Controller monitors engine oil level, coolant temperature, battery charge air clogging, etc. If the controller finds any abnormality, it is displayed on the LCD.

### Maintenance function

The monitor informs replacement time of oil and filters on the LCD when the replacement interval is reached.

### Trouble data memory function

Monitor stores abnormalities for effective troubleshooting.

**The Komatsu remote monitoring and management technology provides insightful data about your equipment and fleet in user-friendly format.**

**Energy saving operation report**

Komtrax delivers the energy-saving operation report based on the operating information such as fuel consumption, load summary and idling time, which helps you efficiently run a business.

This report image is an example of hydraulic excavator

**Equipment management support**

Through the web application, a variety of search parameters are available to quickly find information about specific machines based on key factors. Moreover, Komtrax finds out machines with problems from your fleet and shows you through an optimal interface.

Periodic maintenance

The report contents and data depend on the machine model.

**Optimal strategy for efficient work**

The detailed information that Komtrax puts at your fingertips helps you manage your fleet conveniently on the web anytime, anywhere. It gives you the power to make better daily and long-term strategic decisions.

# Safety & comfort

## Safety should be the first priority at the jobsite

### Complied with ROPS/OPG level 1

The machine is equipped with a ROPS cab that conforms to ISO 12117-2 for excavators as standard equipment. The ROPS cab has high shock-absorption performance, featuring excellent durability and impact strength. It also satisfies the requirements of OPG top guard level 1 (ISO 10262) for falling objects. Combined with the retractable seat belt, the ROPS cab protects the operator in case of tipping over and against falling objects.

### Gas-assisted damper cylinders for opening engine food easily and lock bar

Gas-assisted damper cylinders helps opening the engine hood with light force. Lock bar is also equipped. This equipment will support during maintenance and repair.

### Thermal guard, fan guard

Preventing direct contact to high temperature parts or the finger being caught by fan when checking around the engine, by installing thermal guards and fan guard.

### Rear view monitor system (optional)

A new rear view monitor system display has a rear view camera image that is continuously displayed together with the gauges and important vehicle information. This enables the operator to carry out work while easily checking the surrounding area. Even if it is on another screen, it changes to the rear camera image at the same time as the any operation lever is operated.

### Slip-resistant plates

Highly durable slip-resistant plates to ensure long term superior traction.

### Cab guard:

**Front full height guard level 1**  
(ISO 10262) (optional)

**OPG top guard level 2**  
(ISO 10262) (optional)

**Lock lever**

**Pump/Engine room partition**

**Large side view, rear and sidewise mirrors**

**Large handrail**

**Ensuring operator's comfort, it contributes to increased safety and productivity**

**Suspension seat**

Suspension seat with weight adjustment function as standard equipment. This seat can reduce fatigue even in operation for a long time.

**Pressurized cab**

Pressurizing inside the cab to minimize the dust entering from outside. It can keep the cab clean.

**Low cab noise**

With overwhelming low noise, you can operate without stress. Ambient noise is also reduced, reducing the stress of surrounding workers.

**Automatic A/C**

It adjusts automatically to a comfortable temperature throughout the year, even in hot and cold areas.

**Low vibration with cab damper mounting**

The cab damper mounting combined with high rigidity deck aids vibration reduction at operator seat.

**Sun roller blind (optional)**

Prepared a roller blind which blocks strong sunlight. Reduce sunlight at any time of day.

**AUX**

The location may change

**12 V power supply**

**Magazine box**

**Cool & hot box**

**Luggage box**

# Bucket

## Feature of Komatsu bucket

The bucket affects most of the digging work and fuel consumption. Komatsu has line-up of various buckets so that you can choose a bucket suitable for your jobsite condition. You can also choose a bucket made by Hensley as one of the options. Please contact your dealer.

### Me bucket

**High productivity by low-resistant excavation**  
the new Ideal bucket profile produces lower resistance at inside & outside bucket and production will be greatly increased.

\* Bottom plate stays inside the tooth path by the new bucket profile.

### New shape bucket

**Easy to make bucket full and good penetration**  
The angle to the deepest part of the bucket becomes smooth with respect to the direction of excavation and the penetration resistance decreases by new shape of side edge.

## Category and feature

Category	Load / Wear / Soil (Application)	Image	
<b>Light Duty</b> LD	<b>Load</b> Machine power remains low during the majority of the work. No impact load. <b>Wear</b> Material is not abrasive. <b>Soil</b> Dirt, loam and clay.		
<b>General Purpose</b> GP	<b>Load</b> Machine power is mostly medium, but occasionally high. Bucket movements are smooth with minor shock load. Bucket penetrates easily. <b>Wear</b> Material is lightly abrasive. Some sand may be medium abrasive. <b>Soil</b> Mostly loose sand, gravel and finely broken materials.		
<b>Heavy Duty</b> HD	<b>Load</b> Machine power is high during majority of the work. Medium, but continuous shock load. <b>Wear</b> Material is abrasive. Light scratch marks can be seen at the bucket. <b>Soil</b> Limestone, shot rock, compact mix of sand, gravel and clay.		
<b>Extra Heavy Duty</b> XHD	<b>Load</b> Machine power is high during most of the work, often at maximum. Dynamic shock loads are frequent and machine may shake. <b>Wear</b> Material is very abrasive. Large scratch marks are visible and, or deform metal. Works within heaps of rock with occasional un-shot rock and rock boulders. <b>Soil</b> Granite, basalt, quartz sand, compact and sticky clay.

# Special spec.

## Attachment piping specification

Equips PC210/210LC-10M0 for breaker and crusher installation. Hydraulic flow rate can be regulated by setting Breaker mode on monitor panel during breaker operation.

## Super long front

Super long front attachment boasts a huge digging reach. An excavator with this attachment highly improves working efficiency in various works such as river conservation, lake dredging, slope finishing and materials carrying where an extensively long reach is required.

### Reinforced work equipment

Boom and arm are newly designed and enhanced longer life.

### Main specification

	PC210LC-10M0	
Reach	15 m	18 m
Bucket capacity	0.45-0.55 m <sup>3</sup>	0.29-0.36 m <sup>3</sup>
Boom length	8620 mm	10300 mm
Arm length	8350 mm	8200 mm

### Applicable bucket capacity

**0.45-0.55 m<sup>3</sup>** & **0.29-0.36 m<sup>3</sup>**  
(15 m reach) (18 m reach)

Expanded applicable bucket capacity by improving machine stability.

# Attachment

## Komatsu genuine attachment tool

### Komatsu-recommended attachment tools for hydraulic excavators

A wide range of attachment tools are provided to suit customers' specific applications.

#### Hydraulic breaker

The hydraulic breaker is an attachment tool used for crushing rock beds and paved surfaces, demolishing concrete structures, etc. The large gas chamber, ideal gas pressure ratio, and long-stroke piston deliver a powerful impact force. Since the breaker unit does not require an accumulator, the number of parts has been reduced, resulting in lower maintenance costs.

#### Crusher

This attachment tool is used for demolishing concrete structures. Since it does not have a striking mechanism and features low noise and low vibration, it is suitable for work in urban areas. The open-close cylinder is equipped with a speed-up valve for increasing work speed.

Primary crusher

Pulverizer

Rotating pulverizer

### Applications of attachment tools

Application/ Attachment tool	Civil engineering	Quarry	Demolition	Industrial waste disposal	Iron-making	Utility construction	Rental
Hydraulic breaker	○	○	○	○	○	○	○
Crusher (Primary crusher)			○				○
Crusher (Pulverizer)			○	○			○

## KMAX tooth system

Komatsu is preparing the KMAX series in addition to traditional horizontal pin tooth system. Please select the tooth suitable for the handling material and construction method of the job site to be used.

### KMAX tooth line-up

Feature	Style	KMAX	KMAX2
<b>F</b> Flare: Loose material for clean bottom and greater fill		<input type="radio"/>	<input type="checkbox"/>
<b>SYL</b> Standard: General applications		<input type="radio"/>	<input type="checkbox"/>
<b>SD</b> Chisel: General purpose tooth designed for penetration		<input type="radio"/>	<input type="checkbox"/>
<b>RC</b> Rock Chisel: Designed for penetration and long wear life		<input type="radio"/>	<input type="checkbox"/>
<b>T</b> Tiger: Designed for good penetration with ribs for strength		<input type="radio"/>	<input type="checkbox"/>
<b>TV</b> Tiger: Offers best penetration in tight material		<input type="radio"/>	<input type="checkbox"/>
<b>UT</b> Twin Tiger: Offers longer life penetration for corners		<input type="radio"/>	<input type="checkbox"/>
<b>WT</b> Twin Tiger: Designed for penetration for corners		<input type="radio"/>	<input type="checkbox"/>
<b>S</b> Standard		<input type="checkbox"/>	<input type="radio"/>
<b>SL</b> Long Life		<input type="checkbox"/>	<input type="radio"/>
<b>HS</b> Heavy Standard		<input type="checkbox"/>	<input type="radio"/>

### KMAX series pin lock system

**Fastener**  
Simple, reusable fastener system saves time and money by unlocking with a simple 90-degree turn.

**Lock**      **Unlock**

Removing the fastener

When removing the fastener, use the correct size socket to rotate the pin-locking shaft 90-degree counter-clockwise.

## Hensley brand bucket

Diverse bucket line-up by application, featuring KMAX system. Applicable bucket depends on the combination of work equipment, handling materials and job condition. For more details, please contact your DB.

### Category and recommended applications

Category	Recommended applications	Image
<b>Trenching and loading</b> TL	Dirt, loam, sand, gravel, loose clay, abrasive soils with limited rock mixture.	
<b>Heavy Duty plate lip bucket with wear plate</b> HP	Abrasive soils, compact or dense clay, loose rock and gravel.	
<b>Heavy Duty plate lip bucket with wear plate &amp; wear strips</b> HPS	Abrasive soils, compact or dense clay, loose rock and gravel.	
<b>Extreme Duty plate lip bucket with special features</b> HPX	Shot rock, stratified materials, quarry or tough, highly abrasive applications.

# Komatsu total support

## Komatsu total support

Komatsu distributor is ready to provide variety of support before and after procuring machine to keep customers machine available and minimize operation cost.

### Fleet recommendation

Komatsu distributor can study customer job site and provide the most optimum fleet recommendation with detailed information to meet all of your application needs when you are considering to buy new machines or to replace the existing ones from Komatsu.

### Product support

Komatsu distributor secure the quality of machine by offering quality repair and maintenance services to the customer using Komatsu developed programs.

- Preventive Maintenance (PM) Clinic
- Komatsu Oil and Wear Analysis (KOWA)
- Undercarriage inspection service, etc.

### Genuine parts and genuine oil

Komatsu distributor will promptly and smoothly offer genuine parts and genuine oil guaranteed quality to various jobsites. Genuine oil is developed by Komatsu so that it is best matched for our Komatsu engines and hydraulic components. It maximizes engine and hydraulic components performance and prolong life.

### Service contract

Komatsu distributor offers several service package of repair and maintenance for a contracted period with optimum cost. Customer can be "worry-free" by trusting Komatsu distributor skilled service.

### Extended warranty

Extended warranty with several options available. Komatsu guarantee skilled repair with genuine parts and protection from unexpected expenses.

### Operator training

Komatsu distributor can provide excellent operator training which enables them to operate machine safely & efficiently and to maintain machine properly.

# Specifications

## Engine

Model ..... Komatsu SAA6D107E-1  
 Type ..... Water-cooled, 4-cycle, direct injection  
 Aspiration ..... Turbocharged, aftercooled  
 Number of cylinders ..... 6  
 Bore ..... 107 mm  
 Stroke ..... 124 mm  
 Piston displacement ..... 6.69 L  
 Horsepower:  
 SAE J1995 ..... Gross 123 kW 165 HP  
 ISO 9249 / SAE J1349 ..... Net 123 kW 165 HP  
 Rated rpm ..... 2000 rpm  
 Fan drive method for radiator cooling ..... Mechanical with viscous fan clutch  
 Governor ..... All-speed control, electronic

Net horsepower at the maximum speed of radiator cooling fan is 117.2 kW 157.2 HP.  
 EU Stage 3A emission equivalent.

## Hydraulics

Type ..... HydraMind (Hydraulic Mechanical Intelligence New Design) system, closed-center system with load sensing valves and pressure compensated valves  
 Number of selectable working modes ..... 6  
 Main pump:  
 Type ..... Variable displacement piston type  
 Pumps for ..... Boom, arm, bucket, swing, and travel circuits  
 Maximum flow ..... 475 l/min  
 Supply for control circuit ..... Self-reducing valve  
 Hydraulic motors:  
 Travel ..... 2 × axial piston motor with parking brake  
 Swing ..... 1 × axial piston motor with swing holding brake  
 Relief valve setting:  
 Implement circuits ..... 37.3 MPa / 380 kgf/cm<sup>2</sup>  
 Travel circuit ..... 37.3 MPa / 380 kgf/cm<sup>2</sup>  
 Swing circuit ..... 28.9 MPa / 295 kgf/cm<sup>2</sup>  
 Pilot circuit ..... 3.2 MPa / 33 kgf/cm<sup>2</sup>  
 Hydraulic cylinders:  
 (Number of cylinders – bore × stroke × rod diameter)  
 Boom ..... 2–120 mm × 1334 mm × 85 mm  
 Arm ..... 1–135 mm × 1490 mm × 95 mm  
 Bucket for 2.93 m arm ..... 1–115 mm × 1120 mm × 80 mm  
 for 2.41 m arm ..... 1–115 mm × 1120 mm × 80 mm  
 for 1.84 m arm ..... 1–125 mm × 1110 mm × 85 mm

## Drives and brakes

Steering control ..... Two levers with pedals  
 Drive method ..... Hydrostatic  
 Maximum drawbar pull ..... 178 kN 18200 kgf  
 Gradeability ..... 70%, 35°  
 Maximum travel speed:  
 High ..... 5.5 km/h  
 (Auto-shift) Mid ..... 4.1 km/h  
 (Auto-shift) Low ..... 3.0 km/h  
 Service brake ..... Hydraulic lock  
 Parking brake ..... Mechanical disc brake

## Swing system

Drive method ..... Hydrostatic  
 Swing reduction ..... Planetary gear  
 Swing circle lubrication ..... Grease-bathed  
 Service brake ..... Hydraulic lock  
 Holding brake/Swing lock ..... Mechanical disc brake  
 Swing speed ..... 12.4 rpm

## Undercarriage

Center frame ..... X-frame  
 Track frame ..... Box-section  
 Seal of track ..... Sealed track  
 Track adjuster ..... Hydraulic  
 Number of shoes (each side):  
 PC210-10M0 ..... 45  
 PC210LC-10M0 ..... 49  
 Number of carrier rollers (each side) ..... 2  
 Number of track rollers (each side)  
 PC210-10M0 ..... 7  
 PC210LC-10M0 ..... 9

## Coolant and lubricant capacity (refilling)

Fuel tank ..... 400 l  
 Coolant ..... 21.8 l  
 Engine ..... 23.1 l  
 Final drive (each side) ..... 3.3 l  
 Swing drive ..... 5.3 l  
 Hydraulic tank ..... 135 l

## Operating weight (approximate)

Operating weight including 5700 mm one-piece boom, 2925 mm arm, ISO 7451 heaped 1.00 m<sup>3</sup> HD backhoe bucket, rated capacity of lubricants, coolant, full fuel tank, operator, and standard equipment.

Shoes	PC210-10M0		PC210LC-10M0	
	Operating weight	Ground pressure	Operating weight	Ground pressure
500 mm	20400 kg	55.8 kPa 0.57 kgf/cm <sup>2</sup>	—	—
600 mm	20500 kg	46.8 kPa 0.48 kgf/cm <sup>2</sup>	21300 kg	44.0 kPa 0.45 kgf/cm <sup>2</sup>
700 mm	20900 kg	40.8 kPa 0.42 kgf/cm <sup>2</sup>	21700 kg	38.4 kPa 0.39 kgf/cm <sup>2</sup>
800 mm	21100 kg	36.1 kPa 0.37 kgf/cm <sup>2</sup>	22000 kg	34.0 kPa 0.35 kgf/cm <sup>2</sup>
900 mm	—	—	22300 kg	30.7 kPa 0.31 kgf/cm <sup>2</sup>

## Dimensions

Arm length		1840 mm	2410 mm	2925 mm
A	Overall length	9630 mm	9640 mm	9550 mm
B	Length on ground (transport): PC210-10M0 PC210LC-10M0	6255 mm	5690 mm	4825 mm
		6455 mm	5880 mm	5015 mm
C	Overall height (to top of boom)	2975 mm	3215 mm	3005 mm

Model		PC210-10M0	PC210LC-10M0
D	Overall width	2800 mm	3080 mm
E	Overall height (to top of cab)	3045 mm	3045 mm
F	Ground clearance, counterweight	1085 mm	1085 mm
G	Ground clearance (minimum)	440 mm	440 mm
H	Tail swing radius	2900 mm	2900 mm
I	Track length on ground	3275 mm	3655 mm
J	Track length	4070 mm	4450 mm
K	Track gauge	2200 mm	2380 mm
L	Width of crawler	2800 mm	3080 mm
M	Shoe width	600 mm	700 mm
N	Grouser height	26 mm	26 mm
O	Machine cab height	2095 mm	2095 mm
P	Machine cab width	2710 mm	2710 mm
Q	Distance, swing center to rear end	2860 mm	2860 mm

## Working range

Arm length		1840 mm	2410 mm	2925 mm
A	Max. digging height	9665 mm	9810 mm	10065 mm
B	Max. dumping height	6760 mm	6885 mm	7160 mm
C	Max. digging depth	5230 mm	6000 mm	6515 mm
D	Max. vertical wall digging depth	4530 mm	5410 mm	5810 mm
E	Max. digging reach	8870 mm	9390 mm	9860 mm
F	Max. digging reach at ground level	8670 mm	9200 mm	9680 mm
G	Min. swing radius	2820 mm	3090 mm	2990 mm
SAE-J1179 Rating	Bucket digging force at power max.	157 kN 16000 kgf	132 kN 13500 kgf	132 kN 13500 kgf
	Arm crowd force at power max.	139 kN 14200 kgf	124 kN 12600 kgf	103 kN 10500 kgf
ISO 6015 Rating	Bucket digging force at power max.	177 kN 18000 kgf	149 kN 15200 kgf	149 kN 15200 kgf
	Arm crowd force at power max.	145 kN 14800 kgf	127 kN 13000 kgf	108 kN 11000 kgf

## Major component weights

Items			Weight for a machine (kg)	
			STD undercarriage	LC undercarriage
<b>Boom</b> (incl. piping, pins, arm cylinder)	5.7 m	Type a*	Without ATT piping	1870
			With 1ATT piping	1920
		Type b**	Without ATT piping	1910
			With 1ATT piping	1970
<b>Arm</b> (incl. piping, pins, bucket cylinder)	2.9 m		Without ATT piping	1100
			With 1ATT piping	1155
	2.4 m		Without ATT piping	1010
			With 1ATT piping	1070
	1.8 m		Without ATT piping	950
			With 1ATT piping	1010
<b>Bucket</b> (without linkage)	0.80 m <sup>3</sup> GP			680
	0.94 m <sup>3</sup> GP			740
	1.00 m <sup>3</sup> HD			880
	1.20 m <sup>3</sup> GP			910
<b>Roller guards</b>	STD		45	85
	Full length		220	265
<b>Shoe assembly</b> (with link)	600 mm		2430	-
	700 mm		2810	3060
	800 mm		3060	3340

\*: for Asia, C.S. America \*\*: for Middle East, Africa note: Area may vary

### Standard specification:

Operating weight: PC210-10M0: 20500 kg  
PC210LC-10M0: 21700 kg

Operating weight including below spec.

Boom: 5700 mm STD

Arm: 2925 mm STD

Bucket: 1.00 m<sup>3</sup> HD

Shoe: 600 mm triple grouser

700 mm triple grouser (LC)

Counter weight: STD

Track roller guard: STD

Rated capacity of lubricants, coolant, full fuel tank, 80 kg operator.

## Standard equipment

### Engine

- Air pre-cleaner
- Automatic engine warm-up system
- Compliant bio diesel fuel
- Coolant filter
- Dry type air cleaner, double element
- Engine, Komatsu SAA6D107E-1
- Engine overheat prevention system
- Fan clutch
- Radiator and oil cooler dust proof net

### Electrical system

- Alternator, 24 V/60 A, brushless
- Auto-decelerator
- Batteries, 2 × 12 V/110 Ah
- Battery disconnect switch with operation lamp
- Starting motor, 24 V/4.5 kW
- Working light, 2 (Boom and R.H.)

### Hydraulic system

- Boom holding valve
- Clogging sensor for hydraulic oil return filter
- Power maximizing system
- Pressure Proportional Control (PPC) hydraulic control system
- Working mode selection system

### Guards and covers

- Fan guard structure

### Undercarriage

- Hydraulic track adjusters (each side)
- Track guiding guard, center section
- Track roller
  - PC210-10M0: 7 each side
  - PC210LC-10M0: 9 each side
- Track shoe
  - PC210-10M0: 600 mm triple grouser
  - PC210LC-10M0: 700 mm triple grouser

### Operator environment

- 12 V power supply
- Auto A/C with defroster
- AUX equipped with radio
- Equipment management monitoring system
- Large multi-lingual high resolution LCD monitor
- Rear view mirrors (R.H., L.H., rear, sidewise)
- ROPS cab (ISO 12117-2)
- Suspension seat

### Other equipment

- Blow-by sensor
- Counterweight
- Electric horn
- Komtrax (only for approved area)
- Rear reflector
- Slip-resistant plates
- Travel alarm

## Optional equipment

### Engine

- Additional filter system for poor-quality fuel (water separator)
- Large capacity fuel pre-filter

### Electrical system

- Amber beacon lamp on cab roof
- Batteries, large capacity
- Working lights
  - 2 on cab
  - 1 on counterweight

### Hydraulic system

- Arm holding valve
- Clogging sensor for breaker return filter
- Inline filter
- Long lubricating intervals for work equipment bushing (500 hours)
- Service valve

### Guards and covers

- Heavy duty revolving frame undercover
- Revolving frame deck guard

### Undercarriage

- Shoes, triple grouser shoes
  - PC210-10M0: 700 mm, 800 mm
  - PC210LC-10M0: 600 mm, 800 mm, 900 mm
- Track frame undercover
- Track roller guards (full length)

### Operator environment

- Bolt-on top guard, OPG top guard level 2 (ISO 10262)
- Cab accessories
  - Rain visor
  - Sun roller blind
  - Sun visor
- Cab front guard
  - Full height guard
  - Half height guard
- Rear view monitor system

### Work equipment

- Arms
  - 1840 mm arm assembly
  - 2410 mm arm assembly

### Servicing equipment

- Electric priming pump
- Fuel refill pump
- Oil sampling port (engine & hydraulic)
- Preventive Maintenance (PM) service connector

Standard/option equipment may change. For more details, please consult your distributor.

Up to 20% blended biodiesel fuel and paraffine fuel can be used.  
Please consult your Komatsu distributor for detail.
