

Centum™ Force

Containerized Generator Sets

Flexible Options

Centum™ Force is a range of containerized generator sets from Cummins Power Generation, designed for rapid installation and commissioning.

With a stackable design that minimizes footprint and reduces ownership costs, this innovative 50Hz solution is built on Cummins' legacy of reliability and advanced technology. Engineered for diverse power applications, Centum™ Force delivers a complete, optimized power system for various operational needs.

Customizable Solutions

Centum™ Force is designed to meet a wide range of power demands and challenges with fully configurable models and options.

For specialized requirements, additional customization is available through the Engineered To Order (ETO) process. Offering multiple power output configurations in 50Hz, Centum™ Force delivers between 2,000 kVA and 2,750 kVA to suit diverse operational needs.

Applications

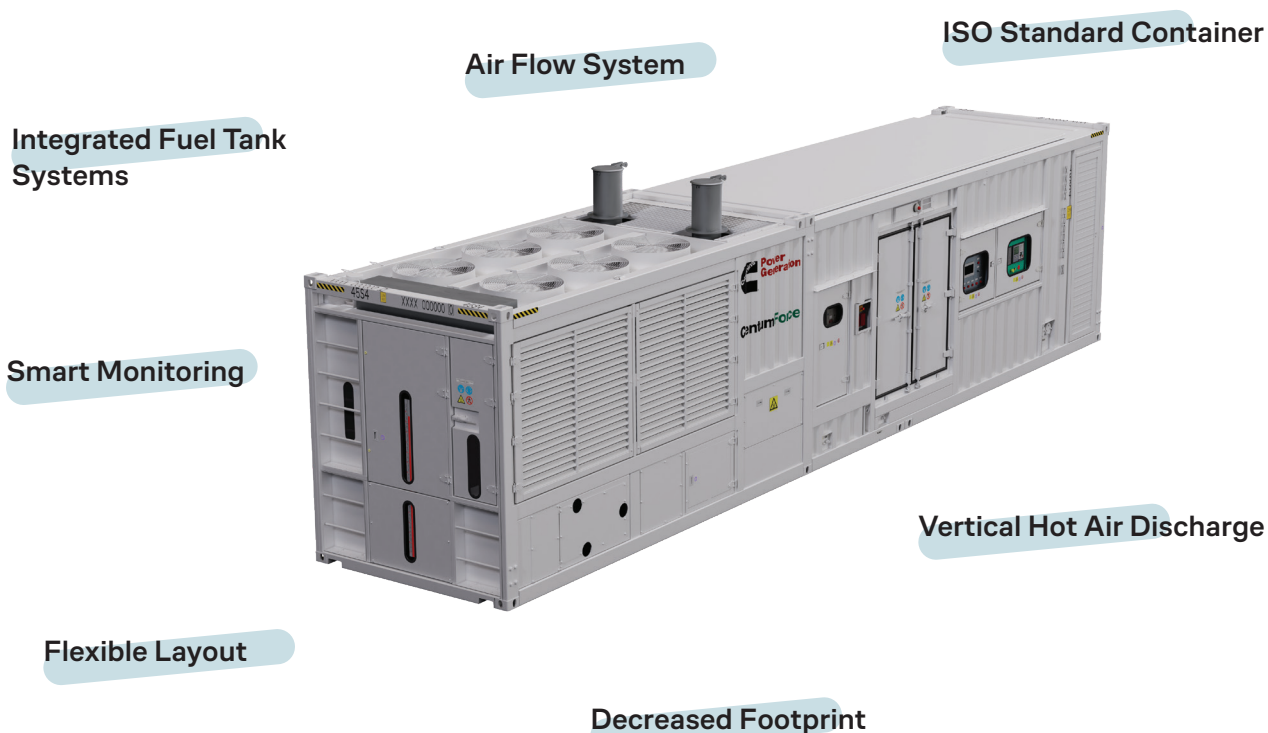

- Data centers
- Hospitals
- Manufacturing plants
- Oil and gas
- Commercial buildings
- Public utilities
- Temporary power and rental
